

Electrical solutions for buildings

Energizing tomorrow's buildings, today

EATON

Powering Business Worldwide

At Eaton, we help meet the challenging power demands of modern commercial buildings.

Eaton is a leading power management company, providing energy efficient solutions that help customers use electrical, fluid and mechanical power more reliably, efficiently, safely and sustainably.

We provide innovative solutions globally that help you build a more sustainable business.

Eaton brings a new dimension of expertise.

The building that houses your business is the beating heart of your enterprise. Staff work here, you meet your customers here and visitors come here to use the services and facilities you provide. A well-designed and maintained building is critical to future growth and success. But is your facility a source of value? Or a drain on resources? You must protect people, assets and reputation to ensure business continuity. You have to reduce energy use to meet changing regulatory requirements. And these considerations must be balanced against the need for design and functionality that maximizes use of space and enhances the user experience.

Eaton's breadth of products and services make us an ideal partner to help you meet the challenging demands of today's buildings. With a unique mix of solutions, ranging from electrical distribution infrastructure to lighting, and critical power solutions to safety and fire systems, Eaton provides one complete offering that meets local standards when and where you need it.

Legacy of innovation.

Over the years, our innovative portfolio has grown, including solutions from:

- B-Line
- Busmann
- CEAG
- Cooper
- Cutler-Hammer
- Fulleon
- MEM
- Menvier
- Moeller
- Powerware

Our solutions help you protect your business by focusing on reliability and efficiency to maximize comfort, safety and ROI.

Protect people, assets and reputation for business continuity

At Eaton, we provide reliable power for continuous operations, help protect people during maintenance and commissioning and provide life safety, notification, emergency lighting and fire detection systems. We also help protect your building with solutions for intruder detection and access control, shared expertise in regulations and building codes, training on the latest safety practices, arc flash prevention solutions, energy audits and other services. We always strive to exceed standards, so you can focus on running your business.

