***Project theme:**

This project theme was based on observing the loneliness that occurs from our current status in London, which is especially from the specific experiences we get as an Asian woman.

We thought how each individual feels could be a mirror of what is happening to society. So we focused on ourselves as an individual in this society and observed together.

Talking about feeling loneliness as an Asian woman helped us not to think of it as a minor feeling, but to consider it a crucial feeling to be shared, and we made this video based on our conversation to share our experiences with the other audiences who could have a similar feeling like us.

Team work

Yuyan is from photography major, so she was responsible for most of the photography.

Xinyi is from animation, so she was in charge of the creation of the split-screen script as well as the post-production editing, hard work for her.

Nuo on the other hand was in charge of the animation part of the film, she wanted to try some new areas so she did the animation, and she did a great job.

Jane was the cohesive force behind the whole team, organizing the schedule and writing the text.

It was an invaluable experience,
we worked well together and it's something we'll all remember.

**Thank
you**
