

Learn. Play. Grow.

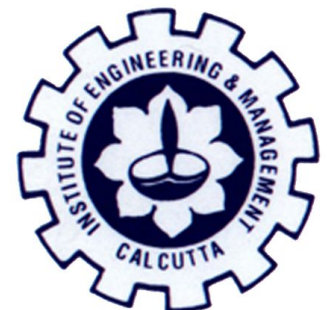

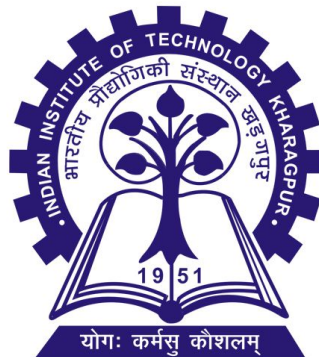

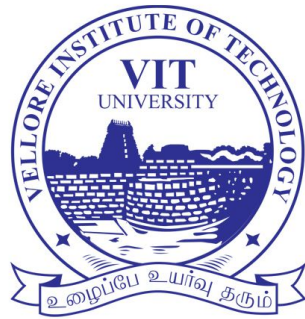

About Skubotics

Founded in 2010, Skubotics has been into Training & Product development in the field of Embedded Systems, IOT and Industrial Robotics.

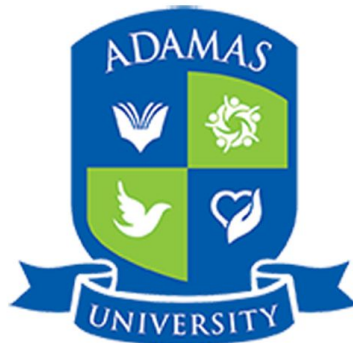

At Skubotics, we aim towards introducing the idea of Robotics training, right from the school level within the Indian academic system. We strive to share the technical knowledge we possess, among students from various academic strata around us in order to make them well aware of the upcoming modules of the future technology and enable them to gain the best out of it.

It remains our primary endeavor to deliver the best training experience through theoretical concepts incorporated with practical aspects. Our workshops are designed to provide the most pragmatic overview of the subject being taught along with providing thoughtfully designed kits wherever applicable. We provide complete technical solutions to equip students through hands on experience. Our target audience comprises of School and College level students who wish to enhance their practical skill set and we try to do so by familiarizing them with newer forms of technologies in use today.

Our Clientele

Our Clientele

Why Skubotics

We have been training students since 2010 and have trained more than 1000 students till now which includes students pursuing Engineering, Masters, Research Scholars as well as Professionals from Hardware and Software Industry.

The workshops are designed to enable the students to bridge the gap between their theoretical knowledge base and the required practical applications.

We have industry experience attained through product development for various industrial clients in the field of Electronics, serving them locally as well as abroad.

