**Phase I Environmental Site Assessment
Northern 19.110-Acre Parcel
Located in the Northwest Corner of the
Palm Beach County Park Airport
Lantana, Florida**

1.0 INTRODUCTION

In accordance with the CH2M-Hill Purchase Order Number 907987, Revision 6, Dated August 17, 2006 and Revision 7, Dated November 11, 2006, ENTEL Environmental Companies, Inc. (ENTEL) has completed a Phase I Environmental Site Assessment of the northern 19.110-acre parcel, located at the Palm Beach County Park Airport, 2633 Lantana Road, Lantana, Florida. The intent of this study was to evaluate the current and past use of the property in order to assess the potential for soil and groundwater contamination and identify recognized environmental conditions, utilizing commonly known or reasonably ascertainable information and visual observation of the sites and surrounding areas. Recognized environmental conditions is defined by the ASTM E 1527 standard as "the presence or likely presence of any *hazardous substances or petroleum products* on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any *hazardous substances or petroleum products* into structures on the property or into the ground, groundwater, or surface water of the property. The term includes *hazardous substances or petroleum products* even under conditions in compliance with laws. The term is not intended to include *de minimis* conditions that generally do not present a material risk of harm to public health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies."

Methodologies used included: a field inspection of the subject property, a walking survey of the surrounding properties and interviews of neighboring individuals. The property was inspected for the presence, location and amounts, if any, of hazardous or toxic materials either on the property, migrating away from or migrating onto the property from adjacent properties. This study was specifically designed to preliminarily identify the presence, location and amounts, if any, of underground storage tanks, aboveground storage tanks, vent pipes, fill ports, fuel dispensers, petroleum products, drums, dumping, filling, unusual or noxious odors, monitor wells, compliance wells, potable water supply wells, artesian wells, roads or trails with no apparent outlet, stained soils, denuded or devegetated areas, obvious threatened or endangered species habitats, obvious wetlands, and chemical, hazardous, biohazardous or toxic materials storage, handling, transport and disposal areas. Additionally, reviews of federal, state and local environmental regulatory data bases, aerial photographic maps, and various scientific maps including topographic, geologic, well field, groundwater flow direction were conducted. Additional information was supplied by: Environmental Data Research (EDR); Palm Beach County Departments: Property Appraiser's Office, Engineering, and Environmental Resources Management (ERM); United States Environmental Protection Agency (EPA); United States Department of the Interior Geological Survey (USGS) and Fish and Wildlife Service (FWS); Federal Emergency Management Agency (FEMA); United States Department of Agriculture Soil Conservation Services (SCS); and the Florida Geologic Society (FGS).

This scope of work does not include sampling or analysis of groundwater, surface water, stormwater, soil, or sediments. Additionally, evaluation, sampling and analysis of radon, lead-based paint or asbestos-containing materials are specifically excluded from this scope of work. The information contained in this report is for the express use of CH2M-Hill and the Palm Beach County Department of Airports.

2.0 PROJECT DESCRIPTION

This study has been conducted in order to evaluate the environmental conditions of the Northern 19.110-Acre Parcel located in the Northwest Part of the Palm Beach County Park Airport, Lantana, Florida (see Appendix A).

3.0 CURRENT LAND USE

The land measures approximately 832,411 square feet or 19.110 acres. It fronts onto the eastern Right-of-Way of South Congress Avenue, Atlantis, Florida. The subject property is located in the northwest part of the Palm Beach County Park Airport. The land is currently open, vacant undeveloped land. The site is not secure (see Appendix B).

4.0 HYDROGEOLOGIC FEATURES

4.1 Geology/Hydrology

4.1.1 Geologic Map of Palm Beach County

Florida Geological Survey Geologic Map of Palm Beach County, Open File Map Series No. 65, dated 1993, was examined. General, very broad soil classifications are illustrated on this map. The area where the Subject property is located is classified as "Qsu", Shell beds, undifferentiated. Includes sediments previously placed in units primarily differentiated by the included fauna (e.g. the Caloosahatchee, Ft. Thompson, and Nashua Formations, Pinecrest Beds).

4.1.2 Water Resources of Palm Beach County, Florida

This document was prepared by the Florida Geological Survey and is identified as "Report of Investigations, No. 13, Water Resource Studies – Water Resources of Palm Beach County, Florida", dated 1954. It was reviewed in order to identify hydrologic properties of aquifers in Eastern Palm Beach County. The following is taken from the report:

"The physical characteristics of the confining beds and of the Floridan aquifer in Palm Beach County appear to be relatively uniform whereas those of the water-table aquifer differ from place to place. In most instances the only data available to determine the hydrologic properties of the

geologic materials were obtained by an examination of well cuttings. In a few cases data concerning yield and drawdown or pumping test in the water-table aquifer area available. The hydrologic properties of the water-table aquifer described in this report will be considered by areas: the coastal ridge, the sandy flatwoods and the Everglades.

The sand and shell materials comprising the water-table aquifer in the coastal ridge area of eastern Palm Beach County generally are about 300 feet deep. Thin beds of limestone or sandstone usually occur locally, but in the vicinity of Boca Raton and Delray Beach a bed of permeable sandstone about 100 feet in thickness underlies about 80 feet of sand. Confining beds, approximately 600 feet in thickness composed of sandy and clayey marl, underlie the water-table formations and prohibit a vertical movement of water. In some places the upper 100 feet of this confining unit contains some permeable sand and shell beds. Underlying the confining beds is a thick series of permeable limestones containing water under pressure.”

