

IOT
INTERNET OF THINGS

Innovate with IoT to gain enhanced security, cost savings and informed business decisions

We have emerged into the world of Internet of Things (IoT)

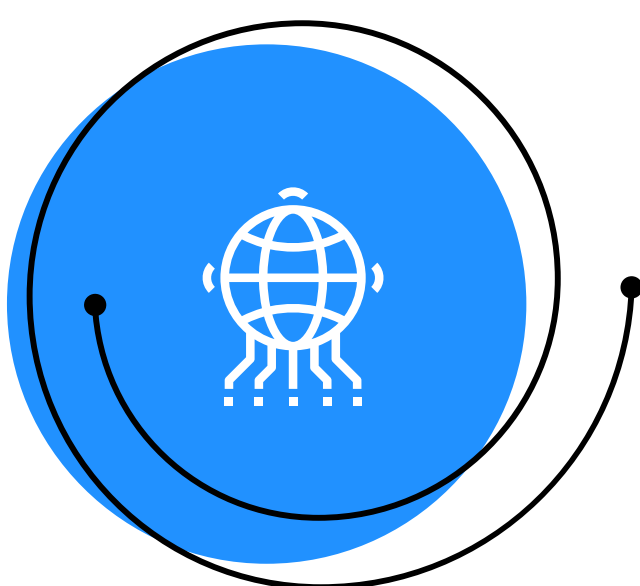

From smart devices for convenience and monitoring in day-to-day lives to the most complex business operations, IoT is everywhere connecting the physical world with the people and processes. IoT applications record and sends reams of data which helps in managing, monitoring and analysing a process to boost efficiency. The widespread adoption of Internet of Things (IoT) can be experienced across all industries Healthcare, Manufacturing, Automobile, Retail, Energy, Construction, Smart Cities.

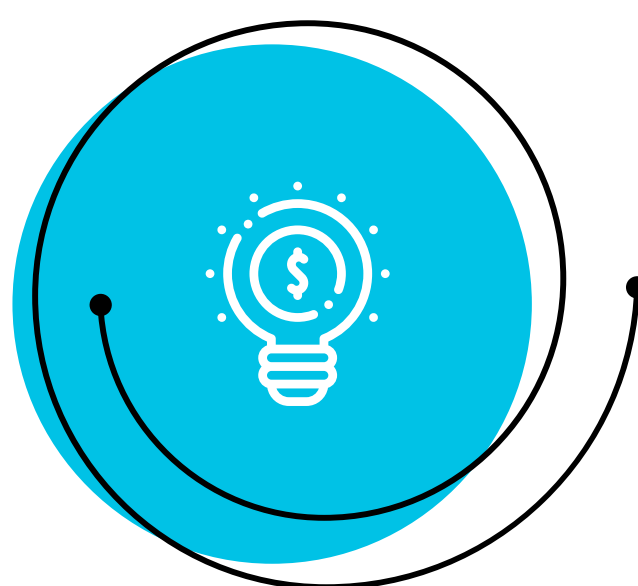

A specialist in power projects across the mining, infrastructure, energy and industrial sectors significantly reduced operational cost by integrating IoT, resulting in 30% savings

IoT Service Offerings

Systematix has been offering internet of things consulting and development services to its clients from a cross-segment of industries through its team of experienced IoT and data science consultants.
