Technology never stands still, infact it's moving at its quickest pace in nearly a century

With the development and evolution of medical devices, contact-free solutions, communications, EVs, wireless connectivity, cloud-based tools, IoT - to name a few! All products and innovations improving our lives and the way we do business.

We too know a thing or two about electronics and have been proud to support our ever-growing electronics community for over 80 years. As your partner, we'll help you source the products, design tools and solutions to get the job done - with access to over 700 electronics manufacturers and 250,000 electronic products, all in one place.

This brochure highlights just a selection of our range of electronic components, development and prototyping tools from many trusted brands such as TE Connectivity, Amphenol, Molex, Infineon, ST, Microchip, Renesas, ams OSRAM, SEGGER, Würth Elektronik and ebm-papst.

And why not take a look at our DesignSpark community, which connects over a million like-minded engineers from all walks of life, using our design resources to improve productivity and innovate responsibly. You'll find plenty to give you inspiration including programming software, CAD libraries and tech updates to help fire up the ordinary and ignite the extraordinary.

We're confident you'll find everything you need when it comes to electronics - we're here to support you.

ROCK

Exclusively curated for engineers and professionals at the forefront of technology. Unleash the true power of computing with ROCK SBCs. Crafted with meticulous attention to detail, ROCK's Single Board Computers (SBCs) are tailored to meet the demands of discerning engineers and professionals. Discover unparalleled performance, enhanced connectivity, and robust multimedia capabilities, making ROCK the ideal choice for advanced industrial applications, edge computing projects, and high-complexity automation systems. Elevate your engineering endeavors and stay ahead in your field with ROCK's exceptional SBC solutions, setting new standards for efficiency and innovation.

RS

ROCK 5A

- Introducing the latest addition to our nextgen ROCK 5 series, the OKdo ROCK 5A Model A 16GB Single Board Computer.
- Powered by the reliable Rockchip RK3588S SoC, this SBC offers exceptional performance for a wide range of projects.
- The octa-core processor features a quad Cortex A76 @ 2.2~2.4GHz and a quad Cortex A55 @ 1.8GHz CPU, along with an Arm Mali™ G610MC4 GPU, providing reliable processing power.

257-3562 8 GB 256-3914 16 GB

ROCK 4C+

 A powerful and feature-packed SBC built around the formidable Rockchip RK3399-T SoC. Arm® big.LITTLE[™] dual Arm Cortex® A72, quad Cortex-A53 CPU, & Arm Mali[™] T860MP4 GPU.
 4GB 64-bit RAM & an eMMC socket, it ensures efficient data handling. Power on/off button, external antenna, & audio jack for enhanced usability. Dual micro-HDMI up to 4Kp60 resolution, Bluetooth 5.0, Gigabit Ethernet, & Wireless LAN.

249-3158	ROCK 4 Model C+ 4GB SBC only	
250-2784	ROCK 4 Model C+ 4GB SBC only, 100 pack	RS114CP-D4-BULK
230-6199	Starter kit includes: ROCK 4 Model C+ 4GB single board computer, 5V/3A Universal Power supply, USB to USB-C cable with in-line switch, 2 x 1M Micro HDMI to HDMI cables, 32GB MicroSD Card. (with preloaded Linux OS), MicroSD card to USB reader, CPU heat sink and fan, Metal enclosure, Mini screwdriver.	ROCK4C+ Starter Kit

ROCK 4SE

8GB

- Powered by the high-performing Rockchip RK3399-T processor, featuring big.LITTLE[™] Arm® Dual Cortex-A72® CPU, Quadcore Cortex-A53, and Arm Mali[™] - T860MP4 GPU.
- 4GB 64bit LPDDR4 RAM and expandable with an eMMC module or SSD through an m.2 connector.
- Boasting onboard RTC, WiFi, Bluetooth, Audio jack (headphone and headset), and a 4K HDMI port for seamless connectivity experiences.

