Interface relays and optocouplers

CR-S, CR-P, CR-M, CR-U and R600

- Wide variety and flexibility
- High contact ratings
- Globally approved and available

ABB offers a complete range of interface relays and optocouplers for increased flexibility and choice. This portfolio includes pluggable relays for easy interchangeability and optocouplers for an extended electrical life.

Furthermore, interface relays with gold plated contacts suitable for sensitive applications are available. This wide selection of relays adheres to the highest global standards and satisfies the requirements for a diverse number of applications and needs.

Interface relays and optocouplers

Offer overview

Relays are universally applicable and are utilized in a diverse array of applications. They are a significant element in contemporary industrial processes and are used in applications where galvanic isolation, signal separation, voltage coupling and signal amplification are required.

The ABB portfolio includes electromechanical relays and optocouplers. The electromechanical relays operate using an electromagnetic field whereas optocouplers use light. Optocouplers are predominantly used in applications where a high switching frequency is necessary. Furthermore, optocouplers do not contain any moving parts and are therefore bounce-free, immune to vibrations and possess a long electrical life.

CR-S range

The slim line of interface relays and optocouplers

The pluggable interface relays and optocouplers of the CR-S range are used for electrical isolation, amplification and signal matching between the electronic controlling, e.g. PLC, iPC or field bus systems and the sensor / actuator level. The CR-S range combines the flexibility of a modular system and the ability of switching high currents on a small footprint thus can be used in applications where space saving is essential. The CR-S range also includes complete versions consisting of a relay, socket and marker.

CR-P range

The pluggable pcb interface relays and optocouplers

The pluggable interface relays of the CR-P range are used for electrical isolation, amplification and signal matching between the electronic controlling, e.g. PLC, iPC or field bus systems and the sensor / actuator level. The CR-P range offers highest current switching in an IP67 rated relay housing. Furthermore, nine different coil voltages are available to suit world wide applications and even gold contact versions are available which is essential when it comes to switch sensitive signals. The CR-P range also includes complete versions consisting of a relay, socket, holder, marker and function module.

Interface relays and optocouplers

Offer overview

CR-M range

The pluggable miniature interface relays

The pluggable interface relays of the CR-M range are used for electrical isolation, amplification and signal matching between the electronic controlling, e.g. PLC, iPC or field bus systems and the sensor / actuator level. The CR-M range offers up to 4 contacts in one relay and a built in test button which makes a circuit check fast and easy. 12 different coil voltages are available to suit world wide applications and even gold contact versions are available which is essential when it comes to switch sensitive signals. The CR-M range also includes complete versions consisting of a relay, socket, holder, marker and where applicable a function module.

CR-U range

The pluggable universal interface relays

The pluggable interface relays of the CR-U range are used for electrical isolation, amplification and signal matching between the electronic controlling, e.g. PLC, iPC or field bus systems and the sensor / actuator level. The CR-U range offers up to 3 contacts in one relay and a built in test button which makes a circuit check fast and easy. 12 different coil voltages are available to suit world wide applications.

R600 range

Boxed interface relays and optocouplers

Boxed interface relays of the R600 range are used for electrical isolation, amplification and signal matching between the electronic controlling, e.g. PLC, iPC or field bus systems and the sensor / actuator level. The relay itself is built in thus the perfect solution because this design fulfills highest vibration requirements. The compact design and different connection terminal possibilities further optimize your panel installation.

Applications of interface relays

A proven technology used worldwide

Relays are universally applicable and are utilized in a diverse array of applications. They are a significant element in contemporary industrial processes and are used in applications where galvanic isolation, signal separation, voltage coupling and signal amplification are required.

Circuit multiplication

A single voltage signal may be used to simultaneously perform up to four different switching operations. Each output contact can be used to switch load circuits with different voltage and current levels.

Galvanic isolation

Interface relays are excellently suited to ensure safe galvanic isolation, i.e. separation between control circuit and load circuit.

Voltage conversion

Interface relays allow for small voltage signals to switch much larger loads. For example: a 24 V DC 10 mA signal can be used to switch a 230 V AC 16 A load.

Billions
of relays operate and interface
between control circuits and electrical
loads.

Pluggable interface relays

Selection table CR-S range

How to use the selection table

Choose the desired control supply voltage from the column "Control voltage", e.g. "5 V DC".

Choose the desired kind of connection terminal from the column "Connection terminal", e.g. "spring".

