

Panama City Beach CVB

2017 Travel Market Visitor Profile & Economic Impact Report

Prepared for:

- *Panama City Beach Convention & Visitors Bureau*
- *Bay County Tourist Development Council*

Study Conducted: December, 2016 – January, 2018

Presentation of Research & Findings – March 13, 2018

Presented by:

**Berkeley Young, President
Young Strategies, Inc.**

Prepared by:

**Larry D. Gustke, PhD
Steve Morse, PhD**

Trends and Data – Summary & Overview

- PCB is an extremely large, dynamic destination
- Year-end economic impact data is typically reported 9 -16 months after year-end close of books
- Fact – Tourist Development Tax Revenue
- Fact – STR hotel data
- Fact – VisaVue data from domestic travel expenditures in PCB
- Fact – Destimetrics/Inntopia & AirDNA data for Rentals market
- Survey – Young Strategies online surveys with visitors to PCB
- Survey – Young Strategies intercept interviews with visitors to PCB

PANAMA CITY BEACH 2017 ECONOMIC IMPACT FROM VISITORS

2016 Paid Rental Overnight Visitors

2017 Lodging Tax Revenue	2017 Lodging Revenue	Person Days/Nights	Average Spending Per Person/Per Day	Total Overnight Renter Spending
\$20,977,993	\$426,912,714	12,070,706	\$ 114.07	\$1,376,905,433

2017 Owner Occupied Rental Units

Rental Inventory (Rental Units only)	Owner Occupied Nights (9% occupancy)	Person Days/Nights (avg. party of 5)	Average Spending Per Person/Per Day	Total Overnight Rental Owner Spending
11,572	380,140	1,900,700	\$66.50	\$126,396,550

2017 Vacation Home Usage – non-resident owners who do not rent

Non-Rental Vacation Inventory (Units)	Owner Occupied Nights (38% occupancy)	Person Days/Nights (avg. party of 4)	Average Spending Per Person/Per Day	Total Vacation Owner Spending
5,217	723,597	2,894,392	\$66.50	\$192,477,068

2017 Visiting Friends & Relatives (VFR) - Staying With Year-Round Residents

Year-round Households in PCB (US Census)	Number of Houseguests (10 guests per house) (5.5 avg. length of stay)	Houseguests Person Days/Nights (avg. party of 4)	Average Spending Per Person/Per Day	Total VFR Spending
5,146	51,460	283,030	\$38.50	\$10,896,671

17,148,828 person days/nights

Total 2017 Overnight Visitor Spending in PCB \$1,706,675,722.

Day-Trippers –

- Day-trippers and other non-overnight visitors to PCB from outside of Bay County
- Estimated to account for 11.6% of the overall overnight visitor spending of \$1,706,675,722.
- **Therefore day-tripper spending totals \$197,974,384.**
- The majority of this day-trip spending in PCB is realized at large scale retail, unique PCB attractions, unique dining experiences, festivals/events and Northwest Florida Beaches International airport and rental car operations. The growth in large-scale retail and dining has increased the number of day-trippers that come into PCB for day-trips.

2016 Visitor Economic Impact

2017 Economic Indicator	Direct Impacts	Indirect Impacts	Induced Impacts	Total Impacts (Direct + Indirect + Induced)
Visitor Spending	\$1,904,650,106 (\$1.90 Billion)	\$431,488,958 (\$431.48 million)	\$540,244,176 (\$540.24 million)	\$2,876,363,240 (\$2.87 Billion)
Worker Incomes & Paychecks	\$1,038,180,153 (\$1.03 billion)	\$295,991,967 (\$295.91 million)	\$345,745,960 (\$345.74 million)	\$1,679,918,081 (\$1.67 Billion)
Employment / Jobs	33,978	4,658	5,663	44,299

DEFINITION OF DIRECT AND SECONDARY ECONOMIC EFFECTS

Economists distinguish direct, indirect and induced economic effects. The total economic impact of tourism is the sum of direct, indirect and induced effects within a region. Indirect and induced effects are sometimes collectively called secondary effects. These impacts or effects may be measured in terms of gross output, sales, income, employment, or value added. Although they are often used somewhat loosely by non-economists, these terms have precise definitions that are important when interpreting economic impact study results.

Direct effects are production changes associated with the immediate effects of changes in tourism expenditures. For example, an increase in the number of tourists staying overnight in hotels would directly increase room sales in the hotel sector. The additional hotel sales and associated changes in hotel payments for wages, salaries, taxes, supplies and services are direct effects of the tourist spending.

Indirect effects are the production changes resulting from various rounds of re-spending of the tourism industry's receipts in backward-linked industries (e.g. industries supplying products and services to hotels). Changes in sales, jobs and income in the linen supply industry, for example, represent indirect effects of changes in hotel sales. Businesses supplying products and services to the linen supply industry represent another round of indirect effects, eventually linking hotels by varying degrees to most other economic sectors in the region.

Induced effects are the changes in economic activity resulting from household spending of income earned directly or indirectly as a result of tourism spending. For example, hotel and linen supply employees, supported directly or indirectly by tourism, spend their income in the local region for housing, food, transportation, and the usual array of household product and service needs. The sales, income, and jobs that result from household spending of added wage, salary, or proprietor's income are induced effects.