220-9536 4 GB

ROCK 3A

 The ROCK 3A is packed with features. including Quad core Armv8.2-A Cortex®-A55 CPU, Arm Mali[™] G52 GPU, HDMI 2.0 port supporting displays up to 4K@60pfs resolution, multiple connectivity and storage possibilities.

256-3910

ROCK 3C

- Reliable single board computer based on the powerful Rockchip RK3566 SoC in a compact form factor
- Delivers outstanding performance while leveraging outstanding mechanical compatibility, it benefits from a Quad core Armv8.2-A Cortex®-A55 CPU, Arm Mali™ G52 GPU, Wireless support including WiFi 5, HDMI 2.0 port supporting displays up to 4K@60pfs resolution, multiple connectivity and storage possibilities, and it's compatible with a wide range of software operating systems.
- •

249-3157

ROCK CM3

- System on Module (SoM) based on a powerful Rockchip RK3566 System on Chip (SoC), Quad-core Arm® Cortex®-A55 CPU and Arm Mali™-G52-2EE GPU. This CM3 is designed to increase the performance and capabilities of your design applications.
- With a 2GB LPDDR4 RAM, 16GB eMMC flash storage and wireless connectivity, including WiFi 5 and Bluetooth® 5.0, and many other class-leading features incorporated in this compact board of just 55mm x 40mm, the ROCK 3 Compute Module can be easily integrated into different industrial and multimedia projects.

249-3154 Compute Module (CM3) 2GB/16GB WIFI/BT

DEVELOPMENT TOOLS

STEVAL-STLKT01V1 SensorTile Temperature Development Kit

- Featuring a dedicated App, the kit is complemented by
- software, tools and a complete firmware library
- The SensorTile can fit easily into an IoT hub or sensor network
 It's small, square shape features powerful processing
- capabilities using an 80MHz STM32L476JGY microcontroller and low energy Bluetooth network processor
- SensorTile also features a
 large spectrum of motion and
- environmental MEMS sensors

125-3924 STEVAL-STLKT01V1

ZMOD4410 Indoor Air Quality Gas Sensor Module Evaluation Kit

- User-friendly EVK expedites configuration and evaluation
- of the ZMOD4410 Gas Sensor Module
- Supports different methods of operation, including Low Power and AI technology for improved ppm TVOC readings
- Operates with Renesas provided software; either with executable ZMOD4410 GUI or alternatively with firmware programming examples for Windows[®] and Linux[®]
- Additional pins to measure power consumption, supply voltage, and GPIO trigger for external device

208-7746 ZMOD4410-EVK-HC

MCP3564 ADC Evaluation Board V2 for PIC32 MCUs

- Provides a development platform for 32-bit PIC device based applications, using existing 100-pin PIC microcontroller Plug-in Module (PIM) systems that are compatible with the Explorer 16 and other high-pin count PIC32 devicebased demo boards
- Offers integrated features such as internal oscillator, temperature sensor and burnout sensor detection
- Fully configurable with
- Oversampling Ratio (OSR) from 32 to 98304 and gain from 1/3X to 64X
- Comes with a 20 MHz SPI-
- compatible serial interface

Digilent BASYS 3™ FQGA Development Board

 Comprehensive, ready-to-use digital circuit development platform based on the latest Artix-7 Field Programmable Gate Array (FPGA) from Xilinx

134-6451

Motor Control Evaluation System For Motor Control IC RAJ306010

- Easy to start the motor control evaluation with RAJ306010
- High expandability and operability by small
- board (approx B6 size: 148 x 125 mm) • Connectable to the external MOSFET board
- Various sample codes for
- the basic motor drive
- Desk Top Lab ICS tool support (ICS: PC tool for waveform display)

234-7911 RTK0EML2C0S01020BJ

AURIX™ TC275 ShieldBuddyTC375

- Fitted with AURIX[®] TC375 32-bit multicore processor on a board following the Arduino[®] standard making it compatible with many of the application shields that are available
- Direct USB debug interface
- Allows instant access for new and prospective AURIX users to hundreds of shields

213-3243 KITA2GTC375ARDSBTOB01

BeagleBone Black Rev C SBC

- Introducing the Rev C open-source development board, featuring a potent ARM Cortex-A8 and ARM Cortex-M3.
- Affordable, community-supported platform
- suits developers and hobbyists alike.
- Preloaded with Debian Linux, it enables quick booting in 10 seconds.
 Get started in just 5 minutes with a single USB cable, whether
- for standalone or embedded system projects.