4.2 United States Department of Agriculture Soil Conservation Service – Soil Survey of Palm Beach County Area, Florida

This survey, dated 1974, was reviewed in order to determine the soil legend (classification) at the subject property. The property is shown on Sheet 94 of the Survey as it appeared in 1974. The land was developed when the aerial photograph was taken. Three soil classifications (based upon soil legend assigned by the Soil Conservation Service) are shown for Sections 31 & 32, Township 44 South, Range 43 East (the subject property location). A description of each classification follows:

SOIL LEGENDS

BM – Basinger and Myakka sands, depressional - *These are nearly level, very poorly drained, sandy soils in shallow depressions. The depressions are small to large isolated ponds or poorly defined narrow drainageways that have many branches. Generally, Basinger soils make up about 45 percent of this complex. Both soils can occur separately or together. The water table is above the surface for 3 to 9 months or more in most years.*

Ba – Basinger fine sand - *This nearly level, poorly drained, deep, sandy soil in board grassy sloughs in the eastern part of the county. This soil has the pedon described as representative of the series. The water table is within 10 inches of the surface for 2 to 6 months in most years and within 10 to 30 inches for the rest of the year.*

Sa – Sanibel muck - *This is a nearly level, poorly drained, deep, sandy soil that has a thin organic layer on the surface. This soil is in depressions, drainageways and broad flats that are transitional to the organic soils in the Everglades. It has a pedon described as representative of the series. Under natural conditions, the water table is within 10 inches of the surface for 6 to 12 months in most years. Water covers the surface 2 to 6 months during wet periods.*

4.3 United States Geological Service Topographic Quadrangles

4.3.1 Lake Worth Quadrangle

This 7.5 minute topographic quadrangle dated 1945, photorevised 1983, bathymetry added 1986 was examined in order to determine geographical features at or near the subject properties. The elevation of the subject property is approximately 10-15 feet above sea level (National Geodetic Vertical Datum of 1929) with no apparent vertical relief. This map shows the site as a marsh or wetland. Major geographical features located near the property include Lake Osborne, a freshwater recreational lake, located approximately 3,000 feet east of the subject property. The subject property is located on the Park Airport property.

4.4 National Wetlands Inventory

4.4.1 Lake Worth Quadrangle

This wetland inventory map is based upon the 7.5 minute Lake Worth topographic quadrangle. The subject property is located within the mapping area. The area where the subject property is located has three distinct legends. These include: *PSS3A – Palustrine Scrub Shrub Board Leaved Evergreen Temporary*; *PEM5C – Palustrine Emergent Narrow Leaved Persistent Seasonal*; and *PEM5A - Palustrine Emergent Narrow Leaved Persistent Temporary*.

5.0 ARCHIVAL INFORMATION REVIEW

5.1 Aerial Photographs

The subject property is located in Sections 31 & 32, Township 44 South, Range 43 East. Aerial photographs (scale 1" = 200') were obtained from the Palm Beach County Property Appraiser's Office Geoprocessing Section and the Palm Beach County Department of Engineering Reprographics Section. The following years were reviewed: 2004, 1999, 1987, 1976 and 1965.

5.1.1 2004 Aerial Photographs

Township 44 South, Range 43 East, Section 31, Photo Flight Date 2004, Scale 1:200

Township 44 South, Range 43 East, Section 32, Photo Flight Date 2004, Scale 1:200

The subject property is aligned in a north-south position, and is located east of and adjacent to Congress Avenue. The property is bounded to the north by the Palm Beach County John Prince Park. JFK Hospital is located on the western Congress Avenue Right-of-Way adjacent to the subject property. The subject property is part of the Palm Beach County Park Airport. The land is vacant, undeveloped heavily vegetated land with the exception of the northern most portion which is cleared and used by John Prince Park as a storage and staging area for soils, shellrock, sand, mulch and other park maintenance supplies.

5.1.2 1995 Aerial Photographs

Township 44 South, Range 43 East, Section 31, Flight Date May 16, 1995, Scale 1:200

Township 44 South, Range 43 East, Section 32, Flight Date May 16, 1995, Scale 1:200

No apparent changes from the 2004 aerials are visible.

5.1.3 1987 & 1989 Aerial Photographs

Township 44 South, Range 43 East, Section 31, Flight Date May 1987, Scale 1:200

Township 44 South, Range 43 East, Section 32, Flight Date May 1989, Scale 1:200

The 1987 aerial shows vacant vegetative land in the northern portion used by John Prince Park. The 1989 aerial shows no apparent change from the 1995 aerials.

5.1.4 1976 & 1977 Aerial Photographs

Township 44 South, Range 43 East, Section 31, Flight Date December 17, 1976, Scale 1:200

Township 44 South, Range 43 East, Section 32, Flight Date December 1977, Scale 1:200

Two bare areas are visible along Congress Avenue on the western property boundary. No other apparent changes from the 1987 and 1989 aerials are visible.

5.1.5 1965 & 1968 Aerial Photographs

Township 44 South, Range 43 East, Section 31, Flight Date January 22, 1968, Scale 1:200

Township 44 South, Range 43 East, Section 32, Flight Date February 26, 1965, Scale 1:200

Congress Avenue is shown as a two-lane road. The previously described bare areas are larger than shown on the 1976 and 1977 aerials. An airplane is visible in the southernmost bare area which is approximately 300 feet north of Club House Boulevard. This is believed to be the fatal crash site described by Owen Gassaway (see Section 6.1 Interviews with Knowledgeable Persons). The northern portion of the site used by John Prince Park has been cleared. This is believed to be the location of the Lantana Trash Dump #2 (see Section 5.4 Solid Waste Authority Inventory of Palm Beach County Solid Waste Sites). This cleared area was allowed to re-vegetate in later aerials.

5.2 U.S. Environmental Protection Agency Map of Radon Zones - Florida

This United States Environmental Protection Agency (EPA) document (#402-R-93-029, dated September 1993) was reviewed in order to determine the potential for radon gases at the identified sites. *Palm Beach County is designated Zone 3. Zone 3 areas are predicted to have an average indoor radon screening potential less than 2 pCi/L (pico-curries per liter).* Indoor testing is necessary in order to determine if a structure has elevated radon levels.

5.3 Palm Beach County Wellfield Protection Zones Of Influence

The Palm Beach County Department of Environmental Resources Management, Water Resource Division maintains wellfield protection zone maps. These maps were reviewed and the *Arrowhead Mobile Home Park wellfield was identified*. This wellfield is located in excess of 1 mile southwest from the subject property. The subject property is not within any identified wellfield protection zones.

