#### Detailed technical data

# Safety-related parameters

| Safety integrity level                                       | SIL 3 (IEC 61508, IEC 61800-5-3) <sup>1)</sup>   |  |  |
|--|--|--|--|
| Performance level  | PL e (EN ISO 13849-1) 1)   |  |  |
| Category   | 3 (EN ISO 13849-1)<br>4 (EN ISO 13849-1)   |  |  |
| PFH <sub>D</sub> : Probability of dangerous failure per hour | 5.5 x 10 <sup>-9</sup> at 40 °C <sup>2)</sup><br>1.8 x 10 <sup>-8</sup> at 80 °C <sup>2)</sup> |  |  |
| $T_{\mathrm{M}}$ (mission time)                              | 20 years (EN ISO 13849-1) 3)   |  |  |
| Safety-related accuracy                                      | 0.09° category 3 <sup>4)</sup> 0.35° category 4 <sup>4)</sup>                                  |  |  |

<sup>1)</sup> For more detailed information on the exact configuration of your machine/unit, please consult your relevant SICK branch office.

#### Performance

| Number of steps per revolution (max. resolution)   | 262,144 (18 bit)                  |
|--|-----------------------------------|
| Number of revolutions  | 4,096 (12 bit)                    |
| $\label{eq:max_max} \textbf{Max. resolution (number of steps per revolution x number of revolutions)}$ | 18 bit x 12 bit (262,144 x 4,096) |
| Error limits G   | 0.05° <sup>1)</sup>               |

<sup>1)</sup> In accordance with DIN ISO 1319-1, position of the upper and lower error limit depends on the installation situation, specified value refers to a symmetrical position, i.e. deviation in upper and lower direction is the same.

#### Interfaces

| Communication interface | SSI |
|-------------------------|-----|

<sup>1)</sup> Valid signals can be read once this time has elapsed.

<sup>2)</sup> The values displayed apply to a the temperature at the operating temperature measuring point and diagnostic degree of coverage of 99%, which must be achieved by the external evaluation unit.

<sup>&</sup>lt;sup>3)</sup> Depending on the application, the operating life may also be limited by the bearing lifetime.

<sup>&</sup>lt;sup>4)</sup> The safety-related accuracy indicates the maximum positioning error limit with which the safety functions can be supported.

<sup>&</sup>lt;sup>2)</sup> Set on tool side: CW with view to the shaft.

| Communication Interface detail               | SSI + Sin/Cos   |
|--|---|
| Initialization time                          | 2 s <sup>1)</sup>   |
| Position forming time                        | < 1 µs  |
| Parameterising data                          | Number of steps per revolution  Preset position, preset position via hardware pin, counting direction, counting direction via hardware pin, reset factory setting, read out error memory, generate report |
| Code type                                    | Gray  |
| Code sequence parameter adjustable           | CW/CCW configurable <sup>2)</sup>   |
| Clock frequency                              | 100 kHz, ≤ 1 MHz  |
| Set (electronic adjustment)                  | H-active (L = 0 - 1,5 V, H = 2,0 - Us V)  |
| CW/CCW (counting sequence when turning)      | L-active (L = 0 - 1,5 V, H = 2,0 - Us V)  |
| Sine/cosine periods per revolution           | 1,024   |
| Output frequency                             | ≤ 153.6 kHz   |
| Load resistance                              | ≥ 120 Ω   |
| Signal before differential generation        | $0.5 V_{pp}$ , ± 20 %   |
| Signal offset before differential generation | 2.5 V ± 10 %  |
| Signal after differential generation         | $1 V_{pp}$ , $\pm 20 \%$  |

 $<sup>^{1)}</sup>$  Valid signals can be read once this time has elapsed.

#### Electrical data

| Connection type             | Cable, 12-wire, radial, 3 m |  |  |
|-----------------------------|-----------------------------|--|--|
| Supply voltage              | 4.5 32 V                    |  |  |
| Power consumption           | 0.7 W (without load)        |  |  |
| Reverse polarity protection | <b>√</b>                    |  |  |
| Short-circuit protection    | <b>✓</b> ¹)                 |  |  |

<sup>1)</sup> SinCos interface: Short-circuit to another channel or GND permitted for max. 30 sec. In the case of  $U_S \le 12$  V additional short-circuit to  $U_S$  permitted for max.

SSI interface: Short-circuit to another channel or GND permitted for max. 30 s. In the case of  $U_S \le 5$  V, additional short-circuit to  $U_S$  permitted for max. 30 s.