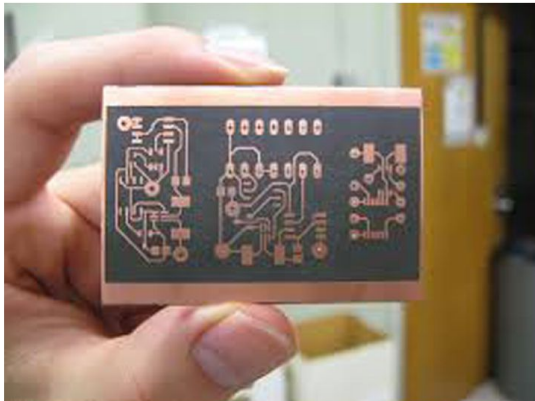

Workshops Offered

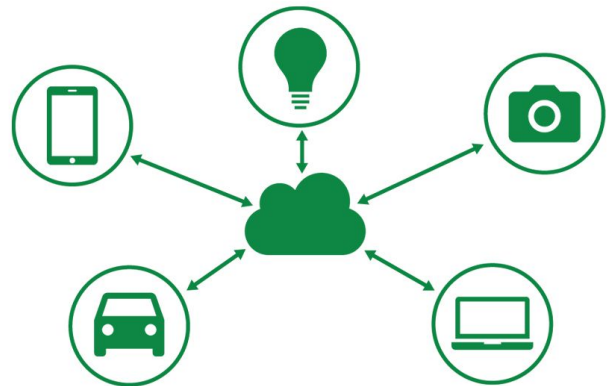

Arduino based
Embedded Systems

Python Programming
Language

PCB Design
and Fabrication

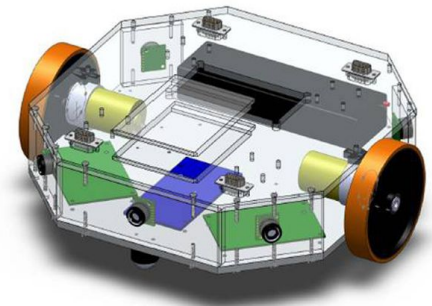

Internet
of Things

Workshops Offered

Motion Controlled Robot

Manual Robot Design

Line Follower Robot

Voice Controlled
Robot

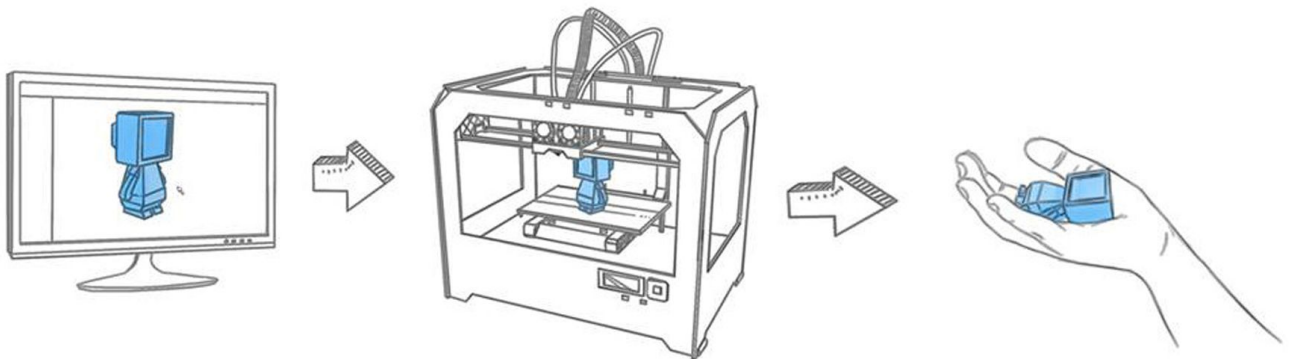

Workshops Offered

Android App
Development

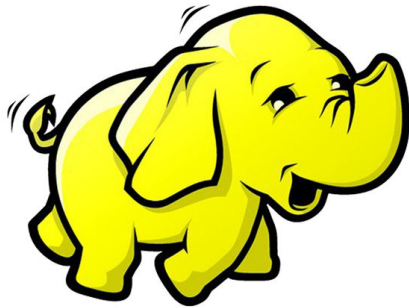

Website Design using
HTML5.0 and CSS3.0

Introduction to 3D Design and Fabrication

Workshops Offered

Big Data
using Hadoop and Spark

Machine Learning
using Python

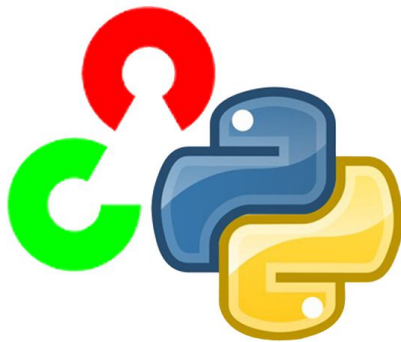

Image Processing
using Python and OpenCV

AngularJS
for Web Development

Workshops Offered

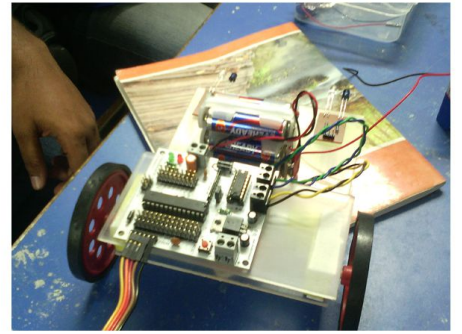

Introduction to
PLC Programming

Home Automation
using IOT

Workshop Gallery