5.4 Solid Waste Authority Inventory of Palm Beach County Solid Waste Sites

This Solid Waste Authority (SWA) document was examined in order to determine if any solid waste sites are located at or near the subject property. Two sites were identified within a 1-mile radius of the subject property. These are identified as:

1. *Lantana Trash Dump #2, owned by Palm Beach County, located 0.8 miles north of Lantana Road, 0.12 miles east of Congress Avenue and south of the L-14 Canal & John Prince Park. This facility was opened in 1966 and closed in 1975. Its operation is described as trench and fill. This site is located on or adjacent to the northern subject property boundary. There is no information regarding the type of waste accepted at this operation in the available materials reviewed.*
2. *Decarie Muck Pit Trash Dump a/k/a Koehler's, owned by the City of Lake Worth, located South of Lantana Road, west of Congress Avenue, east of Sea Shore Drive and north of Lantana Cascades Mobile Home Park to canal. This facility's opening date is unknown but it closed in 1979. The operation is described as a trash, construction/demolition, and yard trash site with a dredge and pleasure boat also buried in a pit dug approximately 50 feet deep. It is also known as the Town of Lantana Rubbish Dump. This site is located approximately 2,600 feet southwest from the subject property.*

5.5 U.S. Federal Emergency Management Agency (FEMA) Flood Zone Maps

These maps were examined in order to classify the subject property in flood categories, if applicable. The Flood Insurance Rate Map (FIRM) "Palm Beach County, Florida", Panel 175 of 245 was examined. The subject property is shown in Zone B, dated 10/15/82. *Zone B is identified as areas between limits of the 100-year flood and 500-year flood; or certain areas subject to 100-year flooding with average depths less than one (1) foot or where the contributing drainage area is less than one square mile; or areas protected by levees from base flood (see Appendix E).*

5.6 Zoning

Land zoning was obtained by reviewing the Property Appraisers' Office Data. The subject property is zoned "PO" – Public Ownership. The site specific Zoning Quad 18, produced by the Palm Beach County Building and Zoning Department, includes the subject property and *identifies the property as "PO" Publicly Owned (see Appendix D).*

6.0 SITE RECONNAISSANCE

Inspections of the subject property were conducted on October 9, 2006, October 19, 2006 and November 30, 2006 by ENTEL personnel. The property was inspected on foot by traversing transects at approximately 50-foot intervals. Due to the subject property's condition and accordance with ENTEL's Health & Safety Plan two staff members were present at all times during the field inspection. A survey had been recently conducted of the subject property per ENTEL's request specifically to delineate the property boundaries. Survey markers were located in the northwest corner, southwest corner and southeast corner. However, several attempts at locating the survey marker in the northeast corner of the property were unsuccessful. Therefore, the exact north east boundary line could not be determined. The following is a summary of that inspection (see Appendix A & B).

The land, based upon a DOA supplied survey, measures approximately 832,411 square feet or 19.110 acres. It fronts onto the eastern Right-of-Way of South Congress Avenue, Atlantis, Florida. The subject property is located in the northwest corner of the Palm Beach County Park Airport. The property is unsecured with several access areas from Congress Ave. The land is currently vacant undeveloped land covered with dense vegetation. The eastern part of the site is bordered by a marsh and canal.

The southern portion of the property has a low canopy consisting of distressed Australian Pine (*Casuarina equisetifolia*), pockets of Melaleuca (*Melaleuca quinquenervia*) and ornamentals. This vegetation is believed to have been impacted during an exotic tree removal program and by the high winds of the recent Hurricanes (Frances [2004], Jeanne [2004] and Wilma [2005]). A dense line of Brazilian Pepper (*Schinus terebinthifolius*) runs along the western boundary line. Ground cover, consisting of various vine and fern species, is densely overgrown and ranges from six inches to over two feet in height and covers many decaying fallen trees. The topography of the land is very irregular and slopes steeply east to the wetland areas. Large elevated sandy soil piles, covered with dense vegetation, run in a north-south direction. These elevated, irregular areas are of unknown composition. Several ground burrows were observed in the sandy soil areas. These burrows are consistent with gopher tortoise (*Gopherus polyphemus*) habitat. A gopher tortoise (*Gopherus polyphemus*) "preserve" has been established adjacent to the subject property.

The northern portion of the property consists of a high canopy of Slash Pine and ornamentals with a secondary canopy of isolated Sabal Palm (*Sabal palmetto*). The understory consists of Brazilian Pepper. The ground cover consists of various vine and fern species. The topography is more even in nature, sloping gently to the wetland areas.

Numerous campsites were found in throughout the subject property. These campsites vary from open exposed sleeping and eating areas to more sophisticated tent encampments. One such location was guarded by two dogs. According to personnel at JFK Hospital, approximately 12 to 15 people residing on the subject property have requested shelter during the recent hurricanes. The total population living in these woods is unknown. Numerous debris piles consisting of household-like trash were observed in areas that were easily accessible from Congress Ave. The majority of the debris piles were associated with the campsites. One exception is the debris pile in the west central portion of the site which is accessible by automobile. This area had numerous bags of trash. Debris piles in the interior of the subject property consisted of beer cans, household waste, bicycle parts and fast food wrappers.

A large bee keeping operation was observed in the northern part of the subject property. Approximately 150 commercial-type bee hives were seen. The owner/operator of these hives is unknown. The bees have swarmed to other locations on the property and have made nests. Information regarding the safety hazards of the subject property was verbally communicated to DOA staff.

The eastern part of the subject property was accessed by way of John Prince Park. Numerous castor beans (*Ricinus communis*) were observed. Castor beans typically grow in areas where the soil has been disturbed. This is also the suspected location of the former Lantana Trash Dump #2. This facility was opened in 1966 and closed in 1975 and is described as a trench and fill operation. The type and quantity of the materials deposited here are unknown, based upon SWA records. The Palm Beach County Solid Waste Authority identifies this site as a Class 520 facility (520 = old dump).