Choose the desired material of contact from the column "Contact Material" e.g. "gold plated".

| Control voltage | Connection terminal | Contact material | Socket type | Socket order code | Relay type | Relay order code |
|-----------------|---------------------|------------------|--------------------------|------------------------|----------------------|------------------------|
| 5 V DC | screw | standard | CR-S006/024VDC1SS | 1SVR405521R1100 | CR-S005VDC1R | 1SVR405501R1010 |
| | | gold plated | CR-S006/024VDC1SS | 1SVR405521R1100 | CR-S005VDC1RG | 1SVR405501R1020 |
| | spring | standard | CR-S006/024VDC1SZ | 1SVR405521R1200 | CR-S005VDC1R | 1SVR405501R1010 |
| | | gold plated | CR-S006/024VDC1SZ | 1SVR405521R1200 | CR-S005VDC1RG | 1SVR405501R1020 |
| 12 V AC | screw | standard | CR-S012/024VADC1SS | 1SVR405521R3100 | CR-S012VDC1R | 1SVR405501R2010 |
| | | gold plated | CR-S012/024VADC1SS | 1SVR405521R3100 | CR-S012VDC1RG | 1SVR405501R2020 |
| | spring | standard | CR-S012/024VADC1SZ | 1SVR405521R3200 | CR-S012VDC1R | 1SVR405501R2010 |
| | | gold plated | CR-S012/024VADC1SZ | 1SVR405521R3200 | CR-S012VDC1RG | 1SVR405501R2020 |

Example

When you have chosen 5 V DC as control supply voltage, spring connection as connection terminal and gold plated as contact material the following order codes and type designators are valid:

Socket: CR-S006/024VDC1SZ, 1SVR405521R1200

Relay: CR-S005VDC1RG, 1SVR405501R1020

CR-S range relay assemblies

| Control voltage | Connection terminal | Contact material | Socket type | Socket order code | Relay type | Relay order code |
|-----------------|---------------------|------------------|---|------------------------------------|---------------|------------------|
| 5 V DC | screw | standard | CR-S006/024VDC1SS | 1SVR405521R1100 | CR-S005VDC1R | 1SVR405501R1010 |

Pluggable interface relays and optocouplers

Benefits and advantages

ABB's interface relays and optocouplers ensure a reliable voltage conversion between process peripherals and higher level control systems. These relays ensure reliable signal switching and provide electrical isolation for sensitive electronics such as PLCs. The wide variety of pluggable interface relays with accompanied by standard or logic sockets may be used for switching AC or DC loads. Suitable for extreme environments, ABB's interface relays are offered across a wide spectrum of coil voltages, with a variety of optional function modules.

Continuous operation

The interface relay portfolio incorporates a large assortment of relays. It includes both electro-mechanical relays and optocouplers. Optocouplers allow for continuous operation without any mechanical wear-and-tear.

Easy to install

The interface relay includes both pluggable and non-pluggable relays. The pluggable relays allow for the easy and seamless exchange of relay modules.

Global availability

The ABB interface relays and optocouplers are approved for a large variety of applications, comply to the highest global approvals and are available world-wide.

Pluggable interface relays and optocouplers

Socket and terminal connection types

Standard sockets

01 Standard socket CR-P

2CDC291040F0004

02 Standard socket CR-M

2CDC29100950011

Position of connection terminals:
 Coil connection (A1-A2) on lower side of the socket, contact connections (n/o and n/c contacts) on the lower and upper side of the socket.

Logical sockets

03 Logical socket CR-P

2CDC29100650011

04 Logical socket CR-M

2CDC291042F0004

Position of connection terminals:
 Coil connection (A1-A2) on lower side of the socket, all contact connections (common contacts, n/o and n/c contacts) on the upper side of the socket.

Terminal connection types

05 Screw type

06 Spring type

07 Fork type

A variety of sockets are available for interface relays and optocouplers to meet the needs of different applications such as vibration-intensive environments.

CR-S relay

The slim pluggable interface relays and optocouplers of the CR-S range may be used for electrical isolation, amplification and signal matching. The CR-S relays are 6.2 mm wide and therefore allow for the switching high currents on a small footprint.

Pluggable interface relays and optocouplers

Ordering details – CR-P range

The CR-P range offers the highest current switching in an IP67 rated relay housing. This range comprises of pluggable interface relays and optocouplers offered in 10 different control supply voltages. Additionally, gold plated contacts are available for applications where sensitive signals are to be switched. The CR-P range also includes complete versions consisting of a relay, socket, holder, marker and function module.

Pluggable interface relays and optocouplers

Ordering details – CR-P range

CR-PLSX

CR-PSS

Standard and logical sockets for CR-P interface relays are suitable for snap-on mounting onto a DIN rail. Optional function modules for the CR-P range are plugged into both standard and logical sockets.

Ordering details - Sockets*

| Version | Connection terminal | Type | Order code | Pkg qty | Weight (1 pc.) kg (lb) |
|---|---------------------|---------|-----------------|---------|------------------------|
| Logical socket with protective separation | screw | CR-PLS | 1SVR405650R0000 | 10 | 0.045 (0.099) |
| Logical socket | screw | CR-PLSX | 1SVR405650R0100 | | 0.043 (0.095) |
| | spring | CR-PLC | 1SVR405650R0200 | | 0.042 (0.093) |
| Standard socket | screw | CR-PSS | 1SVR405650R1000 | | 0.038 (0.084) |

*All CR-P socket packages include a set of markers.

