

Nothing changes without the proper process

Matching the right process model to the right working environment is crucial to driving effective change.

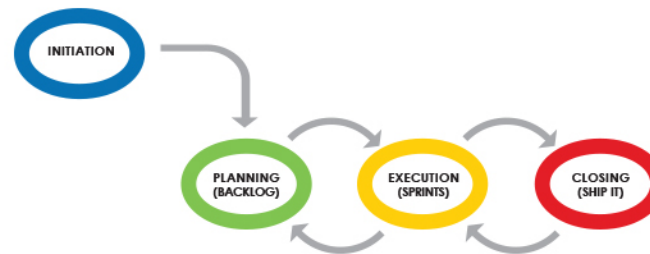

Waterfall Model

Ideal for:

Linear Workflow
Command & Control
Simple Process

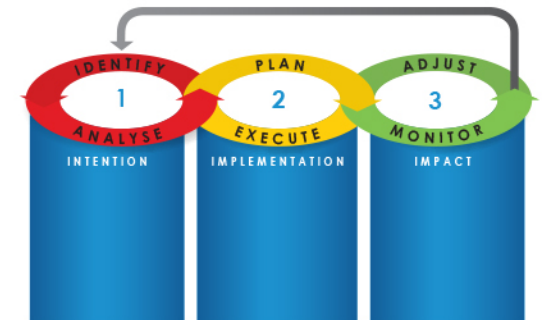

Agile Model

Ideal for:

Linear Workflow
Expected/Scheduled Feedback
Slightly Complex Process

Intention Implementation Impact Model

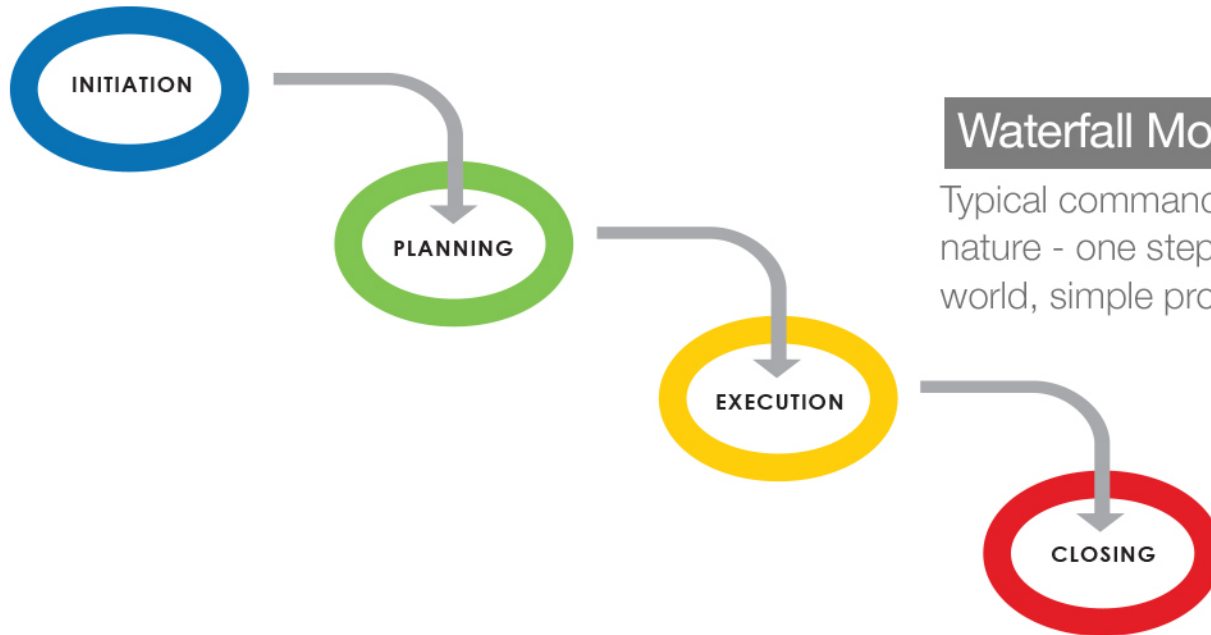

Ideal for:

Adaptive Workflow
Expected/Unexpected Feedback
Multiple Constituencies
Complex Process

What works in linear, command & control environments

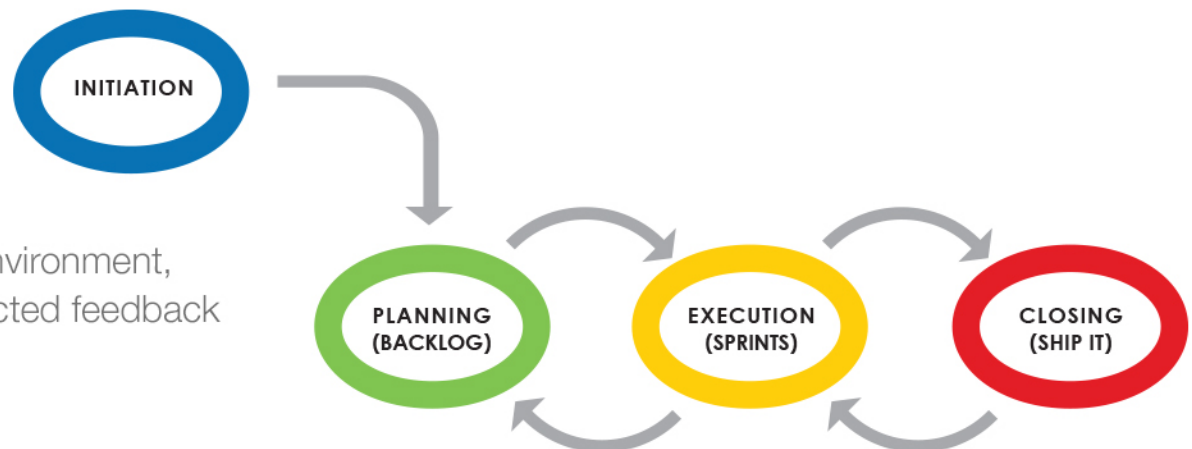

Waterfall Model

Typical command-and-control work processes are linear in nature - one step follows naturally from the other. In a perfect world, simple processes drive results via a Waterfall Model.

Agile Model

In a slightly more complex organizational environment, an Agile Model allows scheduled and expected feedback to be accommodated and processed.

Why I/I/I Works For Education

The Intention/Implementation/Impact Model provides a series of organized feedback loops across all aspects of planning, execution and measurement to encourage open communication, support shared responsibility/accountability and create a never-ending cycle of improvement.
