

The journey of Skillmine began in 2011.
10 years of continuous skill enrichment and
many more years to mine the unearthed.

We are elated to say its been 10 key years of learnings, self- evaluation and establishment in the IT world for Skillmine Technologies. We've always believed in providing the best possible services to our clients globally. It's our goal to achieve the highest possible quality benchmarks. As a global information and technology company, we connect decision makers to a dynamic network of data, people and ideas – delivering the best possible technology solutions. We are confident to carry the same fervour in the current year of infinite opportunities.

1

A collaboration with a big news and media conglomerate in KSA is underway to create a significant online presence for them. The complete functionality of developing a corporate website, training portal, ecommerce website, school portal, et al is under process.

Successfully completed major infrastructure projects for a top private Indian bank. Our team is developing mobile applications, implementing tracking solutions, developing infrastructure dashboards and working on some 11 critical applications for the bank.

2

3

The Managed Services team (MSS) has been executing multiple projects remotely for a prominent wealth management company. We are working on achieving objectives with respect to RBI & SEBI compliance, strengthening security, management of traffic for remote working and creating distributed computing network for this company.

Skillmine has started the operational support, development and maintenance of PC tools for one of the largest network connectivity providers. Adherence to standard level SLAs based on the criticality and severity of the issue with unified customer portals and fixing defects pertaining to applications has been the key.

4

5

Skillmine has augmented implementation of multiple infrastructure projects for one of the largest private banks in India. One of the key aspects of the project includes implementing FDNS to help improve availability and reduce denial of service attacks.

The Managed Security Services (MSS) team has successfully implemented three big projects for an American multinational financial services company based out of KSA in the domains of Data Classification, Privilege Access Management Solution and Threat Intelligence Solution. We have also scaled up the SAMA maturity to 3.5 level for this company.

6

7

Our team that works for one of the largest British multinational retailers has achieved a major milestone by completing one of the applications cutovers and integrating it with the HCM system. This was implemented across to close to 500 stores with over 4500+ deployments to address the latest business requirements. The team is also working on Azure DevOps classic pipelines being upgraded to YAML for better performance & productivity.

What's New

1

Skillmine has initiated an Offshore Delivery Centre(ODC) program with an American fashion retailer that has world's most key brands in its kitty.

2

We have started providing 24x5 support for all premium clients. We are aggressively expanding in the geographies of US, UK and KSA.

3

We have introduced new techniques OCR – Optical Character Reader/Recognition and OpenCV. OCR has been introduced to achieve operational objectives and to render excellent services to customers. Increased accuracy and data utility add value to information, hence, ensuring organisations make better decisions.

OpenCV has been introduced to utilize and modify the code in business. We have introduced this technique to provide a common infrastructure for computer vision applications and to accelerate the use of machine perception in commercial products.

NASSCOM Webinar- Key Speaker

Skillmine Technologies has recently expanded its operations to the UK and the NASSCOM invited **Mr. Anant Agrawal, Skillmine's M.D.** to speak at the revered NASSCOM event on 'Emerging Technologies, Investment and Business Opportunities in the UK' in the month of Dec'20.

Welcome Onboard

Why Cloud Computing is influencing the IT industry?

The IT industry is experiencing a boom like never before and because of the enormous amount of opportunity, more and more brands are looking to grow in this arena. Cloud computing is one of the key phenomena that has arisen in the past year. Organisations have realized that having a dedicated place for all their digital information and resources is critical for a business and having a well-protected place that can take care of it and keep the information secure has almost become a necessity. For brands that want to enhance the work they do and make it more efficient in a digital environment, cloud computing is the go-to solution.

Cloud computing has emerged as one of the few saving graces for companies, and has been touted for its versatility, efficiency, and security. Its usage is vital for businesses to sustain activities, but even more important for their ability to continue to support their clients.

Before you start analysing your current infrastructure, Skillmine plans your journey to understand the environmental requirements for your cloud strategy. We provide a wide variety of services ranging from microservices to machine learning platforms, such as scalability, agility, availability. We identify main takeaways that promote your company by helping you to maintain your attention on your core business vision and purpose, making sense and adding value.

The world will finally emerge from this time of remote work, but it will change the way we do business forever. In this world of large-scale remote work, we have a unique opportunity to examine how cloud applications shall enable us to run companies. This pandemic is an opportunity to continue to deliver innovation in the workplace because disruptive events always lead to novelties in the business landscape.
