

# MWS120-3CN1NF18X00

MWS120

**MEASURING WHEEL ENCODERS** 

#### Illustration may differ

## Ordering information

| Туре               | Part no. |
|--------------------|----------|
| MWS120-3CN1NF18X00 | 1137786  |

Included in delivery: AFS60A-S4NB262144 (1), BEF-MR10500APN (1), BEF-MWS120-ARM (1)

Encoder and measuring wheel are attached to the measuring arm. See individual components for further technical data

Other models and accessories → www.sick.com/MWS120

#### Detailed technical data

#### Performance

| Number of steps per revolution (max. resolution) | 262,144 (18 bit)       |
|--|------------------------|
| Measuring increment (resolution in mm/ pulse)    | 0.002 1) 2)            |
| Repeatability                                    | < 0.1 mm <sup>3)</sup> |

<sup>1)</sup> Calculation example: Circumference of wheel / pulses per revolution = 200 mm / 16384 pulses per revolution = 0,012mm/pulse.

## Interfaces

| Communication interface   | PROFINET |
|---------------------------|----------|
| Programmable/configurable | <b>√</b> |

#### Electrical data

| Connection type                       | Male connector, Female connector, 1x, 2x, M12, M12, 4-pin, 4-pin, axial, axial |  |
|---------------------------------------|--|--|
| Supply voltage                        | 10 V DC 30 V DC  |  |
| Reverse polarity protection           | -  |  |
| MTTFd: mean time to dangerous failure | 80 years (EN ISO 13849-1) 1) 2)  |  |

<sup>1)</sup> This product is a standard product and does not constitute a safety component as defined in the Machinery Directive. Calculation based on nominal load of components, average ambient temperature 40°C, frequency of use 8760 h/a. All electronic failures are considered hazardous. For more information, see document no. 8015532.

#### Mechanical data

| Measuring wheel circumference | 500 mm <sup>1)</sup>         |
|-------------------------------|------------------------------|
| Measuring wheel surface       | Studded polyurethane surface |

<sup>&</sup>lt;sup>1)</sup> The surface of a measuring wheel is subject to wear. This depends on contact pressure, acceleration behavior in the application, traversing speed, measurement surface, mechanical alignment of the measuring wheel, temperature, and ambient conditions. We recommend you regularly check the condition of the measuring wheel and replace as required.

<sup>2)</sup> Value based on measuring wheel circumference. The measuring wheel circumference depends on manufacturing tolerances, wear and tear, the selected spring tensioning force, and the behavior of the measurement wheel surface at different temperatures and on different measurement surfaces. To obtain the most accurate measurement results, we recommend performing a reference run for positioning tasks so that application-specific measuring wheel characteristics can be taken into account.

<sup>3)</sup> Value is based on the mechanics. Backlash of the measuring wheel mechanics, is at a minimum. This enables a precise and repeatable measurement results.

<sup>2)</sup> Value refers to the mounted encoder.

<sup>2)</sup> The right spring tension force for the application shall keep the slippage at a minimum in the application working conditions and measuring surface, without damaging the measuring surface.

<sup>&</sup>lt;sup>3)</sup> The clamping force can be set in 6 fixed increments of 4 N. 4 N corresponds to one increment.

<sup>&</sup>lt;sup>4)</sup> When mounted from below, the encoder weight during spring pretensioning must be taken into account.

| Mounting  | Measuring wheel mounted at the rear                      |
|---|--|
| Spring arm mechanism material                                       |  |
| Spring element  | Stainless steel  |
| Measuring wheel, spring arm   | Aluminum   |
| Start up torque   | 0.5 Ncm  |
| Operating torque  | 0.3 Ncm  |
| Bearing lifetime  | 3.0 x 10^9 revolutions                                   |
| Minimum spring tension force  | 4 N <sup>2) 3)</sup>                                     |
| Max. permissible working area for the spring (continuous operation) | ± 10 mm  |
| Service life of spring element                                      | > 1.5 million cycles                                     |
| Mounting position relative to the measuring object                  | Preferably from above, from below possible <sup>4)</sup> |
| Mounted encoder   | AFS60 PROFINET, AFS60A-S4NB262144, 1059050               |
| Mounted mechanic  | BEF-MWS120-ARM, 2118239                                  |
| Attached measuring wheel  | BEF-MR10500APN, 4084735                                  |

<sup>1)</sup> The surface of a measuring wheel is subject to wear. This depends on contact pressure, acceleration behavior in the application, traversing speed, measurement surface, mechanical alignment of the measuring wheel, temperature, and ambient conditions. We recommend you regularly check the condition of the measuring wheel and replace as required.

#### Ambient data

| EMC                         | According to EN 61000-6-2 and EN 61000-6-3 <sup>1)</sup> |  |
|-----------------------------|--|--|
| Operating temperature range | -30 °C +80 °C <sup>2)</sup>                              |  |
| Storage temperature range   | -40 °C +100 °C <sup>2)</sup>                             |  |

 $<sup>^{1)}\,\</sup>mathrm{EMC}$  according to the standards quoted is achieved if shielded cables are used.

# SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