The surrounding properties include:

North	John Prince Park (a Palm Beach County Park)
South	Palm Beach County Park Airport
West	J.F.K. Medical Center/Congress Avenue
East	John Prince Park (a Palm Beach County Park)

6.1 Interviews with Knowledgeable Persons

Attempts were made to interview people working at or near the subject property. The following are the results of those attempts.

6.1.1 Owen Gassaway, Jr.

Mr. Owen Gassaway, Jr., Florida Airmotive, Inc. was interviewed by telephone on October 27, 2006 by ENTEL personnel. Mr. Gassaway has operated from the Palm Beach County Park Airport since the 1940's. He supplied the following information which has been arranged in chronological order.

1. 1940 – Park Airport planned and construction began – fill material dredged from Lake Osborne – the airport was part of the Osborne Slough – subject property elevation increased when overburden was deposited during dredging operations that produced fill material for the runways.
2. 1941 – “Our Town” [Park Airport] Airport opened – demucked around runway in winter
3. 1942-43 – US Military operated from Park Airport.
4. Beginning in 1945 – Gopher tortoises (*Gopherus polyphemus*) have been captured from the area around Runway 15/33 and relocated to wooded western side of the Park Airport – this area was fenced in 1988 by the Palm Beach County Department of Environmental Resources Management (ERM) and the tortoise population is reportedly large. The subject property is reportedly “full of gopher tortoises”.
5. 1968 - The aircraft seen on the 1968 aerial photograph is believed to have been the fatal crash site.

6. 1985 - The property has had various types of bee hive operations for about 20 years (mid-1980's to present). Bees have swarmed to the hangar areas of the airport in the past.
7. 1990 – Australian pines (*Casuarina equisetifolia*) were removed from some portion of the subject property and adjacent properties.
8. Nothing was ever constructed or stored on the subject property.

6.1.2 Jeanne Durden, RN

Jeanne Durden, RN is a supervising nurse in the cardiac care unit at the JFK Medical Center. She was interviewed in person by ENTEL personnel.

1. Approximately 12 to 15 people, living on the subject property, have requested shelter at the hospital during the recent hurricanes.

7.0 ENVIRONMENTAL REGULATORY AGENCIES REVIEW

7.1 Palm Beach County Department of Environmental Resources Management

This agency (ERM) has data which has been posted on two internet websites <http://gisweb.co.palm-beach.fl.us/easi>, which is used to obtain site identification numbers and <http://files.co.palm-beach.fl.us/cinema> which is used for access to various ERM data. The following nearby operations were identified:

Table 1 – ERM Identified Sites

Identified Sites	Map ID	Comments
Florida Airmotive 2633 Lantana Road, Suite 13 Southeast ~3,200 feet	1149	Storage Tank Facility #50 8514147 Tank Status: Open Cleanup Status: No Action UST 10,000 gallon -diesel fuel LUST Site Rehabilitation Cleanup Report complete

Florida Aero Paint Hangar 506 PBC Park Airport Southeast ~ 4,300 feet	Hazardous waste permit #50-73-03197 “waste acetone, waste rags” – waste hauler Permixon last hazardous waste inspection 6/15/06 file note: <i>shop out of commission since Wilma</i> [Hurricane Wilma struck the area on September 25, 2005]
[NOTE: This facility is currently the subject of US EPA Enforcement Action, Docket RCRA-04-2004-4003, this information is currently not listed in any available regulatory agency file or document at the time of this study]	
Windward Aviation Hangar 805 PBC Park Airport Southeast ~ 3,900 feet	Hazardous waste permit #50-73-02857 “used oil” – waste hauler World Petroleum “used oil filters” – waste hauler Ricky’s “battery cores” – waste disposer Florida Airmotive “parts washer solvent” – waste hauler Safety Kleen last hazardous waste inspection 4/18/06
Palm Beach Aircraft Propeller Hangar 1501 PBC Park Airport Southeast ~ 2,800 feet	Hazardous waste permit #50-73-02858 (SQG - 117 kg/month) “used oil” – waste hauler World Petroleum “parts washer solvent” – mixed with used oil “plating waste” – recycled in reactor “shop rags” – waste hauler Unifirst last hazardous waste inspection 4/18/06

None of these nearby sites are anticipated to have a negative impact the subject property due to the distant separating the sites, the expected groundwater flow direction and the anticipated diligence of the environmental regulatory agencies.

7.3 Florida Department of Environmental Protection

This Department was visited on October 10, 2006 in order to review Hazardous Waste Generator files. The following nearby operations were identified:

Table 3 – FDEP Identified Sites

Site	Direction/Distance	Environmental Risk	
Florida Airmotive 2633 Lantana Road, Suite 13	Southeast ~3,200 feet	Wastewater	MSGP FLR05B904 RCRA-SQG hazardous waste
Mohawk Technologies Hangar 402	Southeast ~4,300 feet	Wastewater	MSGP FLR05G058
Tropic Airpower Hangar 1301	Southeast ~3,000 feet	Wastewater	MSGP FLR05E112
Rohan Aviation, Inc. (d/b/a Kemper Aviation) Hangar 1102	Southeast ~3,000 feet	Wastewater	MSGP FLR05G131
Palm Beach Aircraft Services, Inc. Hangar 410	Southeast ~4,300 feet	Wastewater	MSGP FLR05G072
[Note: This facility has been issued a Hazardous Waste permit #50 73 03474 by the Palm Beach County Health Department but this record was not available at the Health Department during the course of this study]			
Palm Beach County Park Airport Department of Airports 2633 Lantana Road	Southeast ~3,200 feet	Wastewater	MSGP FLR05D105
Candy Yellow Apple Hangar 1201	Southeast ~3,000 feet	Wastewater	MSGP FLR05F368

LUST – Leaking Underground Storage Tank

NFA – No Further Action

RCRA-SQG – Resource Conservation & Recovery Act – Small Quantity Generator

SRCR – Site Rehabilitation Completion Report

UST – Underground Storage Tank

None of these nearby sites are anticipated to have a negative impact the subject property due to the distant separating the sites, the expected groundwater flow direction and the anticipated diligence of the environmental regulatory agencies.

