School of Law

# REVAMPING ORGANIC GROWTH IN HIGHER ED

## Client Name:

USC Gould School of Law

# USC Gould

School of Law

## Services:

SEO

## Project Brief:

In 2022, USC Gould School of Law, a prestigious law school in Los Angeles, California, approached Redefine seeking to make a change and garner awareness among a broader audience. Until that point, the university relied heavily on brand search; however, a complex web platform with lingering technical issues prevented them from achieving this goal. Additionally, USC Gould operated in a highly competitive field with equally prestigious universities like UCLA Law, UW Law, and UC Berkeley School of Law competing for high-value keywords. Finally, the team had a major website redesign on the horizon that required careful execution to mitigate any potential loss in organic traffic.

## Industry:

Universities + Higher Education

The Redefine team was presented with a critical challenge. However, through website migration expertise, deep technical understanding, and detailed competitive analysis, the team was prepared to close this case.

## The Challenge:

Improve non-brand organic search performance

Address lingering technical SEO issues affecting visibility

Mitigate organic traffic losses from a full website redesign

## The Resolution:

- + Provided targeted on-page optimizations and technical SEO improvements to increase organic traffic and application submissions.
- + Executed a seamless site migration during the December 2023 redesign, preventing traffic loss and resolving key technical issues.
- + Elevated key university pages to page one via striking distance optimizations, boosting visibility for high-value degree pages.
- + Leveraged detailed competitor analysis to refine content and on-page SEO strategy, outpacing competitors like UCLA Law and the University of Washington on high-value keyword rankings.
