Thermal Inlet Duct for the Cisco^ Catalyst 6504-E Switch for Net-Access™ N-Type Cabinets

specifications

The thermal inlet duct shall be designed to be compatible with the Cisco^ Catalyst 6504-E switch using Computational Fluid Dynamics (CFD) modeling and verified via operational testing. The duct system shall occupy 9 RU consisting of 4 RU of ducting and 5 RU required for the Cisco^ 6504E Switch. The modular duct shall be capable of being installed in a retro-fit application without disrupting existing in-cabinet equipment and cabling.

technical information

Dimensions:	26.0"L x 20.9"W x 15.7"H (660mm x 530mm x 399mm)

key features and benefits

Passive airflow	No additional moving parts or power required for a more reliable, efficient, economical and environmentally friendly system
Certified performance	Designed and validated thermal performance by Panduit
Physical separation between inlet and exhaust airflow	Segregates inlet and exhaust airflow preventing hot air recirculation reducing inlet temperatures at a minimum of 10°C
Inlet duct design	Ensures the cabinet is containment ready for vertical exhaust ducting (VED) and Cold Aisle Containment
Maximized space utilization	Allows the switch to be deployed in a 800mm wide Panduit cabinet without sacrificing thermal performance
Energy efficiency	Provides cool air to the switch resulting in lower fan speed reducing fan power consumption and improving reliability
Day one or two installation	Eliminates the requirement to replace or disturb existing cabinets, equipment and infrastructure for lower capital expenditures and minimized risk
Easy access	Allows access to the power supplies and fan modules minimizing network downtime
Integral bonding to cabinet	Cabinets and accessories are single-point bonded, providing a safe and reliable network, while reducing installation costs

applications

The 4-slot Cisco^ Catalyst 6504-E Switch has a compact 5 RU height that is ideally suited for multi-Gbps secure data centers, remote access, e-commerce, and converged network solutions. The Cisco^ Catalyst 6504-E supports Cisco^ Catalyst 6500 Series end-to-end operational consistency benefits.

Panduit has developed a comprehensive physical infrastructure solution for the Catalyst 6504-E switch platform. By providing a path for cool air to the switch, data center temperature set points can be raised, resulting in higher energy efficiencies and lower operating costs.