8.0 CONCLUSIONS

1. The subject property is not within an identified wellfield protection zone, and the area where the property is located is identified as a Radon Gas Zone 3 area where less than 2 pCi/L (pico-curries per liter) is anticipated.
2. The subject property is vacant, undeveloped densely vegetated land and is a part of the Palm Beach County Park Airport. The subject property is not secure.
3. The topography of the land is very irregular and slopes steeply east to the wetland areas. Large elevated sandy soil piles, covered with dense vegetation, run in a north-south direction. These elevated, irregular areas are of unknown composition.
4. Household-like debris piles were observed in numerous areas. Many piles are predominately beer cans while others were a dense mix of decaying household waste. No obvious sign of hazardous waste was observed.
5. Ground burrows were seen. These are consistent with gopher tortoise burrows. The Florida Fish and Wildlife Conservation Commission (FWC) recently voted to up list the gopher tortoise from "species of special concern" to "threatened".
6. The former Lantana Trash Dump #2 is believed to be located on the northeast and/or north part of the subject property. The north east property boundary survey marker could not be located. There is no information as to the type of material accepted at this location. Groundwater is believed to flow generally off-site to the southeast.
7. An airplane crashed in the southwestern part of the subject property sometime between 1965 and 1968. No other data regarding discharge of aircraft fluids could be located during the course of this investigation.

