In the post-pandemic era, people's trust in and reliance on medical care is gradually declining. People are starting to forget about COVID-19's effects in the world and the human body. They want to forget about it, they believe it's over.

Theology of suffering, through suffering people can remember.  
Acceptance of suffering means acceptance of EXPERIENCE,  
acceptance of HEALING.

However, there are lots people still experiencing directly and indirectly the impact of the virus in their health. From respiratory, metabolic and cardiovascular diseases to mental health problems and fatigue.

Would you be willing to accept "suffering"?

I can't sleep. Exhaustion is like a mountain.  
I can't sleep. I can't sleep. I can't sleep.

Drowning in an endless nightmare.

I could hear the lungs clogging up with random drafts of breath.  
I can't catch my breath, I can't control my breath,  
The rush of wind is rattling in my body,  
There's an old bellows in my torso.

My nose ran away from home.  
The drive of smell and taste had lost its meaning.

I'm not happy. Depression goes hand in hand.  
Brain fog?  
My concentration dropped.

Can you see my veins? It's teal, it's sticky, it's congested.

Ah, do you hear my voice? Is that my voice?

Do you like sports? I used to love it.

Keep your distance.

I'm reasonably healthy.

How insignificant you are,  
a lonely individual,  
the form of alienation,  
they can't even distinguish their subtle shapes.

Endless,  
continuous integration,  
fuse,  
perhaps.  
The reintegration of fusion means division,  
unable to suppress and control your growth,  
erode every inch of skin,  
gradual infiltration and spread,  
till the body had no skin.  
Let it go,  
Let it go,  
Let it go,  
  
Burst silently.
