Discover Fire Arts Treasures of Yesterday and Today

Celebrating 150 Years of Glassmaking in Corning

TiffanyTreasuresTrail.com
The Tiffany & Treasures Trail is a self-guided adventure in the fire arts treasures of yesterday and today, right here in Corning and the Southern Finger Lakes. Sites include working potters, glass artists, museums, and buildings completely designed by Louis Comfort Tiffany. Shop, explore, create, and admire. Try the potter’s wheel or make your very own glass souvenir. Explore the Tiffany & Treasures Trail all at once or on several visits.

The Making of America’s Crystal City

In 1868, Brooklyn Flint Glass moved all its equipment up the Hudson River, along the Erie Canal, down Seneca Lake, and on the Chemung Canal all the way to Corning where it would eventually grow into the world leader in glass science and technology known today as Corning Incorporated. In addition to that extensive system of waterways connecting the Finger Lakes region to New York City and to the Atlantic Ocean, skilled labor and natural resources were also cheaper upstate at the time which made it appealing for a number of businesses. Over the years that followed the move by Brooklyn Flint Glass, a number of other glass companies sprung up in Corning, including several specializing in cut and engraved glass, transforming Corning from a lumber town into America’s Crystal City.

Master glass cutters like Thomas Hawkes—who won Grand Prize at the Paris Exhibition in 1889—made Corning their home. Born in Ireland, Hawkes immigrated to Brooklyn in 1862, then moved to Corning to work for the Hoare and Dailey Cut Glass Firm before opening his own cut glass firm in 1880 which quickly became famous for quality wares. Hawkes’ glassware was used in the White House from 1885 until 1938. In 1903, Hawkes brought gifted designer,
Frederick Carder, from England to establish the Steuben Glass Works which Carder managed until 1932. Though later it would gain world-wide acclaim for its exceptional colorless crystal, during Carder’s time Steuben achieved notoriety for its elegant colored glass. In 1932, when Steuben’s new president decided to concentrate on colorless glass, Carder left Steuben to become design director of Corning Glass Works. There he oversaw such large-scale projects as the making of cast panels for Rockefeller Center in New York City. As an octogenarian, he created smaller cast glass sculptures and other one-of-a-kind pieces. Carder’s glassmaking career ended in 1959, when, at the age of 96, he finally closed his studio and “retired.”

Over the past 150 years, since that small glass company moved here from Brooklyn it has been involved in everything glass—from signal lamps for railroads and lamps for automobiles, trains, ships, and lighthouses, to becoming the sole producer of glass envelopes for Thomas Edison’s light bulbs, while also finding its way into tableware, space shuttle windows, telescope mirrors, and other innovations like Pyrex, fiber optics, and Gorilla glass.

FREDERICK CARDER GALLERY
One Museum Way, Corning
(800) 732-6845

Adjacent to The Studio, the Frederick Carder Gallery features an extensive collection of glass designed by Frederick Carder (1863–1963), a gifted English designer who managed Steuben Glass Works from its founding in 1903 until 1932. During this time, the production of Steuben changed from various types of colored glass to colorless glass. Carder’s distinguished career in glassmaking extended from 1880 to the 1950s. The Carder Gallery displays his early pieces made at the English firm of Stevens & Williams, many of the objects he designed, as well as individual pieces he created in his retirement.