9.0 RECOMMENDATIONS

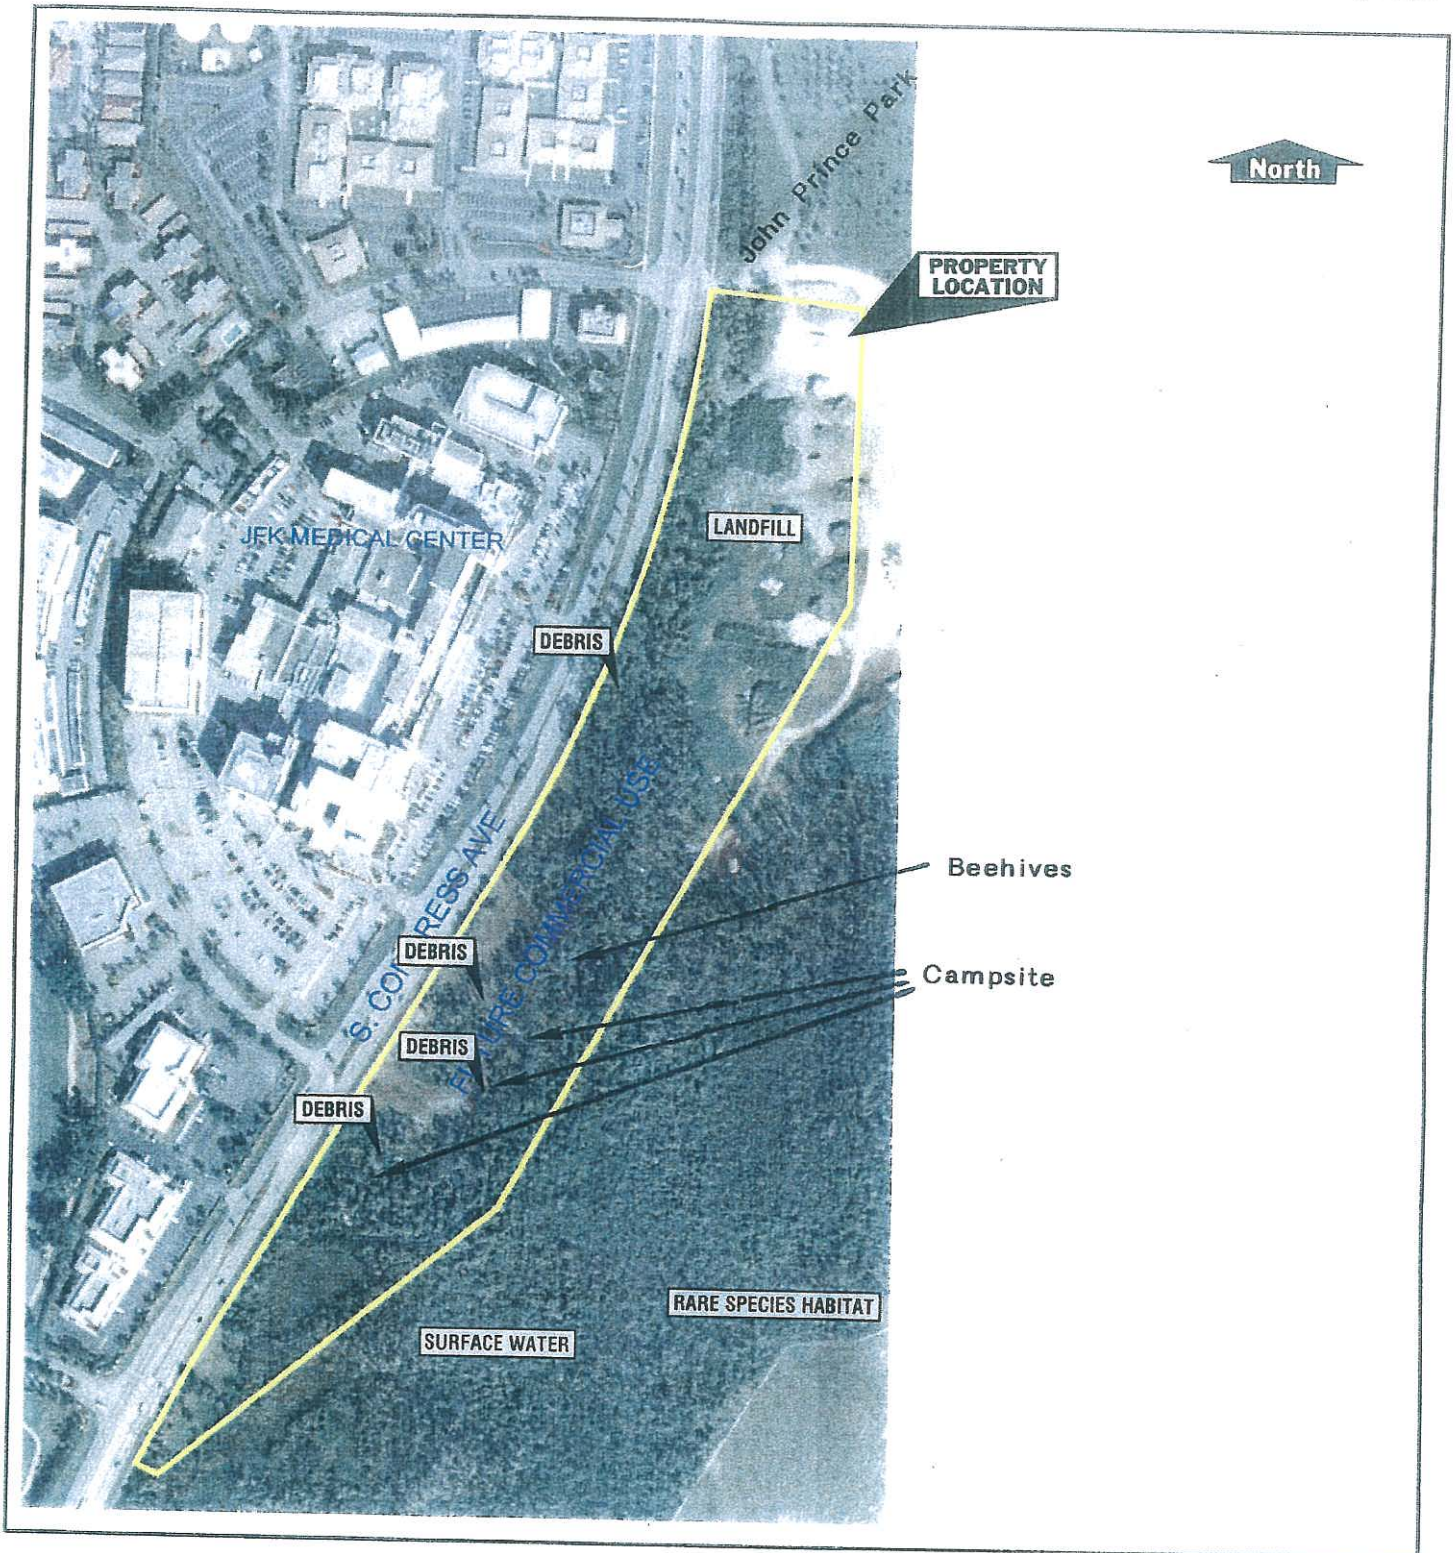

The following recommendations are made based upon the future development of the subject property:

1. Determine the composition of the southern elevated, irregular areas.
2. Remove and properly dispose of the identified debris.
3. Determine if gopher tortoises are present and how their presence will impact site development.
4. Further determination may be necessary to locate the actual boundaries of the Lantana Trash Dump #2 prior to development.
5. A limited soil and groundwater investigation of the airplane crash site may be warranted.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-05) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STATE AND LOCAL RECORDS

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Environmental Protection's Facility Directory (Solid Waste Facilities).

A review of the SWF/LF list, as provided by EDR, and dated 05/16/2006 has revealed that there is 1

EXECUTIVE SUMMARY

SWF/LF site within approximately 0.5 miles of the target property.

Other Pertinent Environmental Activity Identified at Site:
 RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

FEDERAL RECORDS

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 08/02/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 10/30/2006
	Data Release Frequency: Quarterly

Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 08/02/2006
Number of Days to Update: 17	Next Scheduled EDR Contact: 10/30/2006
	Data Release Frequency: Quarterly

DELISTED NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Date of Government Version: 04/19/2006	Source: EPA
Date Data Arrived at EDR: 05/05/2006	Telephone: N/A
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 08/02/2006

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

NPL RECOVERY: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Date of Government Version: 10/15/1991	Source: EPA
Date Data Arrived at EDR: 02/02/1994	Telephone: 202-564-4267
Date Made Active in Reports: 03/30/1994	Last EDR Contact: 08/21/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 11/20/2006
	Data Release Frequency: No Update Planned

CERCLIS: Comprehensive Environmental Response, Compensation, and Liability Information System

CERCLIS contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

Date of Government Version: 06/19/2006	Source: EPA
Date Data Arrived at EDR: 06/22/2006	Telephone: 703-413-0223
Date Made Active in Reports: 08/23/2006	Last EDR Contact: 06/22/2006
Number of Days to Update: 62	Next Scheduled EDR Contact: 09/18/2006
	Data Release Frequency: Quarterly

CERCLIS-NFRAP: CERCLIS No Further Remedial Action Planned

Archived sites are sites that have been removed and archived from the inventory of CERCLIS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Date of Government Version: 02/01/2006	Source: EPA
Date Data Arrived at EDR: 03/21/2006	Telephone: 703-413-0223

CORRACTS: Corrective Action Report

CORRACTS identifies hazardous waste handlers with RCRA corrective action activity.

Date of Government Version: 03/15/2006	Source: EPA
Date Data Arrived at EDR: 03/17/2006	Telephone: 800-424-9346
Date Made Active in Reports: 04/13/2006	Last EDR Contact: 09/05/2006
Number of Days to Update: 27	Next Scheduled EDR Contact: 12/04/2006
	Data Release Frequency: Quarterly

RCRA: Resource Conservation and Recovery Act Information

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRAInfo replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS). The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Conditionally exempt small quantity generators (CESQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month. Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month. Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month. Transporters are individuals or entities that move hazardous waste from the generator off-site to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Date of Government Version: 06/13/2006	Source: EPA
Date Data Arrived at EDR: 06/28/2006	Telephone: 800-424-9346

US ENG CONTROLS: Engineering Controls Sites List

A listing of sites with engineering controls in place. Engineering controls include various forms of caps, building foundations, liners, and treatment methods to create pathway elimination for regulated substances to enter environmental media or effect human health.

