This household sewing machine is designed to comply with IEC/EN 60335-2-28 and UL1594.

IMPORTANT SAFETY INSTRUCTIONS
When using an electrical appliance, basic safety precautions should always be followed, including the following:
Read all instructions before using this household sewing machine. Keep the instructions at a suitable place close to the machine. Make sure to hand them over if the machine is given to a third party.

DANGER - To reduce the risk of electric shock:
- A sewing machine should never be left unattended when plugged in. The electrical socket, to which the machine is plugged in should be easily accessible. Always unplug this sewing machine from the electric outlet immediately after using and before cleaning, removing covers, lubricating or when making any other user servicing adjustments mentioned in the instruction manual.

WARNING - To reduce the risk of burns, fire, electric shock, or injury to person:
- Do not allow to be used as a toy. Close attention is necessary when this sewing machine is used by or near children.
- Use this sewing machine only for its intended use as described in this manual. Use only attachments recommended by the manufacturer as contained in this manual.
- Never operate this sewing machine if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water. Return the sewing machine to the nearest authorized dealer or service center for examination, repair, electrical or mechanical adjustment.

- Never operate the sewing machine with any air openings blocked. Keep ventilation openings of the sewing machine and foot control free from the accumulation of lint, dust, and loose cloth.

- Keep fingers away from all moving parts. Special care is required around the sewing machine needle.

- Always use the proper needle plate. The wrong plate can cause the needle to break.

- Do not use bent needles.

- Do not pull or push fabric while stitching. It may deflect the needle causing it to break.

- Wear safety glasses.

- Switch the sewing machine off ("0") when making any adjustment in the needle area, such as threading needle, changing needle, threading bobbin, or changing presser foot, etc.

- Never drop or insert any object into any opening.

- Do not use outdoors.

- Do not operate where aerosol (spray) products are being used or where oxygen is being administrated.

- To disconnect, turn all controls to the off ("0") position, then remove plug from outlet.

- Do not unplug by pulling on cord. To unplug, grasp the plug, not the cord.

- The foot control is used to operate the machine. Never place other objects on the foot control.
- Do not use the machine if it is wet.
- If the LED lamp is damaged or broken, it must be replaced by the manufacturer or its service agent or a similarly qualified person, in order to avoid a hazard.
- If the cord connected with the foot control is damaged, it must be replaced by the manufacturer or its service agent or a similarly qualified person, in order to avoid a hazard.
- This sewing machine is provided with double insulation. Use only identical replacement parts. See instructions for Servicing of Double-Insulated Appliances.

SAVE THESE INSTRUCTIONS

FOR CENELEC COUNTRIES ONLY:
This appliance can be used by children aged from 8 years and above and persons with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision.
The noise level under normal operating conditions is less than 75dB(A).
The machine must only be used with foot control of type FC-2902D, (220-240V) manufactured by Zhejiang Founder Motor Corporation, LTD. (Vietnam) / 4C-326G (230V) / 4C-336G (240V) manufactured by Wakaho Electric Ind. Co., Ltd. (Vietnam).
FOR NON CENELEC COUNTRIES:
This sewing machine is not intended for use by persons (including children) with reduced
physical, sensory or mental capabilities, or lack of experience and knowledge, unless they
have been given supervision or instruction concerning use of the sewing machine by a person
responsible for their safety. Children should be supervised to ensure that they do not play with
the sewing machine.

The noise level under normal operating conditions is less than 75dB(A).
The machine must only be used with foot control of type KD-1902, FC-1902 (110-120V) / KD-
2902, FC-2902A, FC-2902C, FC-2902D, (220-240V) manufactured by Zhejiang Founder Motor
Corporation, LTD. (Vietnam) / 4C-316B (110-125V) / 4C-316C (127V) /4C-326C (220V) / 4C-326G
(230V) / 4C-336G (240V) manufactured by Wakaho Electric Ind. Co., Ltd. (Vietnam).