STWIN SensorTile Wireless Industrial Node Development Kit

- The STEVAL-STWINKT1B SensorTile wireless industrial node is a development kit and reference design that simplifies prototyping and testing of advanced industrial IoT applications such as condition monitoring and predictive maintenance
 Multi-sensing wireless platform implementing vibration
- monitoring and ultrasound detection
- Updated version of STEVAL-STWINKT1, now including STSAFE-A110 populated, BlueNRG-M2S module and IMP23ABSU MEMS microphone
- Built around STWIN core system board with processing, sensing, connectivity and expansion capabilities
- Ultra-low-power ARM Cortex-M4 MCU at 120 MHz with FPU, 2048 kbytes Flash memory (STM32L4R9)

201-0404	IIS3DWBTR
210-2301	STEVAL-STWINKT1B

DEVELOPMENT TOOLS

Coral M.2 Accelerator with Dual Edge TPU

- M.2 module (E-key) that includes two Edge TPU ML accelerators, each with their own PCIe Gen2 x1 interface. The Edge TPU is a small ASIC designed by Google that accelerates Tensor Flow Lite models in a power efficient manner
- Integrated power management Include two Google Edge
- TPU ML accelerators • Its operating temperature
- range is from -40 to +85°C

Coral

213-3255 8 bit Module

- This sample kit offers 24 different radial MLCC capacitors that differ in dielectric, capacitance value and voltage, with 10 of each variety supplied
- AEC-Q200 qualified (PPAP available)
- High reliability, high performance
- Radial mounting style
- Designed for application in the most extreme operating conditions
- Unmatched maximum operating temperature of +175°C for ceramic dielectrics

JG73P Endured Pulse Power Flat Chip Resistors

- Superior to RK73 series chip resistors in pulse
- withstanding voltage and high power • Resistance tolerance is available from ±0.5%
- Suitable for both reflow and flow soldering
- Products with lead free termination meet EU-Rolrequirements AEC-Q200 Tested

EMI Suppression Axial Ferrite Bead Kit

- WE-CBF HF series is available in 3 types
- Modified internal layout increases the effective suppression range
- The impedance at 1GHz is at least 3 times
- higher than WE-CBF product family • Operating temperature:
- -55°C to +125°C
- Ideal for suppression in signal lines in the high frequency range e.g. fast data lines in CPU, high speed bus systems and HDD

DEVELOPMENT TOOLS

Nordic NRF52840 System on Chip, Dongle and Development Kit

- The nRF52840 is fully multiprotocol capable with full protocol concurrency.
- It has protocol support for Bluetooth LE, Bluetooth mesh, Thread,
- Zigbee, 802.15.4, ANT and 2.4 GHz proprietary stacks.
- The nRF52840 is built around the 32-bit ARM[®] Cortex[™]-M4
- CPU with floating point unit running at 64 MHz.
- It has NFC-A Tag for use in simplified pairing and payment solutions.

Lattice USB Flywire Cable

- Support for all Lattice programmable products
- 1.2 V to 3.3 V programming (HW-USBN-2B)
- 1.2 V to 5 V programming (All other cables)
- Ideal for design prototyping and debugging
- Connect to multiple PC interfaces
- USB (v.1.0, v.2.0)
- PC Parallel Port Easy-to-use programming connectors
- Versatile flywire, 2 x 5 (.100") or 1 x 8 (.100") connectors
- 6 feet (2 meters) or more of programming cable length (PC to DUT)

