SMI Gateway GESIS KNX FLEX-SMI8

Système gesis® FLEX - La passerelle KNX SMI alimentée en monophasé dans un boîtier plat pouvant s'adapter sur rail porteur pour un montage décentralisé, est géré par un module de base. Il peut commander jusqu'à 8 entraînements SMI en 8 groupes. Les sorties 5 pôles comprennent le +/- SMI et L,N,T. La totalité des paramètres permet d'obtenir plusieurs fonctions d'automatisation. Les connexions électriques, enfichables suivant la norme CEI 61535 sur bus KNX et consommateurs, séparent l'automatisation et l'installation.