SERVICING OF DOUBLE INSULATED PRODUCTS
In a double-insulated product, two systems of insulation are provided instead of grounding. No
ground means is provided on a double-insulated product, nor should a means for grounding
be added to the product. Servicing of a double-insulated product requires extreme care and
knowledge of the system and should be done only by qualified service personnel. Replacement
parts for a double-insulated product must be identical to those parts in the product. A double-
insulated product is marked with the words ‘DOUBLE INSULATION’ or ‘DOUBLE INSULATED’.

**Unpacking**
- Place the box on a steady, flat surface. Lift your machine out of the box and remove the outer packaging.
- Remove all other packing material and the plastic bag.
Principal Parts of the Machine

1. Horizontal spool pin
2. Bobbin winder spindle
3. Hole for auxiliary spool pin
4. Handwheel
5. Power and light switch
6. Main plug socket
7. Bobbin thread guide
8. Upper thread guide
9. Face plate
10. Handle
11. Presser foot lifter
12. Foot speed control
13. Power cord
Connecting Machine to Power Source

Connect the machine to a power source as illustrated. (1)
This appliance is equipped with a polarized plug which must be used with the appropriate polarized outlet. (2)

Attention:
Unplug power cord when machine is not in use.

Foot control
The foot control pedal regulates the sewing speed. (3)

Attention:
Consult a qualified electrician if in doubt of how to connect machine to power source.

Sewing light
Press main switch (A) to “I” for power and light.

IMPORTANT NOTICE
For appliance with a polarized plug (one blade is wider than the other). To reduce the risk of electric shock, this plug is intended to fit in a polarized outlet only one way. If it does not fit fully in the outlet, reverse the plug. If it still does not fit, contact a qualified electrician to install the proper outlet. Do not modify the plug in any way.

a. Polarized attachment plug
b. Conductor intended to be grounded
When sewing several layers or thick fabrics, the presser foot can be raised to a higher position for easy positioning of the work. (A)

**Attention:**
Your SINGER® machine is adjusted to provide the best stitch result at normal room temperature. Extreme hot and cold temperatures can affect the sewn result.
**Accessories**

**Standard accessories**

a. All purpose foot  
b. Zipper foot  
c. 4-Step buttonhole foot (Model M3200/ M3205)  
d. 1-Step buttonhole foot (Model M3300/ M3305/ M3400/ M3405/ M3500/ M3505)  
e. Button sewing foot  
f. L-screwdriver  
g. Seam ripper/ brush  
h. Pack of needles  
i. SINGER Class 15 bobbins (4x)  
j. Edge/ quilting guide  
k. Darning plate  
l. Spool holder  
m. Soft cover

**Optional Accessories:**

For information about additional presser feet, attachments and accessories that may be available for your machine, visit www.singer.com
Winding the Bobbin

- Place thread and corresponding spool holder on to spool pin. (1/2)
- Snap thread into thread guide. (3)
- Wind thread clockwise around bobbin winder tension discs. (4)
- Thread bobbin as illustrated and place on spindle. (5)
- Push bobbin spindle to right. (6)
- Hold thread end. (7)
- Step on foot control pedal. (8)
- Release the pedal after a few turns. Release the thread and cut as close as possible to the spool. Press the pedal again. Once the spool is full, it rotates slowly. Release the pedal and cut thread. (9)
- Push bobbin spindle to left (10) and remove.

Please Note:
When the bobbin winder spindle is in “bobbin winding” position, the machine will not sew and the hand wheel will not turn. To start sewing, push the bobbin winder spindle to the left (sewing position).
When inserting or removing the bobbin, the needle must be fully raised.

- Open the hinged cover. (1)
- Pull the bobbin case tab (a) and remove the bobbin case. (2)
- Hold the bobbin case with one hand. Insert the bobbin so that the thread runs in a clockwise direction (arrow). (3)
- Pull the thread through the slit and under the finger. Leave a 6 inch tail of thread. (4)
- Hold the bobbin case by the hinged latch. (5)
- Insert it into the shuttle. (6)

**Attention:**
Turn power switch to off (“O”) before inserting or removing the bobbin.
# Thread Tension

**Upper thread tension**
Basic thread tension setting: "4".
To increase the tension, turn the dial to the next number up.
To reduce the tension, turn the dial to the next number down.
1. Normal thread tension for straight stitch sewing.
2. Thread tension too loose for straight stitch sewing. Turn dial to higher number.
3. Thread tension too tight for straight stitch sewing. Turn dial to lower number.
4. Normal thread tension for zig zag and decorative sewing. Correct thread tension is when a small amount of the upper thread appears on the bottom side of fabric.

