How are You Really?

Your mental health matters.

Prevalence refers to the number of people currently diagnosed with diabetes. There are 3.9 million people who have been diagnosed with diabetes in the UK.

HOW MANY PEOPLE IN THE UK HAVE DIABETES 1?

13.6 million people are now at increased risk of type 2 diabetes in the UK

You're more at risk of type 2 diabetes if you have a close family member who has diabetes

850,000 people are currently living with type 2 diabetes but are yet to be diagnosed

Research has consistently shown that for some people, combined lifestyle interventions - including diet, physical activity and sustained weight loss - can be effective in reducing the risk of type 2 diabetes by about 50%.
