PRMC120 100V CD Mixer Amplifier 120W

The PRC120 is a rack-mountable mixer-amplifier that can either be used as 100V amplifier or as a standard low-impedance amplifier. Features 5 input channels include a balanced XLR microphone input with switchable phantom power and Vox override, 2 mic/line jack inputs and 2 RCA line inputs. It's equipped with a CD player, BT receiver and USB/SD ports for MP3 playback including a bright LCD display with ID3 Tag. The PRC120 is provided with switchable XLR inputs with 24V Phantom Power, especially for paging and condenser microphones. Especially designed for applications such as paging, announcements, intercommunications, background music, broadcasting in industrial plants etc.

Weight : 1,00

1. Mixer-Amplifier with 5 input channels