**Lower thread tension**
The bobbin tension has been set correctly at the factory, so you do not need to adjust it.

**Please note:**
- Proper setting of tension is important to good sewing.
- There is no single tension setting appropriate for all stitch functions, thread or fabric.
- A balanced tension (identical stitches both top and bottom) is usually only desirable for straight stitch construction sewing.
- 90% of all sewing will be between "3" and "5".
- For zig zag and decorative sewing stitch functions, thread tension should generally be less than for straight stitch sewing.
- For all decorative sewing you will always obtain a nicer stitch and less fabric puckering when the upper thread appears on the bottom side of your fabric.
This is a simple operation but it is important to carry out correctly as by not doing so several sewing problems could result.

- Raise the needle to its highest position by turning the handwheel towards you (counterclockwise) so that the mark on the handwheel points directly up. Raise the presser foot to release the tension discs. (1)

  **Note:** For safety, it is strongly suggested you turn off the power before threading.

- Lift up the spool pin. Place the spool of thread on the holder with the thread coming off the spool as shown. For small thread spools, place small side of spool holder next to spool. (2)

- Draw thread from spool through the upper thread guide (3) and pulling thread through pre-tension spring as illustrated. (4)

- Thread tension module by leading thread down right channel and up left channel. (5) During this process it is helpful to hold the thread between the spool and thread guide.

- At the top of this movement pass thread from right to left through the slotted eye of the take-up lever and then downwards again. (6)

- Now pass thread behind the thin wire needle clamp guide (7) and then down to the needle which should be threaded from front to back.

- Pull about 6-8 inches of thread to the rear beyond the needle eye. Trim thread to length with built in thread cutter. (8)
- Raise the needle to its highest position.
- Pass thread around thread guide (A). (1)
- Press lever (B) down as far as it will go. (2)
- The threader automatically swings to the threading position (C).
- Pass the thread in front of the needle around the hook (D) from bottom to top.
- Release lever (B). (3)
- Pull the thread through the needle eye.

**Attention:**
Turn power switch to off ("O")!
**Raising the Bobbin Thread**

Hold the upper thread with the left hand. (1)
Turn the handwheel towards you (counterclockwise) lowering, then raising needle.

**Note:**
If it is difficult to raise the bobbin thread, check to make sure the thread is not trapped by the hinged cover or the Removable Extension Table.

Gently pull on the upper thread to bring the bobbin thread up through the needle plate hole. (2)

Lay both threads to the back under the presser foot. (3)
To select a stitch, simply turn the pattern selector dial. The pattern selector dial may be turned in either direction.

For straight stitch, select pattern " | " with the pattern selector dial.

For zigzag stitch, select pattern " 3/ " with the pattern selector dial.

To obtain the other patterns, turn the stitch length dial to “S1” or “S2” and select the pattern desired with pattern selector dial.

a. Reverse Sewing Lever
b. Stitch Width Dial
c. Stitch Length Dial
d. Pattern Selector Dial

How to Choose Your Pattern

Model M3200/ M3205

Model M3300/ M3305

Model M3400/ M3405

Model M3500/ M3505
Function of stitch width dial
The maximum zigzag stitch width for zigzag stitching is 5mm; however, the width can be reduced on any patterns. The width increases as you move zigzag dial from "0" - "5". The stitch width dial is also the control for the straight stitch infinite needle position.
"0" is center needle position, "5" is full left needle position. (1) (Model M3300/ M3305 /M3400 /M3405 /M3500 /M3505)
"0" is center needle position, "5" is full right needle position. (2) (Model M3200/ M3205)

Function of stitch length dial while zig-zag stitching (3)
Turn the Pattern Selector Dial to zig-zag. The density of zig-zag stitches increases as the setting of stitch length dial approaches "0". Neat zig-zag stitches are usually achieved at "2.5" or below. Dense zig-zag stitches are called satin stitches.

