**Monday–Sunday, July 30–August 5**

### Flint Institute of Arts (FIA)

1120 E. Kearsley Street, Flint · (810) 234-1695 · [flintarts.org](http://flintarts.org)

(Open Monday-Friday 12 p.m. to 5 p.m., Saturday 10 a.m. to 5 p.m. and Sunday 1 p.m. to 5 p.m.) Visit FIA and browse their outstanding collections of American, European, Native American, African and Asian art including paintings, sculptures, prints, drawings and decorative arts featuring a complete set of 17th century French tapestries that tell a story. Also, watch amazing, free glass blowing demonstrations sponsored by McLaren.

**“Small Worlds”** – Small Worlds highlights different techniques, styles and various types of paperweights from the 19th century, the classic period for paperweight manufacture, to present day. This exhibition features works from the classic period by European glass factories like French crystal manufacturers Baccarat, Clichy and Saint-Louis. Some of the earliest contemporary paperweights in Small Worlds were created by Charles Kazium and Dominick Labino, both members of the Studio Glass Movement. Numerous works by Paul Stankard, Rick Ayotte and Cathy Richardson as well as artworks by seventeen other contemporary paperweight makers are also featured.

**“From Lens to Eye to Hand: Photorealism 1969 to Today”** – This exhibition reexamines the important contemporary art movement that found its roots in the late 1960s in California and New York and continues today, known as Photorealism. Photorealism features ordinary elements of contemporary life such as vehicles, buildings, streets and consumer products in an objective, often clinical, manner. The paintings that make up this exhibit demonstrate that Photorealism remains undiluted, conceptually coherent and consistently compelling.

**“Breaking with Tradition: Contemporary Ceramics”** – During the mid-to-late 20th century, ceramicists used a sculptural approach in their work instead of using traditional shapes. Free of the need to make useful or “utilitarian” objects, ceramicists explored the properties of clay and the chemistry of glazes. This exhibition reflects the desire of ceramicists to experiment and depart from ceramics as purely functional objects.

**“Surrealism: Ojos de Mexico”** – This exhibit features photographs that demonstrate the enduring influence of Surrealism on Photography in Mexico, a style that emerged from the ashes of World War I. At a time when artists and intellectuals turned against the “high culture” of the Europe that they believed spawned the horrors of war, some artists viewed Surrealism as a mechanism for celebrating the mysteries of the subconscious mind. The style provides a lens for viewing a country with many contrasts, with subjects that are unexpected, ironic, sad, humorous, frustrating and hopeful.
