## Installation

Vous pouvez installer le panneau solaire sur le mur ou le plafond.

- i** ATTENTION: Ceci est un équipement de recharge à source alternative: la quantité d'énergie générée par ce panneau solaire peut être affectée par son environnement, et principalement par l'intensité de la lumière du soleil et la durée d'exposition à la lumière. Si la batterie de la caméra est presque vide, souvenez-vous que ce panneau solaire seul ne peut assurer seul le fonctionnement continu de cette dernière.

### 1 Installation du support

- Placez le gabarit de perçage sur une surface propre et plane.
- (Installation uniquement sur un mur ou un plafond en ciment) Percez les trous correspondant au gabarit de perçage et insérez les chevilles.
- Fixez le support à l'aide de trois vis.

- i** Lorsque vous percez des trous pour les chevilles à expansion, veuillez vous assurer que le diamètre de la tête de forage est compris entre 5,5 et 6 mm et que la profondeur du trou n'est pas inférieure à 25 mm.

## 2 Installation du panneau solaire

- Montez le panneau solaire sur le support.
- Serrez la vis de fixation.

## 3 Réglage de l'angle

- Desserrez la vis de réglage.
- Ajustez l'angle du panneau solaire comme désiré.
- Vissez la vis de réglage lorsque le panneau solaire se trouve dans la position désirée.

- i** • Veuillez ne pas placer le panneau solaire complètement parallèle au sol pour éviter l'accumulation de poussière ou d'autres saletés.
- Le panneau solaire doit être incliné pour recevoir le maximum de rayonnement solaire et l'angle d'inclinaison recommandé est de 25° à 40°.

## 4 Charge de la batterie de la caméra

- Connexion avec la batterie de la caméra.

- i** • Conformément aux exigences de sécurité et de réglementation, la plage de température de l'environnement de travail pour la charge des batteries doit être maintenue entre 0 et 45 °C.
