

PC2 Covered Aluminum Profile H20

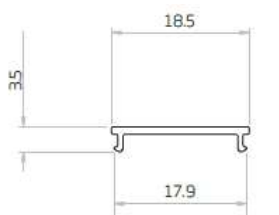

It is composed of 6063 aluminum profile in two different heights and PC cover with different light transmittance, and caters for various scenarios with special demands on brightness and light diffusion. PC cover effectively decreases the glare, avoids the direct impact on the light surface from an external force, and blocks dust to reduce the influence on the brightness and color, prolonging the light lifespan.

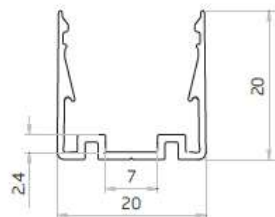

Note: PC1 refers to Transparent PC; PC2 refers to Milky PC

Please refer to the applicable installation ways.

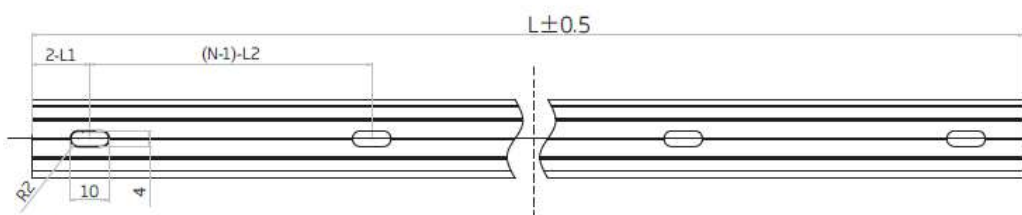

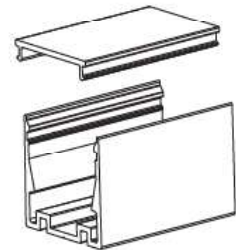

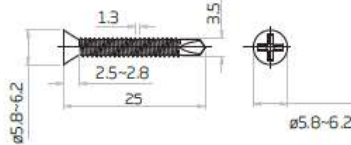

Dimension: mm

Tolerance(PC): $\pm 0.3\text{mm}$

Tolerance(AL): $\pm 0.2\text{mm}$

Note:

1. 2-L1 refers to two of symmetric L1 in each piece of profile.
 2. (N-1)-L2 refers to (N minus one) of symmetric L2 in each piece of profile.
- "N" hereby stands for its corresponding "Hole Number" in the below table
