- 
- A large indoor basketball court is the background of the advertisement. The court has a polished wooden floor that reflects the overhead lights. A basketball hoop and backboard are visible in the center of the court. In the background, a row of black folding chairs is set up. The walls are white with large windows, and the ceiling is high with exposed wooden beams. A thick green diagonal line runs across the image from the top left towards the bottom right.
- ▲ Slip resistant, durable & safe
  - ▲ Pre-assembled & dry-fitted prior to shipping
  - ▲ Easily & quickly installed
  - ▲ No load weight limitations
  - ▲ Available in six colors with our exclusive StoneCap™ coating
  - ▲ 100% recycled rubber, made in the USA
  - ▲ Assures access code compliance
  - ▲ Interior & exterior applications

# CourtEdge™

## REDUCERS

### PROBLEM:

New sport floors are often placed on top of existing floors, or a more robust floor is installed, creating vertical barriers. This gymnasium had a new basketball court installed which created a 2-1/2" rise around the whole court, which made it non-compliant, not to mention dangerous.

### SOLUTION:

SafePath's Reducer 1200's (2-1/2" high) were wrapped around the court, eliminating the barrier, creating a gradual rise and making it ADA compliant and ready to use!

*"The world's largest selection of recycled rubber transitions; each project is hand crafted and custom cut to fit."*

# CourtEdge™ Reducer Applications

## SCHOOLS & PARKS

Reducers surround a synthetic turf installed on top of an asphalt playground to create a football field.

## GYMNASIUMS

Reducers are used in doorways and to surround new and old flooring for compliance and accessibility.

## STADIUMS

Reducers are used to surround the fields, at doorways and other areas removing vertical barriers.
