

# Increase Rack Power Flexibility

## SmartZone™ G5 iPDUs

Featuring Combination Outlets for Higher Outlet Density and Increased Power Capacity

Digitization has created the need to maximize IT equipment in the rack.

The G5 iPDU 4-in-1 combination outlets provide the ultimate in connection flexibility allowing a single receptacle to be used as a C13/C15 or a C13/C15/C19/C21, making sure connection types are available when needed most. The 4-in-1 combination outlets accept Panduit dual-locking power cords eliminating accidental disconnects. The G5 PDUs also feature higher power capacities than ever before, allowing more equipment to be powered from a single PDU. Available in Monitored Input (MI), Monitored Switched (MS), or Monitored & Switched per Outlet (MSPO) varieties with power capacities ranging from 8.6KW to 43.5KW.
