

FIBERRUNNER 4x4 Hinged Duct Kit for Vertical Cable Drops

July 2004, Tinley Park, IL As part of the innovative [FIBERRUNNER Routing System](#), PANDUIT Corp. offers a new FIBERRUNNER 4x4 Hinged Duct Kit. The versatile system is designed to route, segregate and protect fiber optic and high performance copper cable runs to and between distribution frames and equipment racks within a telecommunications room, data center, central office or service provider facility.

The hinged duct kit provides a secure, accessible pathway for cables routed through a FIBERRUNNER 6x4 or 4x4 vertical tee fitting to rack mounted equipment. The kit contains all of the materials needed for convenient assembly, including one 6' length of 4x4 capacity hinged duct, one 6' length of hinged duct cover, three adjustable "Z" brackets, an adapter fitting and all required mounting hardware. Available colors include yellow, orange and black.

The innovative-hinged duct cover opens from the left or the right, providing easy access to cables and allowing the cover to stay with the channel. The adapter installs without the need for special tools or a separate coupler component.

The complete [FIBERRUNNER Routing System](#) includes QUIKLOCK™ couplers, QUIKLOCK brackets, snap-on hinged covers and full range of fittings providing quick, easy installations.