Function of stitch length dial for when straight stitching (4)
For straight stitch sewing, turn the Pattern Selector Dial to the straight stitch setting. Turn the Stitch Length Dial, and the length of the individual stitches will decrease as the dial approaches "0". The length of the individual stitches will increase as the dial approaches "4". Generally speaking, use a longer stitch length when sewing heavier weight fabrics or when using a thicker needle or thread. Use a shorter stitch length when sewing lighter weight fabrics or when using a finer needle or thread.
**Sewing Straight Stitch**

To begin sewing, set the machine for straight stitch. (1)

Place the fabric under the presser foot with the fabric edge lined up with the desired seam guide line on the needle plate. (2)

Lower the presser foot lifter, and then step on the foot control to start sewing. (3)
To secure the beginning and the end of a seam, press down the reverse sewing lever (A). Sew a few reverse stitches. Release the lever and the machine will sew forward again. (1)

Removing the Work

Turn the handwheel toward you (counterclockwise) to bring the thread take up lever to its highest position and the needle begins to descend, raise the presser foot and remove work behind the needle and presser foot. (2)

Cutting the Thread

Pull the threads under and behind the presser foot. Guide the threads to the side of the face plate and into thread cutter (B). Pull threads down to cut. (3)
Choosing Stretch Stitch Patterns

The stretch stitch patterns are indicated with a blue color on the pattern selector dial.

To select these stitches, turn the pattern selector dial to the desired pattern. Then, turn the stitch length dial to the indicator marked "S1" or "S2". Though there are several stretch patterns, here are two examples:

**Straight Stretch Stitch (1)**
Set the pattern selector dial to "\[\]".
Used to add triple reinforcement to stretch and hardwearing seams.
The machine sews two stitches forward and one stitch backwards.

**Ric Rac (2)**
Set the pattern selector dial to "\[\]".
Adjust the stitch width dial to between "3" and "5".
Ric rac stitch is suitable for firm fabrics like denim, corduroy, poplin, duck, etc.
For hems on curtains, trousers, skirts, etc.

Blind hem for stretch fabrics.

Blind hem for firm fabrics.

**Note:**
It takes practice to sew blind hems. Always make a sewing test first.

Set the stitch length dial with the range shown on the diagram at the right. Blind hems, however, are normally sewn with a longer stitch length setting.

Set the stitch width dial at a setting appropriate for the weight/type of fabric being sewn, within the range shown in the diagram on the right of the page.

Generally, a narrower stitch is used for lighter weight fabrics, and a wider stitch is used for heavier weight fabrics. Sew a test first to make sure the machine settings are appropriate for the fabric.

**Blind Hem:**
Turn up the hem to the desired width and press. Fold back (as shown in Fig. 1) against the right side of the fabric with the top edge of the hem extending about 7 mm. (1/4") to the right side of the folded fabric.

Start to sew slowly on the fold, making sure the needle touches slightly the folded top to catch one or two fabric threads. (2)

Unfold the fabric when hemming is completed and press.

**Note:**
To make blind hem sewing even easier, use a blind hem foot, available from your SINGER® retailer.
**Prepare**

1. Take off the all purpose foot and attach the buttonhole foot.
2. Measure diameter and thickness of button and add 0.3 cm (1/8”) for bar tacks to obtain correct buttonhole length; mark buttonhole length on fabric (a).
3. Place fabric under the foot, so that marking on the buttonhole foot aligns with starting marking on fabric. Lower the foot, so that the buttonhole center line marked on the fabric aligns with the center of the buttonhole foot (b).

Adjust the stitch length dial in the "0000" range to set stitch density.

**Note:**
Density varies according to the fabric. Always test sew a buttonhole on the fabric you are using to sew the buttonhole.

Follow the 4-step sequence changing from one step to another with the Pattern Selector Dial. When moving from step to step through the buttonhole process, be sure that the needle is raised before turning the Pattern Selector Dial to the next step. Take care not to sew too many stitches in steps 2 and 4. Use seam ripper and cut buttonhole open from both ends towards the middle.

