PARTERMT04 : Test clamp for earth electrodes.

Last edited on 13/09/2012

Description

Test clamp for earth electrodes. Used for spotting and disconnecting the earthing system and measuring electrical resistivity.

Technical features

Dimensions: 75L x 45W x 15H mm

Unit weight: 0.4kg

Material: tinned brass+ stainless steel screws and bolts

Designed for flat tape conductors with the following dimensions: width up to 30mm; thickness 2 to 4mm

Designed for round conductors with the following dimensions: Ø 8 to 10mm

Complies with the NF EN 50164-1 standard.