Standard sockets

Position of connection terminals: coil connection (A1-A2) on lower side of the socket, contact connections (n/o and n/c contacts) on the lower and upper side of the socket.

Logical sockets

Position of connection terminals: coil connection (A1-A2) on lower side of the socket, all contact connections (common contacts, n/o and n/c contacts) on the upper side of the socket.

Pluggable interface relays and optocouplers

Ordering details – CR-M range

CR-M

The CR-M range offers the possibility of switching up to 4 different circuits with a single relay. The integrated LED and test button* allow for easy testing and commissioning. This range of relays are available at a wide range of different coil voltages and are accompanied by a wide variety of function modules. The CR-M range also includes complete versions consisting of a relay, socket, holder, marker and where applicable, function module.

* Note: During the operation of the relay, the temperature of the test button will increase. In order to manually operate the test button, the supply voltage should first be disconnected. The test button is only safe to operate once it has cooled down or by using protective gloves and insulated tools. During operation, the test button should be pressed smoothly and quickly. When the test button is depressed, the n/o contacts will close and remain closed. Once the button is released, the n/o contacts change status and open. A 90 degree rotation of the test button closes and holds the n/o contacts in a closed position. Reverse rotation of the test button will once again change the status of the n/o contacts to their default open position.

Pluggable interface relays and optocouplers

*All CR-M socket packages include a set of markers.

Standard sockets

Position of connection terminals: coil connection (A1-A2) on lower side of the socket, contact connections (n/o and n/c contacts) on the lower and upper side of the socket.

Logical sockets

Position of connection terminals: coil connection (A1-A2) on lower side of the socket, all contact connections (common contacts, n/o and n/c contacts) on upper side of the socket.

Ordering details – CR-U range

CR-U

ECDC 291 047 F0004

The CR-U range offers up to 3 change over contacts in single relay. The integrated LED and test button* allow for easy testing and commissioning. This robust range of relays are available at a wide range of different coil voltages and are accompanied by a wide variety of function modules.

* Note: During the operation of the relay, the temperature of the test button will increase. In order to manually operate the test button, the supply voltage should first be disconnected. The test button is only safe to operate once it has cooled down or by using protective gloves and insulated tools. During operation, the test button should be pressed smoothly and quickly. When the test button is depressed, the n/o contacts will close and remain closed. Once the button is released, the n/o contacts change status and open. A 90 degree rotation of the test button closes and holds the n/o contacts in a closed position. Reverse rotation of the test button will once again change the status of the n/o contacts to their default open position.

Boxed interface relays and optocouplers R600 range

Overview

ABB's R600 range may be used in applications where electrical isolation, amplification and signal matching are required. The slim, compact design, incorporated with the variety of terminal connections available allow for the optimization of space within a control panel. This broad portfolio allows for the flexibility of choice and includes both electromagnetic relays and optocouplers.

Continuous operation

The ABB boxed interface relays portfolio incorporates a large assortment of non-pluggable relays. It includes both electro-mechanical relays and optocouplers. The R600 Optocouplers allow for continuous operation without any mechanical wear-and-tear.

Space saving

The 6 mm slim housing of the R600 boxed interface relays provides the possibility of space saving within control cabinets. The 75 mm depth of these relays allows for the use in compact cabinets.

Global availability

The ABB boxed interface relays are approved for a large variety of applications and adhere to highest levels of global approvals (UL, CSA, VDE, CCC).

Boxed interface relays and optocouplers R600 range

Overview

Complete product line

1 n/o, 1 n/c, 1 c/o, 2 c/o output configuration. Standard contact material for switching high current signals as well as gold-plated contacts for reliable switching of low current signals.

Marine certification

The R600 range offers the LR approval, which allows usage of the boxed interface relays and optocouplers in many applications around the marine segment. The performance of the R600 range has been proven by successfully passing tests required for operating under harsh conditions.

Safe operation

High resistance to vibration and shock thanks to the relay soldered inside of the housing. Wrong relay replacement or relay lose not possible. Devices with immunity to leakage currents.

Longevity

Optocoupler with transistor, MOS-FET and Triac output ensure a longer lifetime, higher reliability and quiet operation.

Easy to mount

The R600 interface relays and optocouplers are easy to mount by snapping onto a DIN-rail according to IEC/EN 60715. Time saving wiring thanks to a jumper bar.

Boxed interface relays R600 range

Ordering details

R600 - 6 mm

The R600 range comprises of boxed interface relays and optocouplers. In this range, the relay is soldered into device housing, fulfilling the highest vibration requirements. This compact range of relays are 6 mm wide and provide the possibility of switching AC and DC circuits with the same relay. All the sockets in this range are equipped with an indicator LED and available with screw or spring terminals.