**Tips:**
- Slightly reducing upper thread tension will produce better results.
- Use a stabilizer for fine or stretchy fabrics.
- It is advisable to use heavy thread or cord for stretch or knit fabrics. The zig-zag should sew over the heavy thread or cord. (A)
1-Step Buttonhole Stitch (Model M3300/M3305/M3400/M3405/M3500/M3505)

Buttonhole sewing is a simple process that provides reliable results. However, it is strongly suggested to always make a practice buttonhole on a sample of your fabric and stabilizer.

Making a Buttonhole

1. Using tailor’s chalk, mark the position of the buttonhole on the fabric.
2. Attach the buttonhole foot and set the Pattern Selector Dial to "5". Set stitch length dial to "5". Set the stitch width at "5". The width however may need to be adjusted according to the project. Sew a test first to determine this.
3. Lower the presser foot aligning the marks on foot with the marks on the fabric (A). (The front bar tack will be sewn first.) (Align the mark on the fabric (a) with the mark on the foot (b).)
4. Open the button plate and insert the button (B).
5. Lower the buttonhole lever and gently push it back (C).
6. While lightly holding the upper thread, start the machine.
7. Buttonhole stitching is done in the order (D).
8. Stop the machine when the buttonhole cycle has completed.

Making a Buttonhole on Stretch Fabrics (E)

When sewing buttonholes on stretch fabric, hook heavy thread or cord under the buttonhole foot. When the buttonhole is sewn the legs will overcast the cord.

1. Mark the position of the buttonhole on the fabric with the tailor’s chalk, attach the buttonhole foot, and set the pattern selector dial to "5". Set stitch length dial to "5".
2. Hook the heavy thread onto the back end of the buttonhole foot, then bring the two heavy thread ends to the front of the foot, insert them into the grooves and temporarily tie them there.
3. Lower the presser foot and start sewing.
   *Set the stitch width to match the diameter of the gimp thread.
4. Once sewing is completed, gently pull the heavy thread to remove any slack, then trim off the excess.
Sewing on Buttons

Install the darning plate. (1)
Change the all purpose foot to the button sewing foot. (2)
Set the stitch length to "0".

Place the button and fabric under the Button Sewing foot, as illustrated in (3).
Set the machine for zig-zag stitch, then set the width to number "3" - "5". Turn the handwheel to check that the needle goes cleanly into the left and right holes of the button. Adjust the stitch width, as needed, according to the distance between the holes of the button. Slowly sew on the button with about 10 stitches.
Raise the needle out of the fabric. Set the machine for straight stitch again, then sew a few securing stitches to finish.

If a shank is required, place a darning needle on top of the button and sew. (4)
For buttons with 4 holes, sew through the front two holes first, push the work forward and then sew through the back two holes.
Set the machine as illustrated.

Change to zipper foot.

The zipper foot can be attached right or left, depending on which side of the foot you are going to sew. (1)

To sew past the zipper tab, lower the needle into the fabric, raise the presser foot and push the zipper tab behind the presser foot. Lower the foot and continue to sew.

It is also possible to sew a length of cord into a bias strip to form a "welt" or piping. (2)
Installing the Removable Extension Table

Hold the removable extension table horizontally, and push it in the direction of the arrow. (1)

To remove the extension table, pull it toward the left.

The inside of the removable extension table can be utilized as an accessory box.

To open, flip cover down as shown. (2)
Changing the Presser Foot

Removing the presser foot
Push the presser foot (e) to disengage from the cut-out (c). (1)

Attaching the presser foot
Install the pin (d) of the presser foot (e) into the cut-out (c) of the presser foot holder. (2)

Removing and attaching the presser foot shank
Raise the presser bar (a) with the presser foot lifter. Remove and attach the presser foot shank (b) as illustrated. (3)

Attaching the edge/quilting guide
Attach the edge/quilting guide (f) in the slot as illustrated. Adjust as needed for hems, pleats, quilting, etc. (4)

