

Installation Template for Controller Hookup Panel

Panel Mounting Instructions:

- 1) Use scissors to cutout template; remove gray shaded area by cutting along dotted line.
- 2) Position template where you plan to mount the panel. Trace area to be cutout using inner portion of template.
- 3) **CAUTION: Check to ensure there are no wires or other objects "behind" the area you plan to remove.**
- 4) Carefully remove material from area of table where you plan to mount the panel.
- 5) Check panel for fit – ensure no panel components are binding against the opening. Depending on your panel configuration, you might need to remove some additional material.
- 6) Position panel over opening in desired position and hold in place with one hand. Use 3/16" drill bit to drill mounting holes (use the holes in the actual panel as a guide when drilling the holes into the mounting surface).
- 7) Install panel using mounting screws provided. Do not overtighten.
