

overview

The SmartZone™ UPS Relay Card is used to provide UPS internal status to the outside or control peripheral devices according to UPS status in the form of Form-C dry contacts. Simply connect the monitoring solution power source to the Common Source input and connect the monitoring solution to any or all the relay card's status outputs.

key features and benefits

Remote monitoring of key UPS functions via dry contact relays

Provides Normally Open (NO) and Normally Closed (NC) outputs

Hot swappable
