**TECHNICAL DATA**

Fluke TruTest™ Data Management and Reporting Software

The easy-to-use data management solution

Fluke TruTest Software is designed to eliminate the hassle associated with traditional electrical system data management and reporting. Whether you are testing fixed wire installations, or appliances in an office, verifying repairs in a workshop, or performing annual inspections proper data management is critical for producing easy-to-understand reports for clients. Compatible with a growing list of Fluke and Beha-Amprobe test and measurement devices TruTest Software allows you to quickly and easily import measurement results directly from your test instruments, manage files transferred from instruments, or manually enter data as needed.

With a streamlined user interface and intuitive workflow, measurement data can be easily formatted into printable test certificates and reports complete with your company logo and electronic signature.

- Easily manage measurement data
- Quickly create test certificates and reports
- Free updates for 5 years after installation
- Easy data collection and database transfers
- Enables manual data entry
- Intuitive user interface
- Fast and simple operations

STREAMLINED DATA MANAGEMENT

Manage test results, client and site data with ease, and create reports quickly using the intuitive, modern user interface and custom-report builder
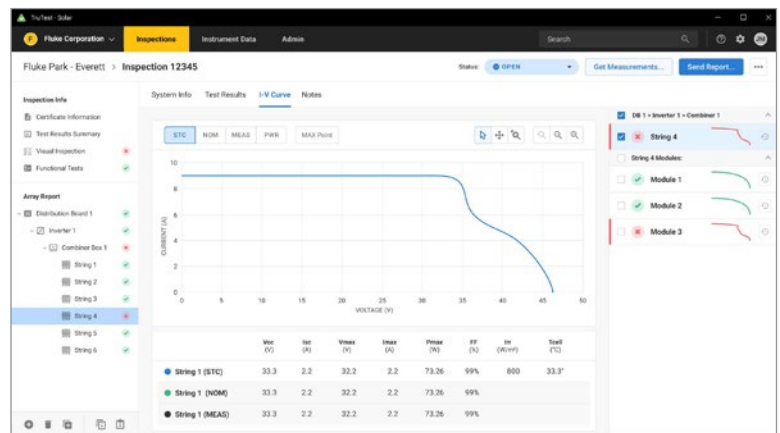

CREATE CUSTOM AUTO-TESTS

Choose from pre-defined automatic test codes, or create your own to ensure technicians gather the right data at the right site

DASHBOARD INTERFACE

On-screen intuitive dashboard interface allows the user to see the status of all their clients instantly and navigate to further levels of detail if desired

Solar SMFT software showing I-V curve

Compatibility

TruTest™ is compatible with a growing list of Fluke and Beha–Amprobe test instruments including the following:

Multifunction PV Tester and Performance Analyzer

- Fluke SMFT-1000

Portable Appliance Testers

- Fluke 6500
- Fluke 6500-2
- Beha-Amprobe GT-600
- Beha-Amprobe GT-650
- Beha-Amprobe GT-800
- Beha-Amprobe GT-900

Installation Testers

- Fluke 1653
- Fluke 1653B
- Fluke 1654B
- Fluke 1662
- Fluke 1663
- Fluke 1664 FC
- Beha-Amprobe ProInstall-100
- Beha-Amprobe ProInstall-200

Databases from the Fluke DMS Software or Beha–Amprobe ES Control software can also be converted and transferred to the TruTest Software platform*. Microsoft Access Runtime 2016 is required for the DMS/EsControl database conversion.

(*) see TruTest manual for further details.

Comprehensive Reporting

Fluke TruTest Software simplifies the reporting process so you can produce easy-to-understand test certificates and reports as quickly as possible, saving you time and money. A growing list of regional reports including DIN VDE 0701-0702, ÖVE/ÖNORM E 8701, SNR 462638, NEN3140, IEC 62446-1 and EU directive 2009/104/EC (BetrSichV). All of these reports are available at the touch of a button, and a pre-configured international template ensures that no matter your location TruTest Software has you covered.

Tree topology

Hierarchical tree topology is used to represent clients, sites, inspections with customizable asset levels including distribution boards, inverters, combiner boxes, strings and individual modules, making it ideal for use in PV systems of varying sizes while allowing you to maintain testing and reporting flexibility. Each element is presented as a single tree node and the properties of each node are presented after selection. Tree topology can be maintained by adding nodes, deleting nodes, duplicating nodes, duplicating subtrees and node editing.

Demo software and software packages

Free demonstration software is available at **www.fluke.com/trutestsoftware**. After downloading start the installation by double clicking on the software file. The setup program will guide you through the installation procedure. Please follow the installation instructions displayed on the screen.

After purchasing TruTest™ Lite or TruTest™ Advanced, you will be provided with a code that will give you full access to the features purchased.

Solar reporting solution

Fluke TruTest™ Software now supports the SMFT–1000 Multifunction PV Tester and Performance Analyzer. Whether you are analyzing panel efficiency through I–V curves, or safety testing the system through the Category 1 test regime in conformance to IEC 62446–1, proper data management is critical for producing easy–to–understand reports for clients. Import measurement results directly from your solar multifunction tester to computer, organize and analyze the data, compare individual asset data against previous measurements imported and provide a comprehensive and visual client report.

Specifications

Function	Demo	Lite	Advanced
Database structure (Local standalone or server based)	Local	Local	Local
Portable Appliance Tester (PAT) module	●	●	●
Portable Appliance Testers supported	Fluke 6500, Fluke 6500-2, Beha-Amprobe GT-600, Beha-Amprobe GT-650, Beha-Amprobe GT-800, Beha-Amprobe GT-900
