We do a full evaluation of your health using state of the art equipment such as the GDV and the Vedatest developed in Russia that scan your body by measuring the electrical fields around your fingers. Our tests are accurate up to 95% and give us a full health profile with clear indications of all organ dysfunctioning, dietary mismatch, energy level index, stress status, toxin levels, etc.

Our medical team can then craft the right treatment programs and combination that will give you the improvements that you can feel right from the start for we identify the main priorities in each patient's ill health and address these in a multifactorial approach.

The professionalism of the medical team surprised me. I thank Dr. Siddick and the team for the fabulous results.
