AWS Discovery Day

An official introduction to AWS.
Delivered by an official AWS Training Partner.

aws training and certification | **NETCAMPUS** LEARN. INNOVATE. EVOLVE

About the events

AWS Discovery Days are one-day virtual events that offer an overall understanding of the AWS Cloud. This event is designed to educate business leaders and IT technical professionals on the benefits of computing in the AWS Cloud. You'll gain the foundational knowledge of introductory concepts that will help you to embark into further role based learning paths.

By attending this event, you'll learn how to use AWS services to improve business processes and optimise cost savings, whilst also gaining an understanding of how to benefit from AWS security and compliance services.

Delivered exclusively by our AWS Training Partner network, you'll learn officially endorsed AWS content, delivered by the only organisations who are authorised to deliver it. The training is available in a variety of languages for your convenience.

Date: 17 November 2021

Time: 9:00 to 12:00 OR 14:00 to 17:00 two sessions
