Detailed technical data

Features

Items supplied	Magnetic tape not included with delivery
-----------------------	--

Performance

Measuring step	0.244 µm For interpolation of the sine/cosine signals with, e. g., 12 bits
Measuring range	0 mm ... 3,920 mm
Resolution	1 µm
Length of period	1 mm
Traversing speed	1.3 m/s, ≤ 10 m/s up to which the absolute position can be reliably produced, dynamic operation (Sin/Cos)
Repeatability	< 5 µm
System accuracy	± 10 µm (+20 °C)
Measured value backlash	< 10 µm

Interfaces

Communication interface	HIPERFACE® ¹⁾
Code type	Binary
Available memory area	1,792 Byte (E ² PROM 2048)

¹⁾ SSIinterface described in publication 8013375.

Electrical data

Supply voltage	7 V DC ... 12 V DC
Recommended supply voltage	8 V DC
Operating current	≤ 65 mA (without load) ¹⁾
Connection type	Male connector, M12, 8-pin

¹⁾ 100 mA approx. during adjustment.

Mechanical data

Dimensions	See dimensional drawing
Scope of delivery	Magnetic tape not included with delivery
Weight	0.08 kg
Read head material	Zinc diecast

Ambient data

EMC	According to EN 61000-6-2 and EN 61000-6-3 ¹⁾
Enclosure rating	IP67, with mating connector inserted (IEC 60529)
Operating temperature range	-30 °C ... +80 °C
Storage temperature range	-40 °C ... +85 °C, without package
Permissible relative humidity	100 %, condensation permitted
Resistance to shocks	30 g, 6 ms (EN 60068-2-27)
Resistance to vibration	20 g, 10 Hz ... 2,000 Hz (EN 60068-2-6)
Maximum permitted ambient field strength	< 3 kA/m ... 4 kA/m (3.8 mT ... 5 mT), to guarantee compliance with the quoted accuracy values ²⁾
Maximum permitted field strength	< 150 kA/m (< 190 mT), to ensure that the magnetic tape is not permanently damaged

¹⁾ According to the listed standards, EMC is guaranteed if the motor feedback system is connected to the central grounding point of the motor controller via a cable shield and the encoder housing lays over a large area of the motor potential. If other shielding concepts are used, users must perform their own test.

²⁾ The maximum permitted external field influence is reached when the position value deviates from the original value (without external field influence) by more than 5 µm. This value is reached when, at the sensor location, a field strength of 3 kA/m to 4 kA/m (3.8 mT to 5 mT) occurs in addition to the field strength of the magnetic tape.

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is “Sensor Intelligence.”