Date of Government Version: 03/21/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2006	Telephone: 703-603-8905
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 09/07/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 10/02/2006
	Data Release Frequency: Varies

US INST CONTROL: Sites with Institutional Controls

A listing of sites with institutional controls in place. Institutional controls include administrative measures, such as groundwater use restrictions, construction restrictions, property use restrictions, and post remediation care requirements intended to prevent exposure to contaminants remaining on site. Deed restrictions are generally required as part of the institutional controls.

Date of Government Version: 03/21/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 03/27/2006	Telephone: 703-603-8905
Date Made Active in Reports: 05/22/2006	Last EDR Contact: 09/07/2006
Number of Days to Update: 56	Next Scheduled EDR Contact: 10/02/2006

Number of Days to Update: 33	Next Scheduled EDR Contact: 10/02/2006
	Data Release Frequency: Varies

US BROWNFIELDS: A Listing of Brownfields Sites

Included in the listing are brownfields properties addresses by Cooperative Agreement Recipients and brownfields properties addressed by Targeted Brownfields Assessments. Targeted Brownfields Assessments-EPA's Targeted Brownfields Assessments (TBA) program is designed to help states, tribes, and municipalities--especially those without EPA Brownfields Assessment Demonstration Pilots--minimize the uncertainties of contamination often associated with brownfields. Under the TBA program, EPA provides funding and/or technical assistance for environmental assessments at brownfields sites throughout the country. Targeted Brownfields Assessments supplement and work with other efforts under EPA's Brownfields Initiative to promote cleanup and redevelopment of brownfields. Cooperative Agreement Recipients--States, political subdivisions, territories, and Indian tribes become Brownfields Cleanup Revolving Loan Fund (BCRLF) cooperative agreement recipients when they enter into BCRLF cooperative agreements with the U.S. EPA. EPA selects BCRLF cooperative agreement recipients based on a proposal and application process. BCRLF cooperative agreement recipients must use EPA funds provided through BCRLF cooperative agreement for specified brownfields-related cleanup activities.

Date of Government Version: 07/10/2006	Source: Environmental Protection Agency
Date Data Arrived at EDR: 07/13/2006	Telephone: 202-566-2777
Date Made Active in Reports: 09/06/2006	Last EDR Contact: 06/12/2006
Number of Days to Update: 55	Next Scheduled EDR Contact: 09/11/2006
	Data Release Frequency: Semi-Annually

CONSENT: Superfund (CERCLA) Consent Decrees

Major legal settlements that establish responsibility and standards for cleanup at NPL (Superfund) sites. Released periodically by United States District Courts after settlement by parties to litigation matters.

Date of Government Version: 12/14/2004	Source: Department of Justice, Consent Decree Library
Date Data Arrived at EDR: 02/15/2005	Telephone: Varies
Date Made Active in Reports: 04/25/2005	Last EDR Contact: 07/24/2006
Number of Days to Update: 69	Next Scheduled EDR Contact: 10/23/2006
	Data Release Frequency: Varies

ROD: Records Of Decision

Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

Date of Government Version: 07/10/2006	Source: EPA
Date Data Arrived at EDR: 07/21/2006	Telephone: 703-416-0223
Date Made Active in Reports: 09/06/2006	Last EDR Contact: 07/06/2006
Number of Days to Update: 47	Next Scheduled EDR Contact: 10/02/2006

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

Date of Government Version: 11/04/2005	Source: Department of Energy
Date Data Arrived at EDR: 11/28/2005	Telephone: 505-845-0011

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

Date of Government Version: 04/17/1995	Source: EPA
Date Data Arrived at EDR: 07/03/1995	Telephone: 202-564-4104

Number of Days to Update: 35	Next Scheduled EDR Contact: 12/04/2006
	Data Release Frequency: No Update Planned

BRS: Biennial Reporting System

The Biennial Reporting System is a national system administered by the EPA that collects data on the generation and management of hazardous waste. BRS captures detailed data from two groups: Large Quantity Generators (LQG) and Treatment, Storage, and Disposal Facilities.

Date of Government Version: 12/31/2003	Source: EPA/NTIS
Date Data Arrived at EDR: 06/17/2005	Telephone: 800-424-9346
Date Made Active in Reports: 08/04/2005	Last EDR Contact: 07/21/2006
Number of Days to Update: 48	Next Scheduled EDR Contact: 09/11/2006
	Data Release Frequency: Biennially

STATE AND LOCAL RECORDS

SHWS: Florida's State-Funded Action Sites

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

Date of Government Version: 01/23/2006	Source: Department of Environmental Protection
Date Data Arrived at EDR: 03/21/2006	Telephone: 850-488-0190

EDR PROPRIETARY RECORDS

Manufactured Gas Plants: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

Marine Facilities Operating Permit

What is this permit used for? Miami-Dade County Ordinance 89-104 and Section 24-18 of the Code of Miami-Dade County require the following types of marine facilities to obtain annual operating permits from DERM: All recreational boat docking facilities with ten (10) or more boat slips, moorings, davit spaces, and vessel tie-up spaces. All boat storage facilities contiguous to tidal waters in Miami-Dade County with ten (10) or more dry storage spaces including boatyards and boat manufacturing facilities.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

Date of Government Version: 12/31/2004

Oil/Gas Pipelines: This data was obtained by EDR from the USGS in 1994. It is referred to by USGS as GeoData Digital Line Graphs from 1:100,000-Scale Maps. It was extracted from the transportation category including some oil, but primarily gas pipelines.

