

iPhone SE is as durable as it is beautiful, and features an aerospace-grade aluminium and glass design, now with the toughest glass in a smartphone on the front and back — the same as on the back of iPhone 13 Pro and iPhone 13. Rated IP67 for water and dust resistance, iPhone SE is designed to protect against spills.<sup>2</sup> iPhone SE features the familiar Home button with Touch ID — an easy, private, and secure alternative for logging in to apps, authorising App Store purchases, making Apple Pay transactions, and more.

The power of Apple silicon delivers industry-leading performance and cutting-edge capabilities to iPhone. The lightning-fast A15 Bionic — introduced with iPhone 13 — comes to iPhone SE and makes nearly every experience better, from launching apps to handling demanding tasks with ease.

iPhone SE features an all-new camera system powered by A15 Bionic, with a 12-megapixel f/1.8 aperture Wide camera that offers incredible computational photography benefits, including Smart HDR 4, Photographic Styles, Deep Fusion, and Portrait mode.

5G allows users to take advantage of the latest generation of wireless technology, with faster uploads and downloads, lower latency, and better experiences in more places — like seeing family with higher-quality HD FaceTime calls, even when on cellular data and not on Wi-Fi.