#### Mechanical data

| Mechanical design         | Solid shaft, face mount flange |  |  |
|---------------------------|--------------------------------|--|--|
| Shaft diameter            | 10 mm                          |  |  |
| Shaft length              | 19 mm                          |  |  |
| Weight                    | 0.3 kg <sup>1)</sup>           |  |  |
| Shaft material            | Stainless steel                |  |  |
| Flange material           | Aluminum                       |  |  |
| Material, stator coupling | Stainless steel                |  |  |
| Housing material          | Aluminum die cast              |  |  |
| Start up torque           | ≤ 0.5 Ncm (+20 °C)             |  |  |

<sup>&</sup>lt;sup>1)</sup> Based on devices with male connector.

 $<sup>^{2)}</sup>$  Set on tool side: CW with view to the shaft.

 $<sup>^{2)}</sup>$  Depending on the application, the operating life may also be limited by the bearing lifetime.

 $<sup>^{3)}</sup>$  The value corresponds to L<sub>10mr</sub> (ISO/TS 16281) at 10 °C up to 60 °C operating temperature, speed > 10 U/min, at max. permitted shaft load / shaft movement.

| Operating torque               | ≤ 0.3 Ncm (+20 °C)                                 |
|--------------------------------|--|
| Permissible shaft loading      | 80 N (radial)<br>40 N (axial)                      |
| Operating speed                | ≤ 9,000 min <sup>-1</sup>                          |
| Moment of inertia of the rotor | 8 gcm <sup>2</sup>                                 |
| Bearing lifetime               | 3.6 x 10 <sup>9</sup> revolutions <sup>2) 3)</sup> |
| Angular acceleration           | ≤ 500,000 rad/s²                                   |

<sup>1)</sup> Based on devices with male connector.

#### Ambient data

| EMC                                | EN 61000-6-2, EN 61000-6-3, EN 61000-6-7          |
|------------------------------------|---|
| Enclosure rating                   | IP65 (IEC 60529)                                  |
| Permissible relative humidity      | 90 % (Condensation not permitted)                 |
| Operating temperature range        | -30 °C +85 °C <sup>1)</sup>                       |
| Storage temperature range          | -30 °C +85 °C, without package                    |
| Resistance to shocks               | 100 g, 6 ms (according to EN 60068-2-27) $^{2)}$  |
| Resistance to vibration            | 30 g, 10 Hz 1,000 Hz (EN 60068-2-6) <sup>2)</sup> |
| Operating height (above sea level) | ≤ 2,000 m (80 kPa)                                |
| Protection class                   | III (according to DIN EN 61140)                   |
| Contamination rating               | 2 (IEC 60664-1)                                   |

 $<sup>^{1)}</sup>$  At operating temperature measuring point.

 $<sup>^{2)}</sup>$  Depending on the application, the operating life may also be limited by the bearing lifetime.

 $<sup>^{3)}</sup>$  The value corresponds to L $_{10\text{mr}}$  (ISO/TS 16281) at 10 °C up to 60 °C operating temperature, speed > 10 U/min, at max. permitted shaft load / shaft movement.

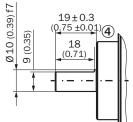

<sup>&</sup>lt;sup>2)</sup> Tested during operation within the safety-related accuracy.

## Dimensional drawing (Dimensions in mm (inch))

Solid shaft, face mount flange, radial cable

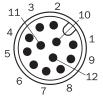

General tolerances according to DIN ISO 2768-mk

- ① Operating temperature measuring point (freely selectable, around the housing surface area in each case, approx. 3 mm away from flange)
- ② Measuring point vibration (respectively at the housing face. approx. 3 mm away from the cover edge)
- ③ M3 / M4 (3x) (6 mm deep)
- 4 Shaft with flat
- ⑤ Feather key DIN 6885-A 2x2x6
- 6 Key

## PIN assignment

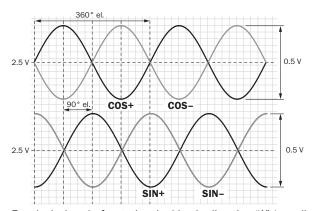

View of M23 and M12 male device connector on encoder

| PIN (M23) | PIN (M12) | Wire colors (ca-<br>ble connection) | Signal         | Explanation       |
|-----------|-----------|-------------------------------------|----------------|-------------------|

# SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