Attention:
Turn power switch to off ("O") when carrying out any of the above operations!
### Needle/ Fabric/ Thread Chart

#### NEEDLE, FABRIC, THREAD SELECTION GUIDE

<table>
<thead>
<tr>
<th>NEEDLE SIZE</th>
<th>FABRICS</th>
<th>THREAD</th>
</tr>
</thead>
<tbody>
<tr>
<td>9-11 (70-80)</td>
<td>Lightweight fabrics-thin cottons, voile, silk, muslin, interlocks, cotton knits, tricots, jerseys, crepes, woven polyester, shirt &amp; blouse fabrics.</td>
<td>Light-duty thread in cotton, nylon, polyester or cotton wrapped polyester.</td>
</tr>
<tr>
<td>11-14 (80-90)</td>
<td>Medium weight fabrics-cotton, satin, kettlecloth, sailcloth, double knits, lightweight woolens.</td>
<td>Most threads sold are medium size and suitable for these fabrics and needle sizes. Use polyester threads on synthetic materials and cotton on natural woven fabrics for best results.</td>
</tr>
<tr>
<td>14 (90)</td>
<td>Medium weight fabrics-cotton duck, woolen, heavier knits, terrycloth, denims.</td>
<td>Always use the same thread on top and bottom.</td>
</tr>
<tr>
<td>16 (100)</td>
<td>Heavyweight fabrics-canvas, woolens, outdoor tent and quilted fabrics, denims, upholstery material (light to medium).</td>
<td>Heavy duty thread.</td>
</tr>
<tr>
<td>18 (110)</td>
<td>Heavy woolen, overcoat fabrics, upholstery fabrics, some leathers and vinyls.</td>
<td></td>
</tr>
</tbody>
</table>

**IMPORTANT:** Match needle size to thread size and weight of fabric.

#### NEEDLE, FABRIC SELECTION

<table>
<thead>
<tr>
<th>NEEDLES</th>
<th>EXPLANATION</th>
<th>TYPE OF FABRIC</th>
</tr>
</thead>
<tbody>
<tr>
<td>SINGER® 2020</td>
<td>Standard sharp needles. Sizes range thin to large. 9 (70) to 18 (110).</td>
<td>Natural woven fabrics-wool, cotton, silk, etc. Not recommended for double knits.</td>
</tr>
<tr>
<td>SINGER® 2045</td>
<td>Ball point needle, scarfed. 9 (70) to 18 (110).</td>
<td>Natural and synthetic woven fabrics, polyester blends. Knits-polyesters, interlocks, tricot, single and double knits. Also sweater knits, Lycra®, swimsuit fabric, elastic.</td>
</tr>
<tr>
<td>SINGER® 2032</td>
<td>Leather needles. 12 (80) to 18 (110).</td>
<td>Leather, vinyl, upholstery. (Leaves smaller hole than standard large needle.)</td>
</tr>
</tbody>
</table>

**Note:**

1. For best sewing results always use genuine SINGER® needles.
2. Replace needle often (approximately every other garment) and/or at first thread breakage or skipped stitches.
For certain types of work, (e.g. darning or free-hand embroidery), the darning plate must be used.

Install the darning plate as illustrated.

For normal sewing, remove the darning plate.

For free-motion sewing it is recommended to use a darning/embroidery foot, available as an optional accessory from authorized SINGER® retailers.
Inserting the Needle

Change the needle regularly, especially if it is showing signs of wear and causing problems. For best sewing results always use SINGER® Brand Needles.

Insert the needle as illustrated as follows:
A. Loosen the needle clamp screw and tighten again after inserting the new needle. (1)
B. The flat side of the shaft should be towards the back.
C/D. Insert the needle as far up as it will go.

Attention:
Turn power switch to off (“O”) before inserting or removing the needle.

Needles must be in perfect condition. (2)

Problems can occur with:
A. Bent needles
B. Damaged points
C. Blunt needles
**Attention:**
Disconnect the machine from the electrical supply by removing the plug from the main socket. When cleaning the machine, it must always be disconnected from the electrical supply.

