

**WASTING TIME
AND MONEY
SOURCING
PRODUCTS?**

Let us help with Product Plus

MANAGING MULTIPLE SUPPLIERS CAN BE A HEADACHE, RIGHT?

All that time wasted sourcing the right product, negotiating the right price, plus additional admin and costs involved with managing multiple suppliers takes you away from your priority tasks – frustrating!

01

FRAGMENTED SUPPLY BASE

Multiple calls to multiple suppliers to track down the products you need means wasted time and diluted buying power.

02

RANDOM NEGOTIATING

How can you achieve the best prices with numerous stakeholders across the business, all with individual supplier relationships? You need more control.

03

SEARCHING AND SOURCING

Looking for that product often means searching through endless websites – costing you valuable time.

04

SPOT BUYING

Need a one-off purchase? An emergency buy? They're just not cost effective.