863-3526 HW-USBN-2B

Broadcom Spectrometers

- · The matchbox sized spectrometers are designed for industrial integration, performing measurements between 190 nm and 1700 nm.
- High optical performance in a rugged housing offers reliable measurement in industrial surroundings
- Sophisticated electronics, with USB, SPI and UART as serial interfaces
- Free Software and SDK ensure fast response times for real-time analytics Applications include: Process Control and Monitoring, Material and
- Polymer Analysis, Color Measurements, Environmental Monitoring
- · Authentication and Anti-Counterfeiting, Light Measurements, Quality Control and Water Quality Analysis

- I-Link an unbeatable choice. SEGGER 131-1319 8.08.00 J-LINK BASE 8.08.28 J-Link PLUS 8.12.00 J-Link PRO 8.16.28 J-Link ULTRA+

DEVELOPMENT TOOLS

USB Debug Adapter For C8051FXXX MCU

- The 8-bit USB Debug Adapter (UDA) provides the interface between the PC's USB port and the Silicon Labs 8-bit
- target device's in-system debug/ programming circuitry.
- The 10-pin ribbon cable connects the adapter to the target board and the target device's debug interface.

Intel FPGA Download Cable

• The Intel[®] FPGA Download Cable interfaces a USB port on a host computer to an FPGA mounted on a printed circuit board. The cable sends configuration data from the host computer to a standard 10-pin header connected to the FPGA. You can use the Intel FPGA Download Cable to iteratively download configuration data to a system during prototyping or to program data into the system during production.

690-4093 PL-USB-BLASTER-RCN

Microchip PIC18-Q41 MCU

- PIC18-Q41 is a compact, high performance PIC18 product family with advanced analog peripherals for sensor and real-time control applications .
- The products are equipped with an on-chip operational amplifier, 12-bit ADC with Computation and two 8-bit DACs for improved data acquisition and sensor interfacing capabilities.
- Other key features include 16-bit PWMs, Direct Memory Access, Configurable Logic Cells and multiple communication interfaces.

SRAM

- SRAM stands for Static Random Access Memory and is a type of semiconductor memory that uses bistable latching circuitry (flip-flop) to store each bit.
- It holds data bits in its memory so long as power is being supplied. It cannot hold data if power is removed. SRAM is used where speed or low power are needed.
- It's higher density than DRAM, and less complicated structure makes it ideal to use in semiconductor memory scenarios where high capacity memory is used as seen in the

working memory within computers.

770-9476 MCP16301T-I/CHY

CAN Transceiver

- A high-speed CAN transceiver, fault-tolerant device that serves as the interface between a CAN protocol controller and the physical bus.
- The MCP2551 provides differential transmit and receive capability for the CAN protocol controller and is fully compatible with the ISO-11898 standard, including 24V requirements. It will operate at speeds of up to 1 Mb/s.

738-6036 MCP2551-I/SN

High Accuracy Low-Power Linear Active Thermistor IC

- Linear Active Thermistor ICs are sensors whose output voltage is directly proportional to measured temperature.
- The MCP9700B can accurately measure temperature from -40°C to +150°C.
- The output of the MCP9700B is calibrated to a slope of 10mV/°C and has a DC offset of 500mV.

USB to Serial UART Interface

- The FT232RN is a USB to serial UART interface with the following
- advanced features:
- Single chip USB to asynchronous serial data transfer interface.
- Entire USB protocol handled on the chip. No USB specific firmware programming required.
- Fully integrated 1024-bit EEPROM storing device descriptors and CBUS I/O configuration.
- Fully integrated USB termination resistors

Bridge Rectifier

- Universal 3 way terminals: push-on, wrap around or solder
- High thermal conductivity package, electrically insulated case
- Center hole fixing
- Excellent power/volume ratio
- For use in general purpose and instrumentation applications

DISCRETES

PROFET[™] Power Switches

- PROFET[™] protected MOSFET is Infineon's solution for power
- switch ICs, suitable for automotive and industrial applications
- Intelligent power switches consisting of a DMOS power transistor
- and CMOS logic circuitry for complete built-in protection
- The PROFET[™] series offer protection against overload, overvoltage, short-circuit, excessive temperature, ground and power supply loss

Stud Rectifier Diode

- · High surge current capability
- Wide current range
- · Applications include battery chargers, converters and power supplies

- Excellent clamping capability
- · Very fast response time
- Low incremental surge resistance
- AEC-Q101 gualified
- · Wide range of uses including industrial, automotive, and telecommunication.

