TurfEdge™ Reducer Ramps

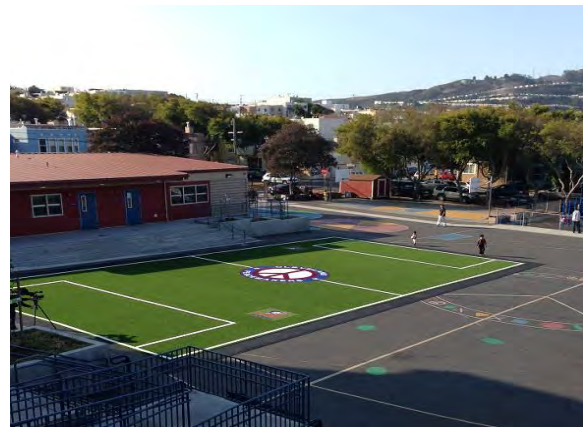

TurfEdge™ Reducer Ramps are designed to remove vertical barriers and “finish the edge” around synthetic turf fields which are in need of a smooth transition. Our **TurfEdge™ Reducers** are easily installed and can be cut-to-fit on site. **TurfEdge™ Reducers** do not have weight limitations, will not crack or freeze and never require the use of mechanical fasteners. Available in various heights, **TurfEdge™ Reducers** offer a safe edge for sporting activities and replaces asphalt and concrete curbs that can be dangerous and may result in injury.

Safety & Access - The only product prefabricated for the architectural, turf and flooring industry.

TurfEdge™ Reducers offer a multitude of design and height configurations for complying with ADA regulations and access code laws.

SafePath™ Products employs a design team of full service professionals to help create a complete solution for **TurfEdge™ Transitions** for your projects. Whether it is an inverted landing or a raised synthetic turf surface, **TurfEdge™ Reducers** offer safe, durable and aesthetically pleasing solutions for any turf field. Our design team carefully lays out each project according to the customer’s specifications before shipment, for error-free on site installation. **TurfEdge™ Reducers** are typically installed with high-grade silicone adhesive and are designed to be affixed to any type of flooring or ground surface.

SafePath™ Products are all manufactured out of recycled materials and Made in the USA!!!

TurfEdge™ Reducer Applications

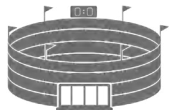

SCHOOLS & PARKS

Reducers surround a synthetic turf installed on top of an asphalt playground to create a football field.

GYMNASIUMS

Reducers are used in doorways and to surround new and old flooring for compliance and accessibility.

STADIUMS

Reducers are used to surround the fields, at doorways and other areas removing vertical barriers.
