For 1 AWG using F87-18 (18mm length) ferrules, the ferrule must be double crimped as shown below to achieve a UL Listed/CSA Certified termination.

FOR SINGLE CRIMP: Crimp ferrule using a standard crimping action – Ferrule funnel against die set, cable insulation against funnel. (Note: Insulation pulled back only to show detail as shown above.)

FOR DOUBLE CRIMP (F87-18 1 AWG only): Remove crimped ferrule and rotate 180° and re-insert as shown. Re-crimp ferrule. (Note: Insulation pulled back only to show detail as shown above.)