**Remove the needle plate:**
Turn the handwheel until the needle is fully raised. Open the hinged front cover and unscrew the needle plate screws with the screwdriver. (1)

**Cleaning the feed teeths:**
Use the brush supplied to clean the whole area. (2)

**Cleaning and lubricating the hook:**
Remove the bobbin case. Snap the two hook retaining arms (3) outwards. Remove the hook race cover (4) and the hook (5) and clean with a soft cloth. Lubricate at the point (6) (1-2 drops) with sewing machine oil. Turn the handwheel until the hook race (7) is in the left position. Replace the hook (5). Replace the hook race cover and snap back the two hook retaining arms. Insert the bobbin case and bobbin and replace the needle plate.

**Important:**
Fabric lint and threads must be removed regularly. Your machine should be serviced at regular intervals at one of our service centers.
### Troubleshooting Guide

<table>
<thead>
<tr>
<th>Problem</th>
<th>Cause</th>
<th>Correction</th>
</tr>
</thead>
<tbody>
<tr>
<td>Upper thread breaks</td>
<td>1. The machine is not threaded correctly.</td>

<tr>
<td></td>
<td>3. The wrong size or type of needle has been used.</td>
<td>3. Choose a needle to suit the thread and fabric.</td>
</tr>
<tr>
<td></td>
<td>4. The foot is not attached correctly.</td>
<td>4. Check and attach correctly.</td>
</tr>
<tr>
<td>Needle breaks</td>
<td>1. The needle is damaged.</td>
<td>1. Insert a new needle.</td>
</tr>
<tr>
<td></td>
<td>2. The needle is not correctly inserted.</td>
<td>2. Insert the needle correctly. (flat side towards the back)</td>
</tr>
<tr>
<td></td>
<td>3. Wrong needle size for the fabric.</td>
<td>3. Choose a needle to suit the thread and fabric.</td>
</tr>
<tr>
<td></td>
<td>4. The wrong foot is attached.</td>
<td>4. Select the correct foot.</td>
</tr>
<tr>
<td>Loose stitches</td>
<td>1. The machine is not correctly threaded.</td>
<td>1. Check the threading.</td>
</tr>
<tr>
<td></td>
<td>2. The bobbin case is not correctly threaded.</td>
<td>2. Thread the bobbin case as illustrated.</td>
</tr>
<tr>
<td></td>
<td>3. Needle/ fabric/ thread combination is wrong.</td>
<td>3. The needle size must suit the fabric and thread.</td>
</tr>
<tr>
<td></td>
<td>4. Thread tension wrong.</td>
<td>4. Correct the thread tension.</td>
</tr>
<tr>
<td>Seams gather or pucker</td>
<td>1. The needle is too thick for the fabric.</td>
<td>1. Select a finer needle.</td>
</tr>
<tr>
<td></td>
<td>2. The stitch length is incorrectly adjusted.</td>
<td>2. Readjust the stitch length.</td>
</tr>
<tr>
<td></td>
<td>3. The thread tension is too tight.</td>
<td>3. Loosen the thread tension.</td>
</tr>
<tr>
<td>Uneven stitches, uneven feed</td>
<td>1. Poor quality thread.</td>
<td>1. Select a better quality thread.</td>
</tr>
<tr>
<td></td>
<td>2. The bobbin case is incorrectly threaded.</td>
<td>2. Remove bobbin case, thread and insert correctly.</td>
</tr>
<tr>
<td></td>
<td>3. Fabric has been pulled.</td>
<td>3. Do not pull on the fabric while sewing, let it be drawn through the machine.</td>
</tr>
<tr>
<td>The machine is noisy</td>
<td>1. Lint or oil have collected on the hook or needlebar.</td>
<td>1. Clean the hook and feed teeth as described.</td>
</tr>
<tr>
<td></td>
<td>2. The needle is damaged.</td>
<td>2. Replace the needle.</td>
</tr>
<tr>
<td>The machine jams</td>
<td>1. Thread is caught in the hook.</td>
<td>Remove the upper thread and bobbin case, turn the handwheel backwards and forwards by hand and remove the thread.</td>
</tr>