Broadcom Silicon Photo Multiplier (SiPM) Arrays

- Broadcom Silicon Photomultiplier (SiPM) arrays are used for ultra-sensitive precision measurements of single photons.
- Based on NUV-MT technology, these SiPM arrays combine improved photodetection efficiency (PDE) with decreased dark count rate and reduced crosstalk
- Larger areas can be covered by tiling multiple arrays
 The clear epoxy mold compound (EMC) is highly transparent down to UV wavelengths. Giving a broad response in the visible light spectrum with high sensitivity toward blue and the near-UV region
- The array is best suited for the detection of low-level pulsed light sources, especially for detection of Cherenkov or scintillation light from the most common organic (plastic) and inorganic scintillator materials — LSO, LYSO, BGO, NaI, CsI, BaF and LaBr as examples.

200-9547 SLI-2000 Liquid Flow Meter

Sensirion SHT85 Temperature & Humidity Sensor

- The SHT85 digital humidity sensor is Sensirion's best-in-class humidity sensor with a pin-type connector for easy integration and replacement.
- The unique package design allows for the best possible thermal coupling to the environment and decoupling from potential heat sources on the main board.
- The SHT85 features a PTFE membrane dedicated to protecting the sensor opening from liquids and dust according to IP67 without affecting the response time of the RH signal.
- Humidity
- Typ. relative humidity accuracy 1.5%RH
- Operating relative humidity range 0 100%RH
- Response time (τ63%) 8s
- Factory calibration
- Temperature
- Typ. temperature accuracy 0.1°C
- Operating temperature range -40 125°C
- Response time (τ63%) 5s

SENSIRION

182-6530 SHT85

TE Inclinometers

- The DOG2 MEMS-Series inclinometer dual axis is mainly developed with focus on platform leveling, dynamic engine management,
- tip-over protection and tilt alarm. A fast response time and good accuracy makes this device the ideal choice for mobile leveling applications.
- It features digital signal processing including temperature compensation. The integrated filter improves performance and allows using the sensor in many noisy environments (e.g. vibrations).

TE Altimeter Pressure Sensors

- High resolution altimeter sensors from TE Connectivity
- Fast conversion down to 1 ms
- Low power, 1 μ A (standby < 0.15 μ A)
- Integrated digital pressure sensor (24 bit $\Delta\Sigma$ ADC)

MS5803-02BA 2BAR White Gel

MS5805-01BA 5BAR White Gel

No external components (Internal oscillator)

· Hermetically sealable for outdoor devices

- Supply voltage 1.8 to 3.6 V
- I2C and SPI interface (Mode 0, 3)

Excellent long term stability

893-7228

893-7219

TE Lighting Photocell Sensor

 Lighting Photocell Sensor - Lumawise ALR AA 2000EL Button Photocell, a photocontrol solution for multiple luminaire form factors. Designed to be hardwired internally. Polycarboate lens gives a discrete appearance but tough construction. Applications include Commercial, Industrial, Decorative, Street,& Area lighting, Signage and Flood lighting. Standalone device with in built delay prevents false switching due to light pollution. Meets UL773A requirements, with 10 year life or 20k switching cycles.

