

#### COMPOSITION

Oxalobacter formigenes 700 million, Lactobacillus acidophilus 400 million Lactobacillus rhamnosus 300 million ,Bifidobacterium lactis 300 million and Fructo Oligo Saccharides 100 mg

#### **DESCRIPTION**

OXBIND is an authentic formulation of prebiotic and probiotic. Probiotics are live bacteria and yeasts that contribute to a good health.

## **INDICATIONS**

Kidney stones (calcium Oxalate Stones)

## **MECHANISM OF ACTION**

Oxalobacter formigenesis, Lactobacillus acidophilus, Lactobacillus rhamnosus and Bifidobacterium lactis metabolize oxalate in the intestinal tract leading to reduced colonic absorption of oxalate, subsequent decrease in urinary oxalate levels. Thus, stops further progression of oxalate stone formation and prevent recurrence of stone formation.

# **DOSAGE**

OXBIND indicated dosage is twice a day for a period of 3 months or as directed by physician.
