WHO WE ARE

- One of the Northeast's top facilities and can accommodate even the most difficult event requests that come along! As a building, we pride ourselves on location, the space that we can offer, and the service that comes along with our departments.
 - For travel, the Albany International Airport (ALB), is serviced by most major carriers and provides daily non-stop flights to and from locations on the east coast and in the mid-west.
 - We are conveniently located off three major highways and are easily accessible from all points north, south, east, and west.
 - Amtrak Station located less than two miles from the Center which provides twelve daily trains to and from New York City, Buffalo, Boston, and Montreal.
 - Transportation and hotels are very accessible for out-of-towners in need of these services. In fact, there are bus routes that have pickups on the same block and there are local hotels as little as one block away.
 - The city of Albany, and especially the local officials, will be overly supportive in making your stay as convenient as possible!
- A multi-purpose facility, conveniently positioned at the crossroads of the northeast.**

ARENA FLOOR

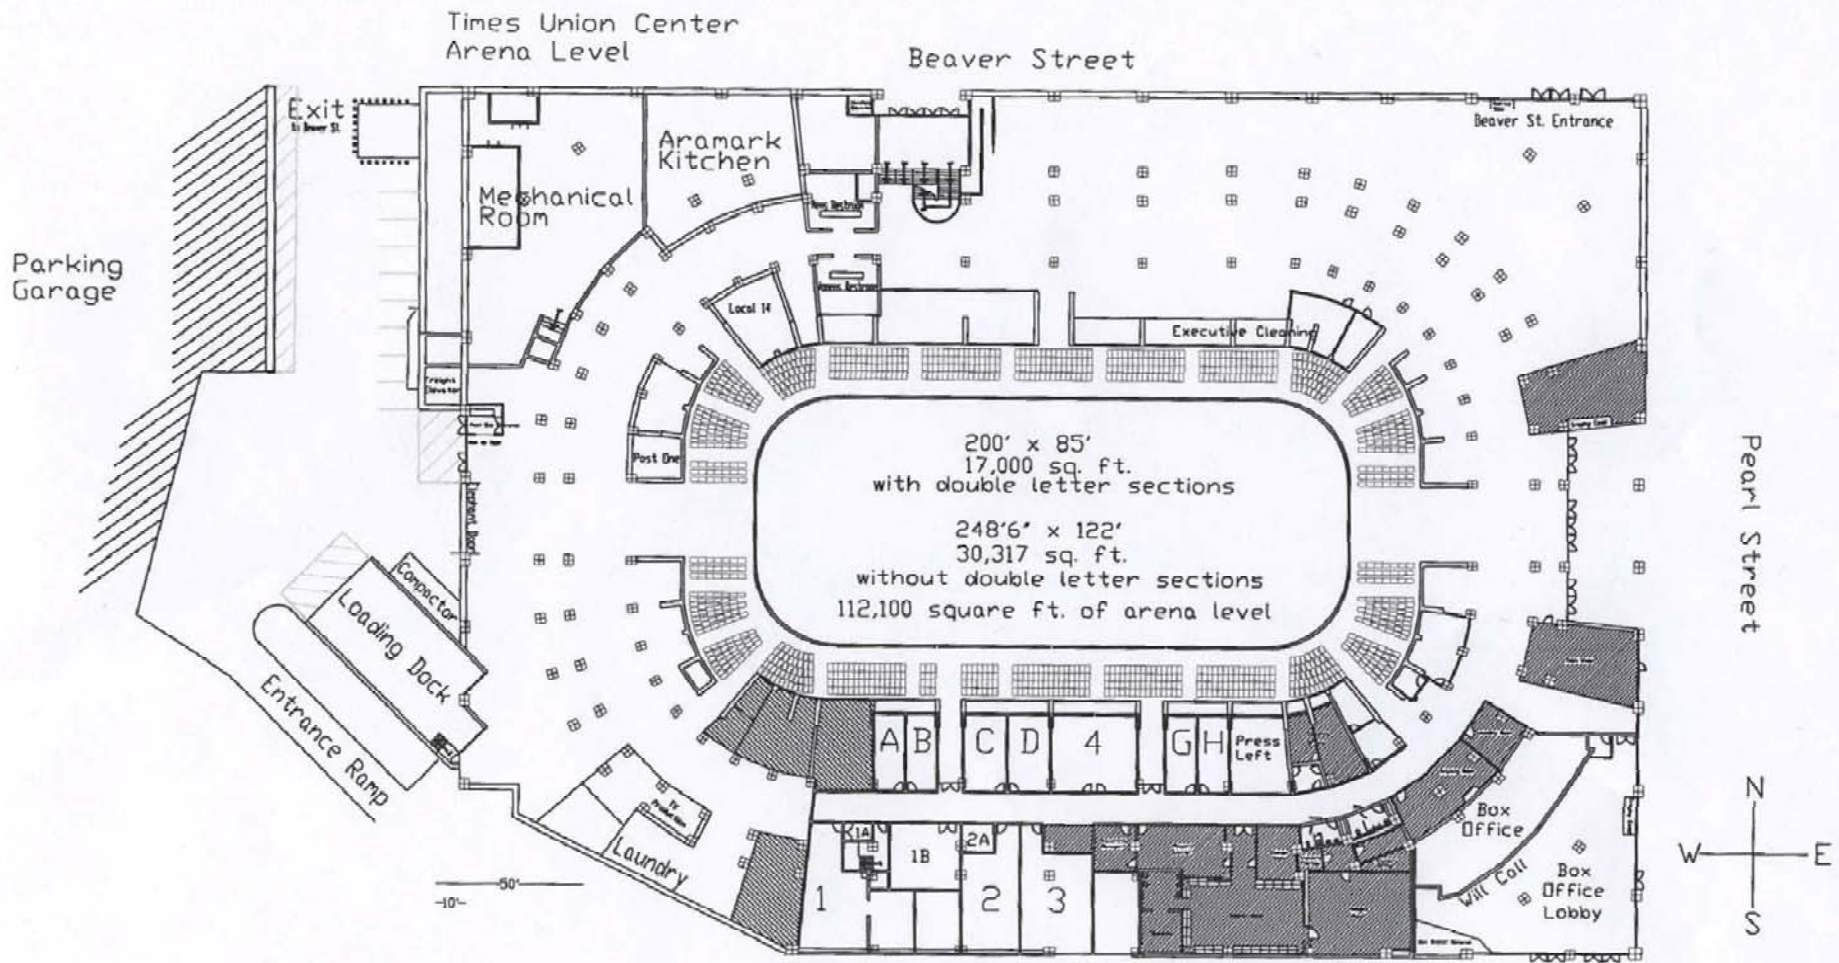

Floor Measurements:

- 236' long x 113' wide
(with telescopic seating pushed in)
- Approximately 27,000 sq. ft.

Ceiling Measurements:

- Low Steel – 78' from arena floor
 - High Steel - 114' from arena floor
-
- The amount of uninterrupted square footage that this space offers is ideal for any form of film or television production.
 - Areas can be curtained off for smaller-scene production or completely open to use the arena seating as a background setting.
 - With our lowest steel being close to 80' above the floor it allows production to utilize various lighting settings as needed.

EXHIBITION HALL

Floor Measurements:

- Approximately 21,000 sq. ft.

Ceiling Measurements:

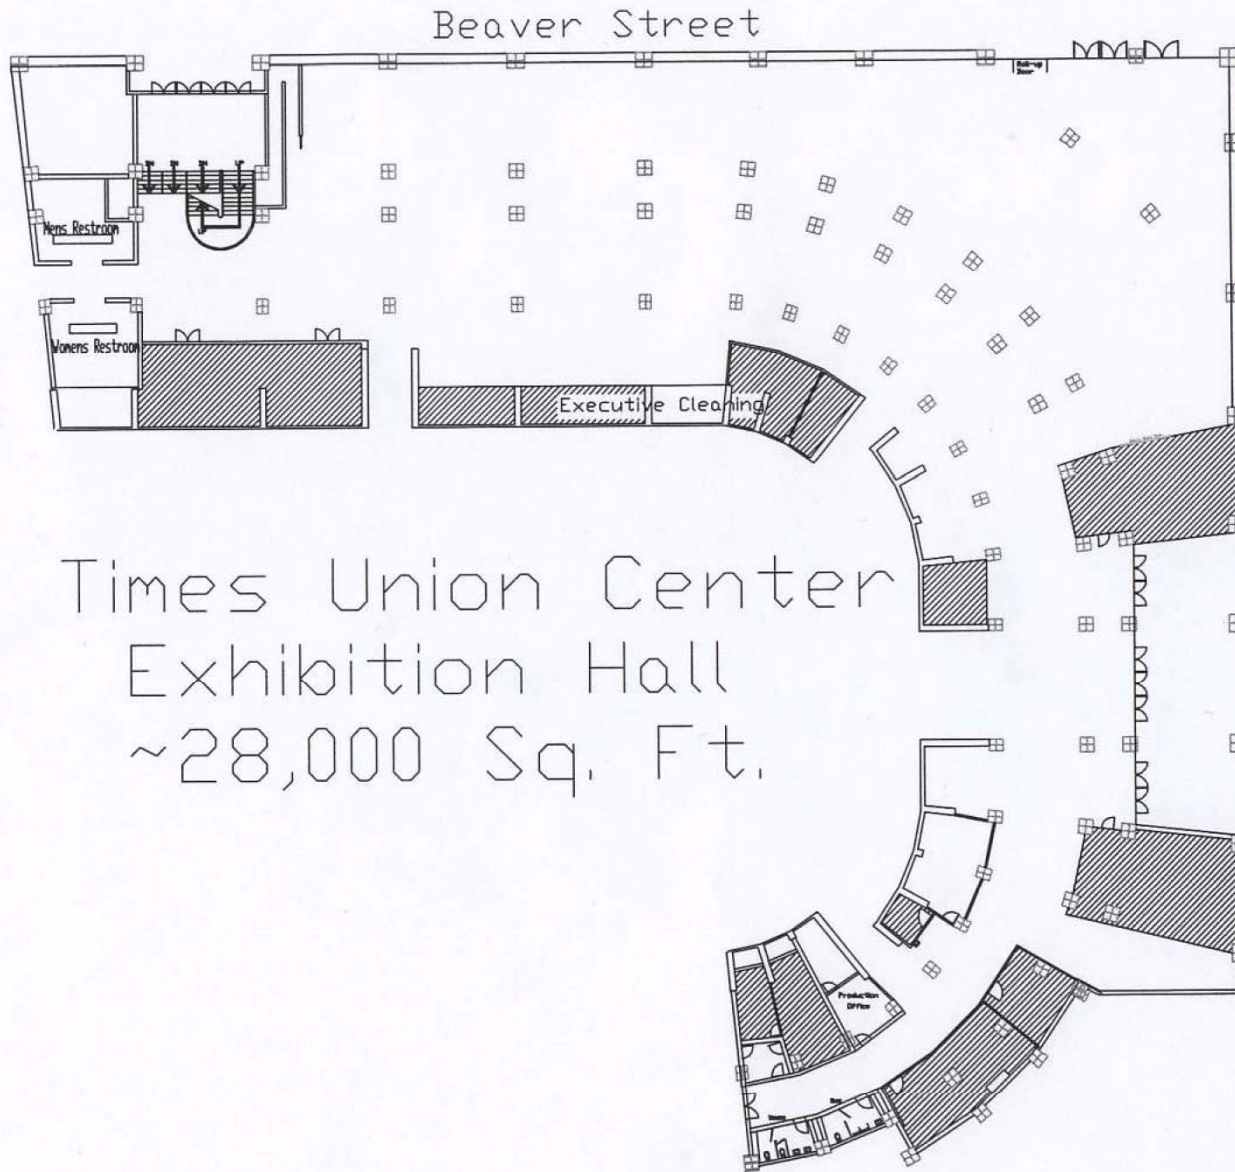

- Lowest– 12' from arena floor
- Highest - 30' from arena floor

This arena setting is ideal for smaller scene film and television production, catering, and/or storage. Areas can be curtained off for this smaller scene production or completely open to use the pillars and space as a background setting. By curtaining off, we can separate this area into “rooms” where you could have catering, storage, and production being utilized side by side by side.