Wurth Elektronik WSEN-PDUS Differential Pressure Sensor

- MEMS based piezo-resistive sensing principle offering
- very high accuracy (up to $\pm 0.25\%$ FSS tolerance)
- Different transfer functions from ±0.1 kPa to 1 MPa
- 15 bit digital & 11 bit analogue pressure output resolution
- With embedded temperature sensor, plus analogue
- & I²C digital communication interface • Temperature range: -25°C up to +85°C

SENSING/ WIRELESS COMMS

Siretta 5G. NB-loT Antenna

- The Oscar 40 is a great antenna solution covering many popular frequencies in use todav
- Its radome is UV and water resistant making it a great outdoor antenna. • Suitable for discreet omni antenna applications, where a longer one is
- undesirable, the antenna out-performs many of the larger variants. • It is fitted with an aluminium bracket for wall mounting and supplied with a clamp for fitting to a standard mast.
- Supplied as standard with an SMA male connector and 5m or 10m of cable.
- Supports 5G NR / 4G LTE / 3G UMTS / 2G Quad-band GSM
- Supports Dual band WiFi 2.4G & 5G
- Supports Bluetooth / Zigbee / IEEE 802.15.4 / ISM 2.4GHz / ISM 5.8 GHz
- Supports LoRa / Sigfox / IMT 868 MHz / ISM 915 MHz
- Compact size
- Wall or pole mount
- RFID, ISM, WiFi bridging
- Public wireless systems
- · Covers cellular/PCS (US and worldwide)

CYBLE-01201x-x0 EZ-BLE Bluetooth Module

- · Contains all the necessary components to add low-power Bluetooth BLE wireless connectivity to a project design
- Royalty-free BLE stack compatible with the Bluetooth 4.1 standard • Two versions are available: one fully qualified and
- certified and an uncertified module without a screening can for initial lab development only
- PSoC Creator[®] provides an integrated design environment (IDE) to configure, develop, program and test a BLE application

LCD Colour Displays - Touch screen

- LCD colour displays are flat panel displays that you find on your computer or mobile phone that use liquid crystals to switch pixels on and off to produce a specific colour.
- A popular type of LCD display is the TFT LCD display module or TFT panel that uses TFT (Thin-Film Transistor) technology.

- The separated red power line is already connected with a

jump wire.

189-2277 SAD-101

LCD Monochrome Displays

- · LCD monochrome displays are flat-
- panel displays used in electronic circuits. • They use the light-modulating properties of liquid crystals to display black and white images, such as preset words, digits and displays, as found for instance on a digital clock or calculator.

Touch Screen Overlays

• A touch screen sensor is the part of a touch screen device that takes an input from the display screen and translates it into a suitable output action.

- Touch screen sensors are layered on top of electronic visual displays and allow direct interaction with the information shown there.
- · Some touch screens require special equipment, such as a stylus, while most can be operated using your fingers.

Automatic Wire Stripper

Stainless Steel Tweezer Set

• Anti-acid and anti-magnetic

· Designed for intricate work in the electronics industry

- Self-adjusting wire stripper with hardened steel blades and integral wire cutter (for single wires)
- · Stripping length adjustment to suit application
- Stripping range 0.2-6mm

PRO

Electronics for every technological and industrial sector.

RS PRO offers a wide range of high-quality electronics components to meet your needs. From Industrial Connectors and Passives, all the way to our newest Test & Measurement equipment.

Essential engineering packages with software, tools and resources designed specifically for you.

ENGINEERING REDEFINED, TOMORROW REIMAGINED.

CREATOR

DesignSpark Creator is where the imagination soars, where inspiration meets innovation. Where you can defy limits, every design, every day.

Discover the power of symmetry with our Mirror tool, and ignite your PCB design journey with our integrated SnapEDA library.

Could you be a DesignSpark Creator?

ENGINEER

Engineer is where concepts turn to masterpieces, you're engineering a future that defies the ordinary and embraces the extraordinary.

Unlock all the perks of the Creator package and gain extra features like blind and buried vias, hierarchical schematic designs, differential pairs and much more to help you scale for production.

Do you dare to Engineer?

CIRCUIT SIMULATOR

Test circuits as you build them with DS Circuit Simulator, a cloud-based design, modeling, simulation, and analysis environment. Creator and Engineer subscribers benefit from more time in the simulator, fine-tuning and testing for longer.

- 60min of simulation time
- Analog, digital, mixed-signal and multi-domain systems including electro-mechanical and electro-thermal.
- Unlimited public designs
- Engineer private groups for collaboration (DS invite only)
