

Questionnaire vs. Organizer

How are these two tools different?

Questionnaire	Organizer
<p>Online questionnaire used to collect tax information</p> <p>You will fill out and answer the questions - needed in order to prep your tax return</p> <p>Some questions within the questionnaire are required by the IRS</p>	<p>A guide for your tax collection - the information within does not need to be filled out</p> <p>This information has been compiled based off of information you have submitted in previous years</p> <p>Not required to complete preparation of your tax return</p>

*While the **questionnaire** is required to complete tax prep, the **organizer** is not a necessity but can be a great tool!*
