

The Accounting Data Security Standard Certified Company

This is to certify that
Modern CPAs, Inc.

has fulfilled the requirements of the Accounting Data
Security Standard as of **18th October 2023.**

The ADSS is a global best practice standard for the protection of client data and passwords for accountants worldwide. It is critical that while the requirements have been satisfied at the date of certification, the company continues to engage best practice security and data protection practices. This certificate is not a warranty of breach protection but recognition that company has proactively put in place positive best practice standards relating to data security.
