Communication interface HIPERFACE® Electrical data Connection type Cable, 8-wire (4 x 2 x 0.15 mm²), radial, 1.5 m Supply voltage 7 V DC 12 V DC Recommended supply voltage 8 V DC Current consumption < 80 mA (without load) Output frequency for sine/cosine signals ≤ 200 kHz	Type of code for the absolute value	Binary
Firetrace Firetrace Electrical data Cable, 8-wire (4 x 2 x 0.15 mm²), radial, 1.5 m Supply voltage 7 V DC 12 V DC Recommended supply voltage 8 V DC Current consumption < 80 mA (without load) Output frequency for sine/cosine signals < 200 kHz	Code sequence	Rising, For clockwise shaft rotation, looking in direction "A" (see dimensional drawing)
Connection typeCable, 8-wire (4 x 2 x 0.15 mm²), radial, 1.5 mSupply voltage7 V DC 12 V DCRecommended supply voltage8 V DCCurrent consumption< 80 mA (without load)	Communication interface	HIPERFACE®
Supply voltage 7 V DC 12 V DC Recommended supply voltage 8 V DC Current consumption < 80 mA (without load) Output frequency for sine/cosine signals ≤ 200 kHz	Electrical data	
Recommended supply voltage 8 V DC Current consumption < 80 mA (without load) Output frequency for sine/cosine signals ≤ 200 kHz	Connection type	Cable, 8-wire (4 x 2 x 0.15 mm²), radial, 1.5 m
Current consumption < 80 mA (without load) Output frequency for sine/cosine signals ≤ 200 kHz	Supply voltage	7 V DC 12 V DC
Output frequency for sine/cosine signals ≤ 200 kHz	Recommended supply voltage	8 V DC
	Current consumption	< 80 mA (without load)
MTTF: mean time to dangerous failure 230 years (EN ISO 13849) ¹⁾	Output frequency for sine/cosine signals	≤ 200 kHz
	MTTF: mean time to dangerous failure	230 years (EN ISO 13849) ¹⁾

¹⁾ This product is a standard product and does not constitute a safety component as defined in the Machinery Directive. Calculation based on nominal load of components, average ambient temperature 60°C, frequency of use 8760 h/a. All electronic failures are considered hazardous. For more information, see document no. 8015532.

Mechanical data

Shaft version

Blind hollow shaft

 $^{1)}$ Allow for self-heating of 3.3 K per 1,000 rpm when designing the operating temperature range.

MOTOR FEEDBACK SYSTEMS ROTARY HIPERFACE®

Shaft diameter	15 mm
Shaft material	Stainless steel
Flange material	Zinc diecast
Housing material	Aluminum die cast
Flange type / stator coupling	Stator coupling
Dimensions	See dimensional drawing
Weight	≤ 0.25 kg
Moment of inertia of the rotor	40 gcm ²
Operating speed	≤ 9,000 min ^{-1 1)}
Angular acceleration	≤ 500,000 rad/s²
Operating torque	0.6 Ncm (+20 °C)
Start up torque	+ 0.8 Ncm (+20 °C)
Permissible movement static	± 0.3 mm, ± 0.5 mm radial, axial
Permissible movement dynamic	± 0.1 mm radial ± 0.2 mm axial
Life of ball bearings	3.6 x 10 ⁹ revolutions

 $^{1)}\,\text{Allow}$ for self-heating of 3.3 K per 1,000 rpm when designing the operating temperature range.

Ambient data

Operating temperature range	-40 °C +115 °C
Storage temperature range	-40 °C +115 °C, without package
Relative humidity/condensation	90 %, Condensation not permitted
Resistance to shocks	100 g, 6 ms (according to EN 60068-2-27)
Frequency range of resistance to vibrations	20 g, 10 Hz 2,000 Hz (EN 60068-2-6)
EMC	According to EN 61000-6-2 and EN 61000-6-3 1)
Enclosure rating	IP65, with mating connector inserted (IEC 60529)

¹⁾ The EMC according to the standards quoted is achieved when the motor feedback system is mounted in an electrically conductive housing, which is connected to the central earthing point of the motor controller via a cable screen. The GND-(0 V) connection of the supply voltage is also grounded here. If other shielding concepts are used, users must perform their own tests.

Dimensional drawing (Dimensions in mm (inch))

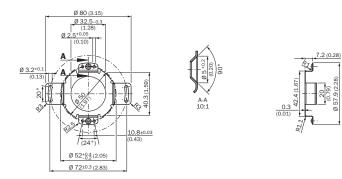

Blind hollow shaft, cable - standard system

General tolerances according to DIN ISO 2768-mk

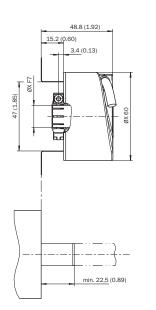

(1) Cable diameter = 5.6 mm + -0.2 mm bend radius = 30 mm

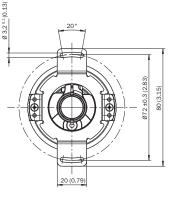

② Dimensional drawing of the stator coupling may differ depending on the variant. Please also refer to the dimensional drawing of the stator coupling.

SICK AT A GLANCE

SICK is one of the leading manufacturers of intelligent sensors and sensor solutions for industrial applications. A unique range of products and services creates the perfect basis for controlling processes securely and efficiently, protecting individuals from accidents and preventing damage to the environment.

We have extensive experience in a wide range of industries and understand their processes and requirements. With intelligent sensors, we can deliver exactly what our customers need. In application centers in Europe, Asia and North America, system solutions are tested and optimized in accordance with customer specifications. All this makes us a reliable supplier and development partner.

Comprehensive services complete our offering: SICK LifeTime Services provide support throughout the machine life cycle and ensure safety and productivity.

For us, that is "Sensor Intelligence."
