### Magic Link vs. Password: What's the Difference?

Feature	Magic Link	Password
Security	Very secure—link expires quickly	Secure if strong and kept private
Convenience	No need to remember anything	Must remember or store your password
Login Process	Click link in email to log in	Type password manually
Risk	Email access is required	Risk of forgotten or weak passwords

### Magic Link

A magic link is a one-time login URL sent to your email. When you click it, you're automatically logged in. It's secure and convenient—especially if you don't want to manage passwords.