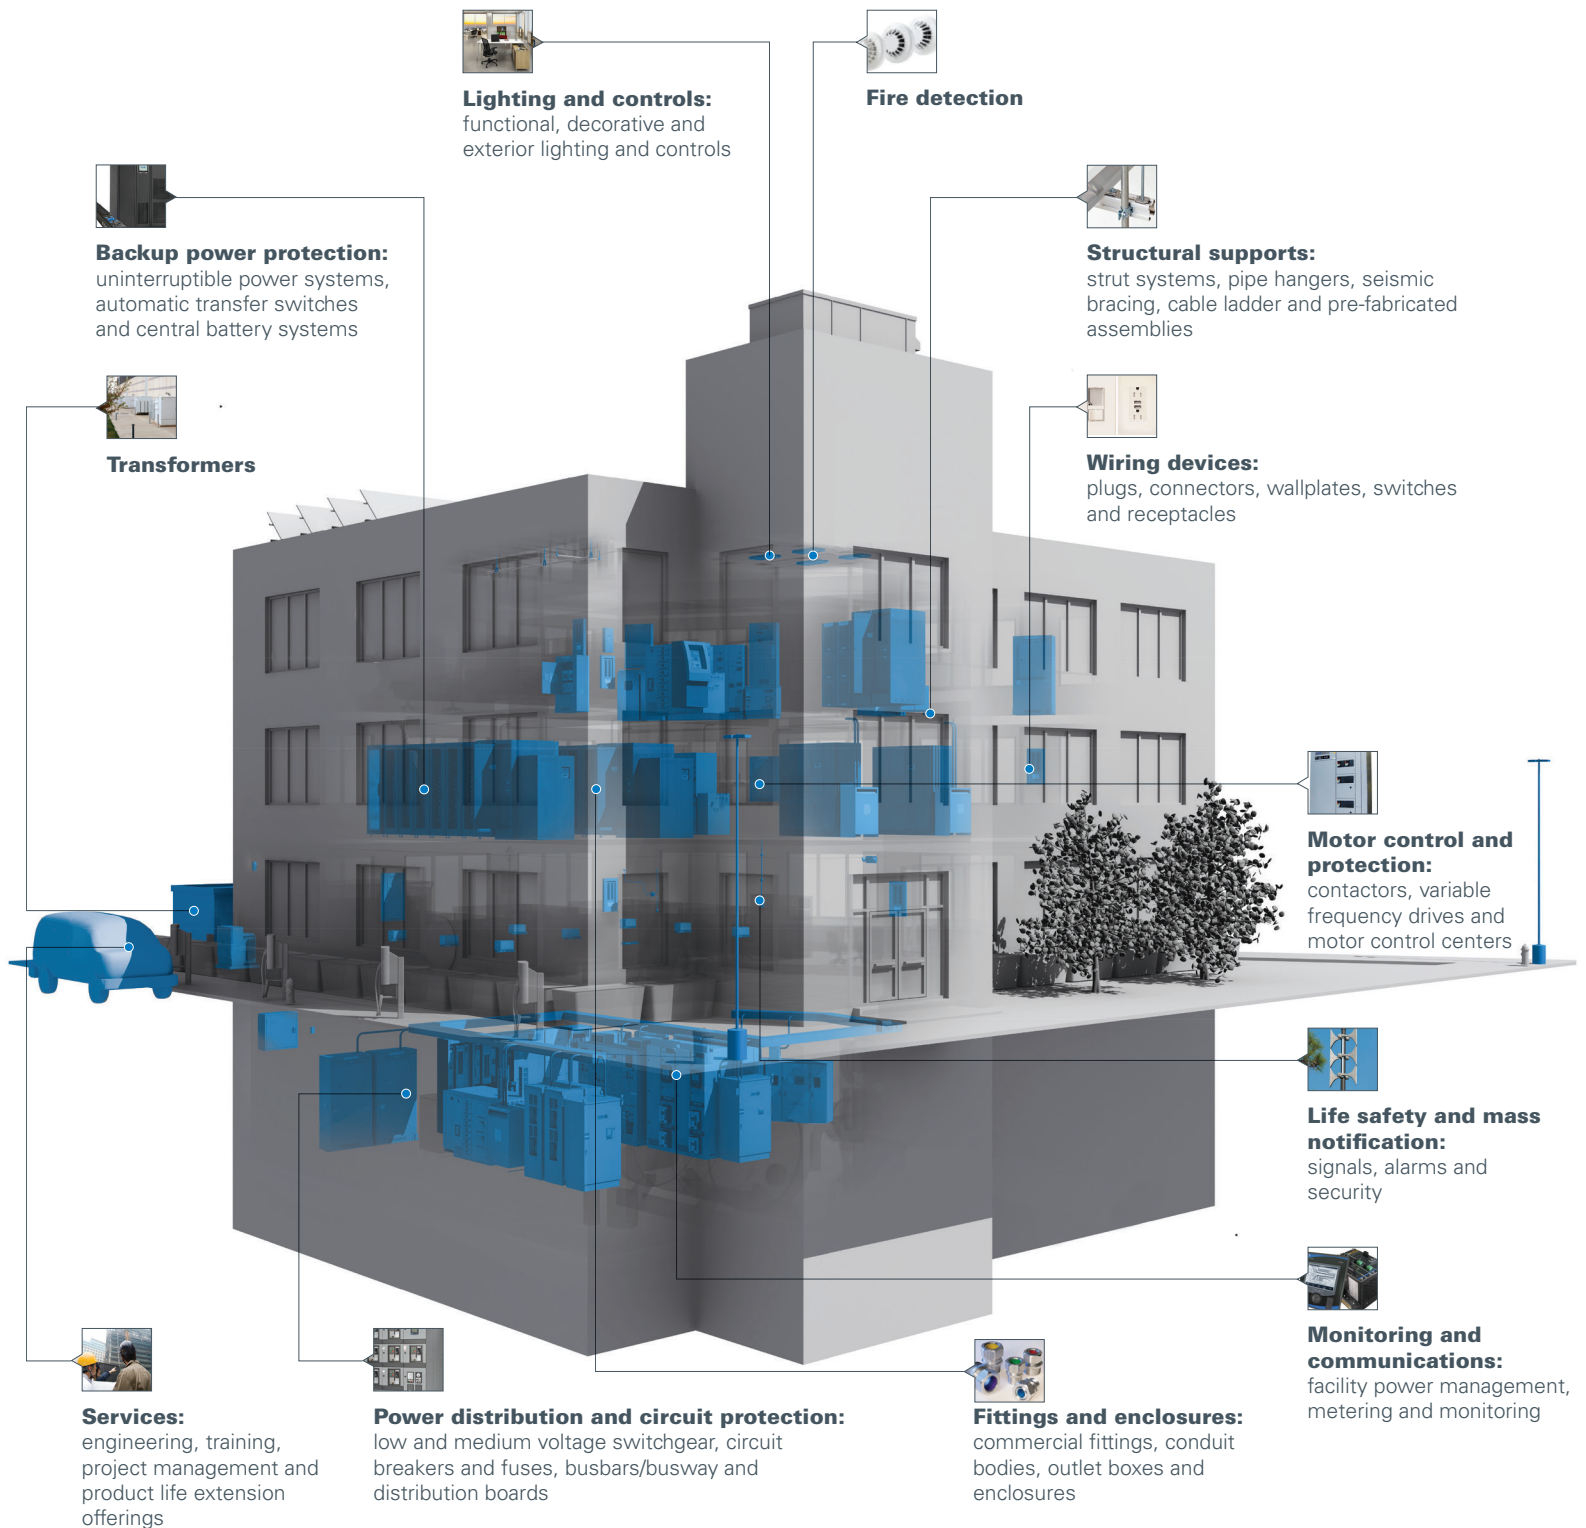

Design and build for resiliency and sustainability

Your building is often your most important asset. At Eaton, we focus on protecting the future value of this vital investment by making sure your building reflects your brand. Our energy efficient products help lower operating costs and reduce your carbon footprint, while custom design solutions help you achieve your vision. Work with Eaton for flexibility of design for future needs and regulations, plus innovative, forward-thinking technologies for maximum functionality, productivity and optimal use of your building space.

