

Electro-hydraulic crimping tools

In-line compact electrohydraulic crimping tool with D5 head, powered by NEW battery 18,0V 1,5A Li-Ion BL1815I.

- New In-line design offering better grip and handling.
- Electronic PCB that controls tool operation, stops the motor at end of crimping, records the cycle parameters and control the automatic return of the piston. This communicating card is equipped with a mini USB connector that allows connection to a PC and with 2 LEDs that informs on the tool operation and maintenance.
- Tool equipped with a pressure sensor in order to improve work precision.

The advantages :

Temps de cycle : 3/4s L

Autonomie : 60 to 160 crimps with a new 1,5Ah battery fully charged. L
