

Precision Fiber Cleave Tool

The FSPCVR precision cleave tool enables quick and accurate cleaving of field fiber cable for terminating OptiCam® and Fusion Splice Connectors. The tooling enables a precise 7mm cleave necessary for Panduit OptiCam® Connectors, without the learning curve typical of other cleave tools, as well as a 10mm cleave for Fusion Splice Connectors. Excellent design means longer-lasting components and convenience, making the cleave step easier and safer for the technician. Compact, rugged design makes the FSPCVR cleaver convenient for a variety of workspaces.

Key Feature	Benefits
Cutting Edge	Rotary blade enables precision cleaves for up to 60,000 fibers. Integral counter keeps track of the number of cleaves. The blade can be set to rotate manually or automatically.
Safety	Internal waste bin collects fiber offcuts for easy disposal.
Easy to Use	Simple 3 step process makes clean, even, cleaves in just seconds.
Accuracy	Custom design allows users to do 7mm cleaves for termination of Panduit OptiCam® connectors, or a 10mm cleave for Fusion Splice Connectors.