Lower risk with on-time project execution and expertise

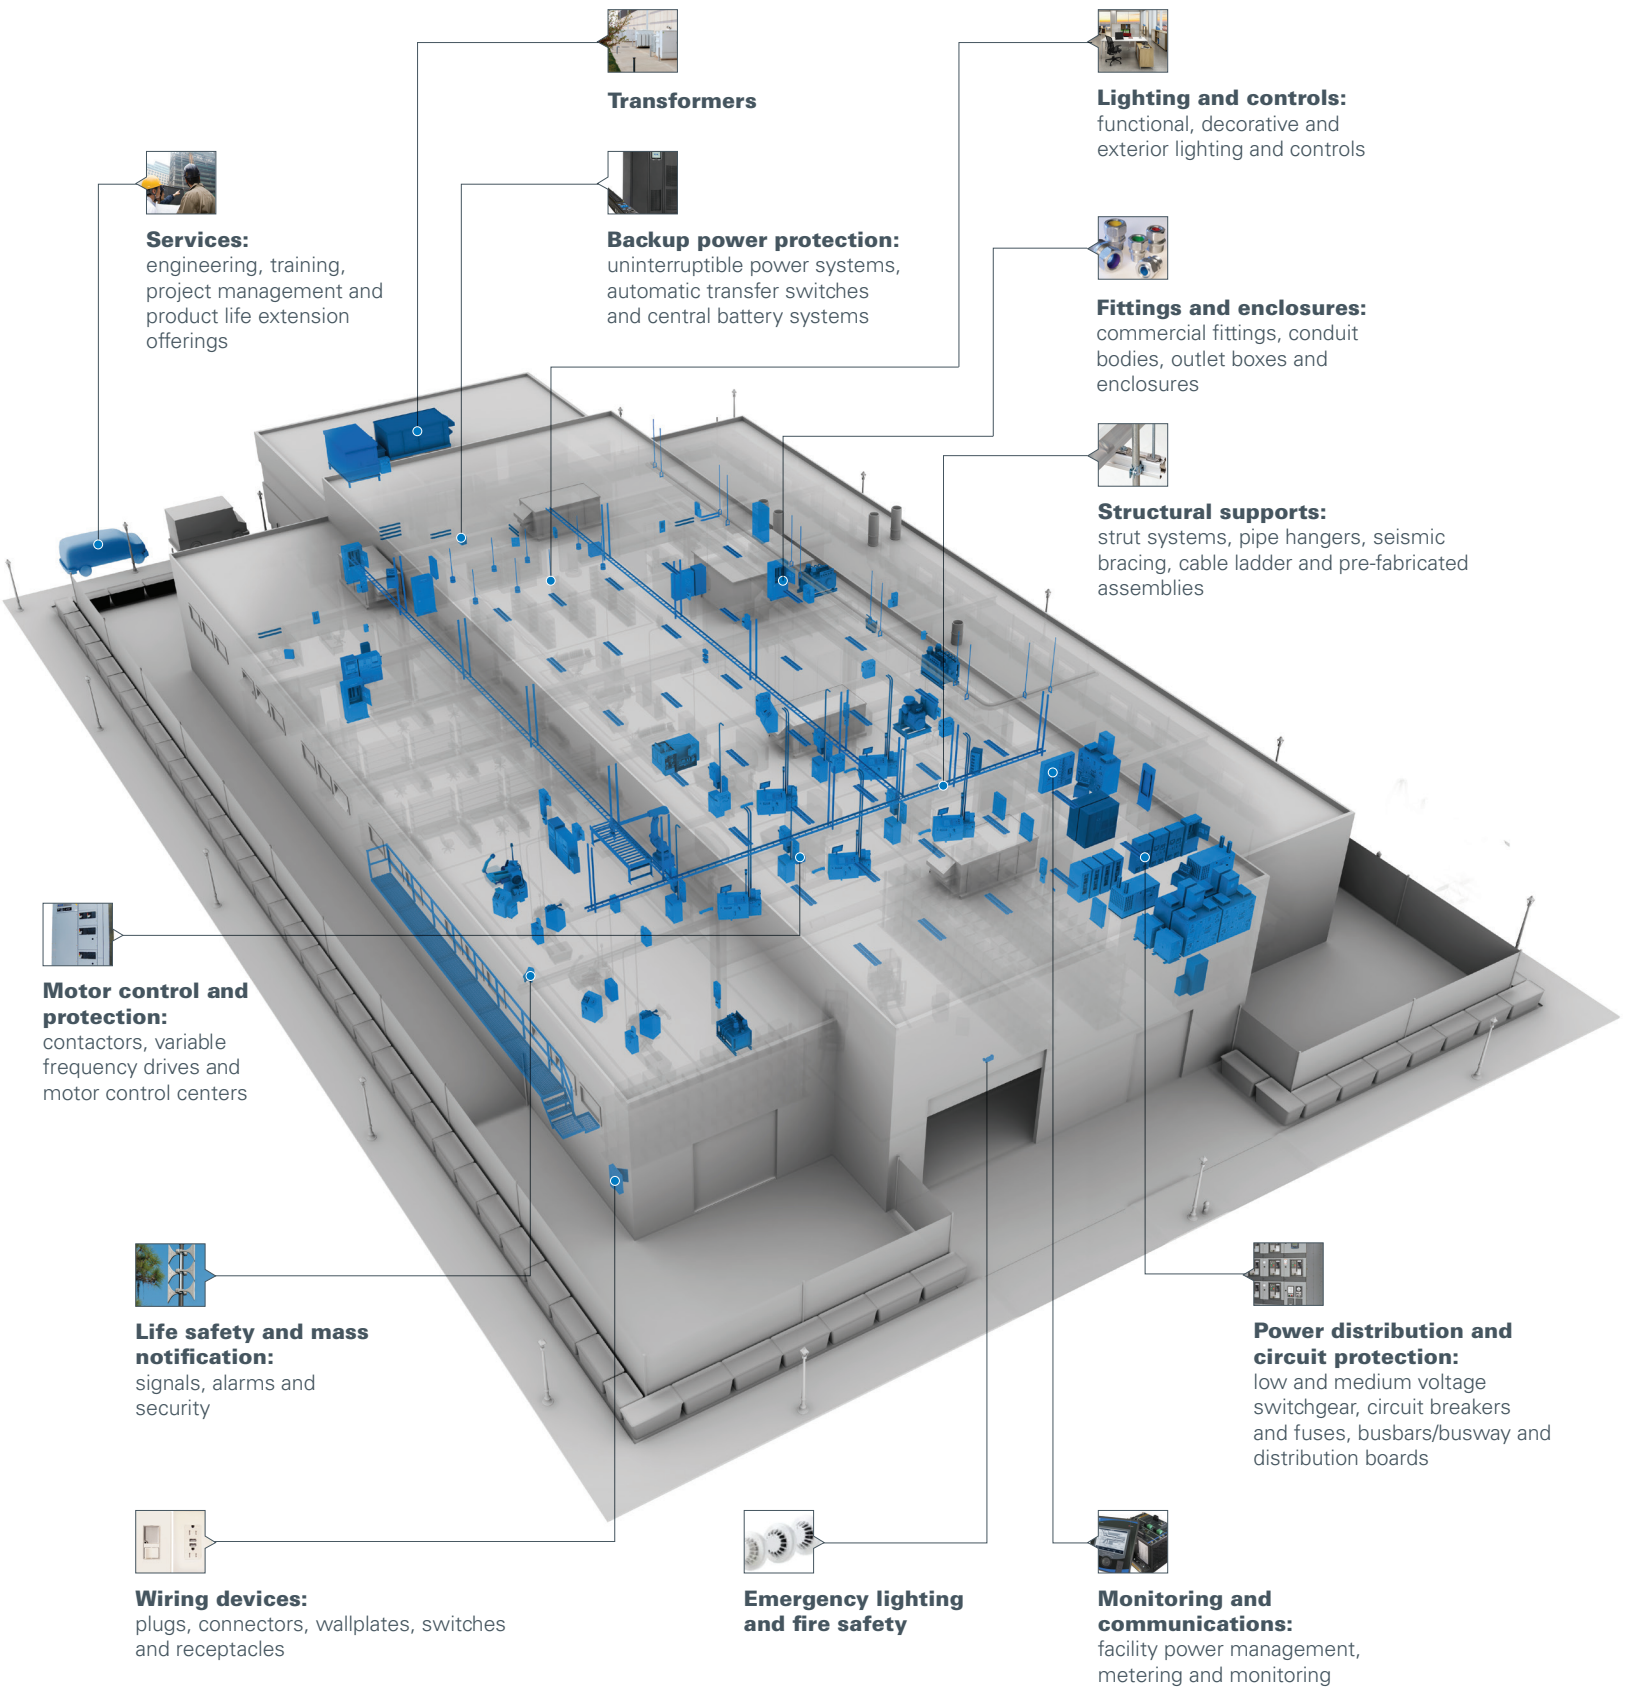

Reducing risk in the construction and commissioning of your building allows you to focus on customers and building your business. So at Eaton, we are always looking to mitigate small risks before they become big threats. Leverage our expertise as you construct or refurbish your building, and rely on our satellite and service centers to provide local stock. We also offer access to an extensive network of channel partners with the materials and equipment you need, when you need it. Our offering includes products designed for labor-saving installation, local project management and pre- and post-sale service and support. At Eaton, we always lead with the latest technologies to push beyond today and ensure you reduce risk tomorrow.

Powering buildings to be more functional, efficient and safe.

Commercial

Protect your people and reputation by increasing operational efficiencies, reducing energy usage and designing for functionality, well-being and productivity.

Industrial

Be more productive by maximizing the functional use of the space, while increasing energy efficiency and managing operational risk.

With over 100 years serving the building industry, we understand the challenges you face every day.

Education

Build a cohesive system that is connected and integrated, maximizing usable space, improving student and teacher productivity and maintaining their safety.

Retail

Create an aesthetically inviting space that enhances the visitor experience, while remaining flexible for changing layout needs.

Stadiums

Design and build the best-in-class facility that showcases your brand and keeps people safe in an unfamiliar environment.

Healthcare

Safeguard critical power systems and data for continuous operations, and ensure the comfort and safety of patients, visitors and staff.

Hospitality and leisure facilities

Ensure a great visitor experience through an aesthetically pleasing environment, while maintaining a round-the-clock, cost-effective operation that reduces energy costs and meets regulatory requirements.

Industrial and warehouses

Maximize the functional use of the space to increase productivity and manage operational risk, while achieving greater energy efficiency.

Commercial office and mixed-use buildings

Keep your people and reputation well protected with a design that emphasizes functionality, well-being and productivity, achieves more efficient operations and reduces your overall energy consumption.

Airports, rail and infrastructure facilities

Reduce downtime, increase availability and enhance safety and security to drive profitability, while meeting customer expectations and government regulations.

Eaton's broad portfolio works to optimize your building infrastructure, the foundation of your business.

Discover how Eaton can help solve your power management challenges.

Bringing your business a new dimension of expertise, customized innovative solutions and uninterrupted operations.
