

Product Environmental Profile

NFC Control Relay 3-Phase

General information

Representative product

NFC Control Relay 3-Phase - RMNF22TB30

Description of the product

NFC control relay is designed to monitor voltage and frequency events in industrial automation systems by closing or opening contact, the setting is programed by App.

Functional unit

NFC Control Relay, with 1.3W power consumption, switches ON/OFF electrical contact when the monitored voltage is below/above the voltage threshold during 10 years.

Constituent materials

Reference product mass

136 g including the product, its packaging and additional elements and accessories

Substance assessment

Products of this range are designed in conformity with the requirements of the RoHS directive (European Directive 2011/65/EU of 8 June 2011) and do not contain, or only contain in the authorised proportions, lead, mercury, cadmium, hexavalent chromium or flame retardants (polybrominated biphenyls - PBB, polybrominated diphenyl ethers - PBDE) as mentioned in the Directive

As the products of the range are designed in accordance with the RoHS Directive (European Directive 2002/95/EC of 27 January 2003), they can be incorporated without any restriction in an assembly or an installation subject to this Directive.

Details of ROHS and REACH substances information are available on the Schneider-Electric Green Premium website

<http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page>

Additional environmental information

The NFC Control Relay 3-Phase presents the following relevant environmental aspects

Design	Power consumption is reduced by electronic design optimization. Product support and service are digitized by mobile App.
Manufacturing	Manufactured at a Schneider Electric production site ISO14001 certified
Distribution	Weight and volume of the packaging optimized, based on the European Union's packaging directive Packaging weight is 16.3 g, consisting of Cardboard (98.3%), Paper(1.7%) Packaging recycled materials is 100% of total packaging mass.
Installation	RMNF22TB30 does not require any installation operations.
Use	The product does not require special maintenance operations.
End of life	End of life optimized to decrease the amount of waste and allow recovery of the product components and materials This product contains PCBA assembly(51.4g) that should be separated from the stream of waste so as to optimize end-of-life treatment. The location of these components and other recommendations are given in the End of Life Instruction document which is available on the Schneider-Electric Green Premium website http://www2.schneider-electric.com/sites/corporate/en/products-services/green-premium/green-premium.page Recyclability potential: 23% (version V1, 20 Sep. 2008 presented to the French Agency for Environment and Energy Management: ADEME).

Environmental impacts

Reference life time	10 years			
Product category	Other equipments - Active product			
Installation elements	No special components needed			
Use scenario	The product is in active mode 100% of the time with a power use of 1.3 W for 10 years			
Geographical representativeness	Europe			
Technological representativeness	NFC control relay is designed to monitor voltage and frequency events in industrial automation systems by closing or opening contact, the setting is programed by App.			
Energy model used	Manufacturing	Installation	Use	End of life
	Energy model used: Indonesia	Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27	Electricity grid mix; AC; consumption mix, at consumer; < 1kV; EU-27

Compulsory indicators		NFC Control Relay 3-Phase - RMNF22TB30					
Impact indicators	Unit	Total	Manufacturing	Distribution	Installation	Use	End of Life
Contribution to mineral resources depletion	kg Sb eq	4.43E-03	4.42E-03	0*	0*	4.85E-06	0*

* represents less than 0.01% of the total life cycle of the reference flow

Life cycle assessment performed with EIME version EIME v5.7.0.4, database version 2016-11 in compliance with ISO14044.

The use phase is the life cycle phase which has the greatest impact on the majority of environmental indicators (based on compulsory indicators).

Please note that the values given above are only valid within the context specified and cannot be used directly to draw up the environmental assessment of an installation.

Registration number	ENVPEP1707008_V1	Drafting rules	PCR-ed3-EN-2015 04 02
Date of issue	09/2018	Supplemented by	PSR-0005-ed2-EN-2016 03 29
Validity period	5 years	Information and reference documents	www.pep-ecopassport.org
