

**PANDUIT Termination System for Metric Conductors
Delivers Added Assurance of Reliability and Safety for the Physical Infrastructure**

TINLEY PARK, IL (April 3, 2009) – *PANDUIT* enhances the Termination System for Metric Conductors with two-hole configurations and UL/CSA approvals. To meet the demands of applications that experience vibration or moving components, new two-hole lugs deliver more secure terminations for long-term reliability. The entire line meets standards UL 486A-486B and CSA C22.2 No. 65-03 with metric conductors, marked directly on the parts, to ensure safe and reliable connections in demanding applications throughout the physical infrastructure.

Ideal for the most demanding environments, where temperature extremes, weather conditions, chemicals, saltwater, shock and vibration can degrade performance and create risk, *PANDUIT* systems offer proven performance, installation efficiencies, and improved worker safety. With world-class quality products and superior installation tools, these systems optimize connections in the physical infrastructure contributing to lower total cost of ownership.
