## ABOUT SUNDEEP NARANG

At the early age of 26, Sundeeep Narang has developed the most cutting-edge technology in the financial services sector. Hailing from India, Sundeeep is a Node.js-based full-stack web application developer. He received his Bachelor degree in his native country, but was looking for an increased opportunity to grow and learn. Sundeeep applied and was accepted into New York University where he received a Master's of Science in Computer Science.

His passion for innovation and creativity has driven him to create enterprise-scale applications, single-handedly, for the last two years.

Currently, Sundeeep is a Senior Software Engineer at Quality EDGAR Solutions, Inc. He is responsible for the development, design, and deployment of web applications that help public companies file forms and documents with the Securities and Exchange Commission (SEC). He also developed a negotiation system, called ETC Unite, to help corporations and unions negotiate labor contracts. This system was certified by SAP and showcased at "SAP Sapphire Now 2014."

An indispensable member of the Quality EDGAR Solutions team, Sundeeep has time after time taken abstract ideas and turned them into problem solving applications in the in computer science realm. The internal database that he built is now the foundation of their document and workflow management. Sundeeep has an impeccable work ethic, which he attributes to his father.

In addition to his creation duties at Quality EDGAR Solutions, Sundeeep was a mentor for PowerBridgeNY, a program to turn cleantech innovations from the academic research labs of our six partner institutions into strong, cleantech businesses in New York State. Sundeeep loves his adoptive country, and wishes to call America his permanent home. When he is not coding, he loves exploring and learning about new technologies like virtual reality.

“ Sundeeep Narang is an extraordinary young man...He took the challenge of bringing our development to New York, New York from Minsk, Belarus and delivered on it. Only an individual with extraordinary ability in the field could do that. – Frank Peter Cuneo ”

**Master's Degree**