Electric Power Transmission Line Data

Source: PennWell Corporation
 Telephone: (800) 823-6277

This map includes information copyrighted by PennWell Corporation. This information is provided on a best effort basis and PennWell Corporation does not guarantee its accuracy nor warrant its fitness for any particular purpose. Such information has been reprinted with the permission of PennWell.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.
 Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services
 Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health
 Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics
 Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

UTM Y (Meters):	2941556.5
Elevation:	9 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	26080-E1 LAKE WORTH, FL
Most Recent Revision:	1986

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General ESE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Target Property County</u>	FEMA Flood
PALM BEACH, FL	<u>Electronic Data</u>
	YES - refer to the Overview Map and Detail Map

Additional Panels in search area:	1201930005A

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	NWI Electronic
LAKE WORTH	<u>Data Coverage</u>
	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Status:	Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
A2	1/4 - 1/2 Mile SSW	ENE
A3	1/4 - 1/2 Mile South	WNW

For additional site information, refer to Physical Setting Source Map Findings.

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era:	Cenozoic
System:	Quaternary
Series:	Pleistocene
Code:	Qp (decoded above as Era, System & Series)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

- Soil Surface Textures: cobbly - fine sand
- Surficial Soil Types: cobbly - fine sand
- Shallow Soil Types: No Other Soil Types
- Deeper Soil Types: weathered bedrock sand

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Scanned Digital USGS 7.5' Topographic Map (DRG)

Source: United States Geologic Survey

A digital raster graphic (DRG) is a scanned image of a U.S. Geological Survey topographic map. The map images are made by scanning published paper maps on high-resolution scanners. The raster image is georeferenced and fit to the Universal Transverse Mercator (UTM) projection.

HYDROLOGIC INFORMATION

Flood Zone Data: This data, available in select counties across the country, was obtained by EDR in 1999 from the Federal Emergency Management Agency (FEMA). Data depicts 100-year and 500-year flood zones as defined by FEMA.

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002 and 2005 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetlands Inventory

Telephone: 850-245-8238

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Services (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Services, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

EDR Aerial Photo Decade Package

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDRs professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

When delivered electronically by EDR, the aerial photo images included with this report are for ONE TIME USE ONLY. Further reproduction of these aerial photo images is prohibited without permission from EDR. For more information contact your EDR Account Executive.

Thank you for your business.

Interview With Knowledgeable Persons

Project: LNA (Park Airport) ESA north parcel

Date: October 27, 2006 (Interviewed by J. Larson & P. Evans)

Name: Owen Gassaway, Jr.

Company: Florida Airmotive, Inc.

Address: 2633 Lantana Road, Suite 13
Lantana, FL 33462

Telephone: (561) 965-6400

Interview: Approximately 12 to 15 people have requested shelter at the

Mr. Owen Gassaway, Jr., Florida Airmotive, Inc. was interviewed by telephone on October 27, 2006. Mr. Gassaway has operated from the Palm Beach County Park Airport since the 1940's. He supplied the following information which has been arranged in chronological order.

1. 1940 – Park Airport planned and construction began – fill material dredged from Lake Osborne – the airport was part of the Osborne Slough – subject property elevation increased when overburden was deposited during dredging operations that produced fill material for the runways.
2. 1941 – “Our Town” [Park Airport] Airport opened – demucked around runway in winter
3. 1942-43 – US Military operated from Park Airport.
4. Beginning in 1945 – Gopher tortoises (*Gopherus polyphemus*) have been captured from the area around Runway 15/33 and relocated to wooded western side of the Park Airport – this area was fenced in 1988 by the Palm Beach County Department of Environmental Resources Management (ERM) and the tortoise population is reportedly large. The subject property is reportedly “full of gopher tortoises”.
5. 1968 - The aircraft seen on the 1968 aerial photograph is believed to have been the fatal crash site of Bob Jessup's airplane.
6. 1985 - The property has had various types of bees for about 20 years (mid-1980's to present).
7. 1990 – Australian pines (*Casuarina equisetifolia*) were removed from some portion of the subject property and adjacent properties.
8. Nothing was ever constructed or stored on the subject property.

Interview With Knowledgeable Persons

Project: LNA (Park Airport) ESA south parcel

Date: October 27, 2006

Name: Owen Gassaway, Jr. (Interviewed by J. Larson & P. Evans)

Company: Florida Airmotive, Inc.

Address: 2633 Lantana Road, Suite 13
Lantana, FL 33462

Telephone: (561) 965-6400

Interview:

Mr. Owen Gassaway, Jr., Florida Airmotive, Inc. was interviewed by telephone on October 27, 2006. Mr. Gassaway has operated from the Palm Beach County Park Airport since the 1940's. He supplied the following information which has been arranged in chronological order.

9. 1940 – Park Airport planned and construction began – fill material dredged from Lake Osborne – the airport was part of the Osborne Slough.
10. 1941 – “Our Town” [Park Airport] Airport opened – demucked around runway in winter
11. 1942-43 – US Military operated from Park Airport.
12. 1945-60 – Crop dusters operated from the subject property during winter months – chemicals in bags or drums were stored on trucks (no contact with soil) – Mr. Jim Turnage stored fertilizer inside hangars on the east side of the Park Airport.
13. Late 1970's - early 1980's – A sewer department headed by a Mr. Griffith, believed to be Palm Beach County Utilities, spread wastewater plant sludge as a test fertilizer onto the grasses at the subject property – this test lasted for approximately 1 year – the grasses took about 15 years to recover and grow back.
14. Since the 1940's – Gopher tortoises (*Gopherus polyphemus*) have been captured and relocated to wooded western side of the Park Airport – this area is currently fenced and the tortoise population is reportedly large.

Interview With Knowledgeable Persons

Project: LNA (Park Airport) ESA north parcel

Date: October 18, 2006

Name: Jeanne Durden, RN (Interviewed by P. Evans)

Company: JFK Medical Center – Cardiac Care Center

Address: 5301 S. Congress Avenue

Atlantis, FL 33462

Telephone: (561) 795-3255 [home]

Interview:

Approximately 12 to 15 people have requested shelter at the hospital during our most recent hurricane (Wilma – October 2005). These individuals lived in the wooded 19.11-acre northern parcel across the street from the hospital.
