

Switching Power Supply Redundant Module Type SPD24RM20 DIN rail mounting

- Installation on DIN Rail 7.5 or 15mm
- 2 “Power Rdy” relay outputs
- Up to 480W output
- Unlimited number of connectable redundant power supplies*
- Very compact dimensions
- UL, cUL listed
- TUV approved
- Ce and RoHS compliant

*The power supplies can be externally connected with SPD24RM20 to increase the output power. However it is suggested to use 90% load only, for example $10A \times 2 \times 0.9 = 18A$. The power supplies of different models or spec. can not be connected for parallel operation.

Product Description

This SPD additional module is always guaranteed, even in case of failure of one power supply. 2 relay outputs provide voltage free outputs in order to send the alarm to a control unit when a failure occurs.

Typical Application Notes

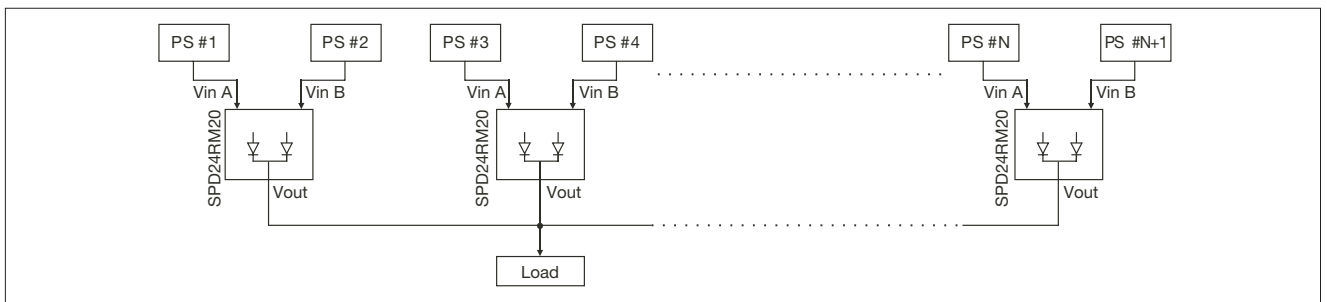

1.) 1+1 Redundancy: Using 1 more PS as the redundant unit.

2.) Single Use: Connecting only one PS to one SPD24RM20 to reduce the stress of the diodes and hence increase the reliability.

3.) 1+N Redundancy: Using more than one PS as redundant units to increase the reliability.
