

The advertisement features two Tower Swan Twin Stack Air Fryers. The fryer on the left is shown with its two drawers open, revealing fried chicken in the top drawer and french fries in the bottom drawer. It has a digital display and various control buttons on top. The fryer on the right is closed, showing its sleek black design and a digital display on the side. In the background, there are various food items: a bowl of salad, a cutting board with green onions and wings, and a bowl of fries. The overall scene is set on a wooden countertop.

designed for life

TWIN STACK AIR FRYERS

DUAL BASKET AIR FRYERS

Consumer demand for dual basket air fryers continues to grow!

- **MORE VERSATILE** - As consumers lead busier lives the demand for convenience has never been greater and dual basket air fryers have become the go to product as people look to save time in the kitchen where possible.
- **MORE COOKING SPACE** - The expanded cooking space offers excellent versatility and acts as a time saver as many dual basket air fryers have specialised match cook and smart finish settings that allow them to cook larger meals without juggling cooking times.
- **MORE FLEXIBILITY** - Dual basket design offers greater flexibility when cooking so consumers can easily create full family meals from a single appliance.

DUAL BASKET AIR FRYERS

The compromise

- **LESS COUNTERTOP SPACE** - Bigger appliances naturally will take up more space on the worktop which can be problematic in smaller kitchens and tighter cupboards where space is at a premium.
- **LARGE FOOTPRINT** - The larger footprint can sometimes restrict the space available for food preparation and serving, especially where consumers might have various appliances on their worktop that they use regularly, so we have sought to find a solution without compromising on quality.
- **STORAGE CHALLENGES** - This has also led to issues with storage space as bulkier appliances are harder to fit into smaller cupboards and consumers don't necessarily want them out on the worktop 24/7.

INTRODUCING TWIN STACK AIR FRYERS

Offering all the functionality, convenience and versatility of a dual basket air fryer, but taking up much less space in your kitchen.

- **Two Large Baskets, Stacked Vertically**

Slimline design maximizes cooking capacity without increasing the appliance's countertop footprint.

- **Independently Controlled**

Each basket operates independently, allowing you to cook different foods or recipes at the same time.

- **Uses 35% less worktop space**

The sleek design saves valuable countertop space, making it ideal for smaller kitchens or busy workspaces.

11 Litre DUAL LAYER Air Fryer

- Two spacious vertically stacked 5.5L baskets combine for a huge 11L capacity
- Slimline dual stacked design saves 35% space on your worktop without compromising cooking capacity
- Easy to use digital control panel
- Six preset cooking functions including Fries, Wings, Steak, Veg, Bake and DIY mode
- Independently adjust the timer, temperature and cooking settings for each basket
- Smart Finish synchronises cooking times so both baskets finish at the same time
